

People Here and There

C. S. Spencer of Portland, is in Pendleton today.

B. C. Lloyd is among the Spokane business visitors here today.

William G. Phoenix of Portland, representing the Deveraux Mortgage Co., is in Pendleton today on business and is at the Pendleton Hotel.

J. M. Gilbert, of Pilot Rock, stops the wild ones that curve around the batters' necks when spring and summer bring out the grand old American game of baseball. The husky catcher also yields a wicked stick and last summer hit hot work was well known in the Blue Mountain League. Mr. Gilbert is in Pendleton today on business.

Ruth Gordon, New York actress who, because her legs were bowed, had them broken to remedy the defect, and who has attracted nation-wide notice by so doing, will be remembered by Pendleton audiences who saw Booth Tarkington's play "Clarence," in this city last summer. Miss Gordon played the part of the young daughter, and her husband took the part of the son, "Toby."

N. J. Hanson is here from Spokane on business.

James Johns went to Pilot Rock today on business.

F. H. Sturgill, of La Grande is a guest at the St. George hotel.

Wheat had a small decline early, worked gradually higher until about midday and then developed a semi-panic condition with shorts occupying the uneasy position. There was nothing particular significant in the way of news to account for the ad-

vance aside from revived complaints of green bug infestation in Texas and an estimate on the Indian wheat acreage showing a reduction of 7,000,000 acres. The statistical position of wheat in the United States which heretofore has been ignored, also came in for considerable discussion today. A Country offerings reports light, but it is very probable that this advance will attract freer selling. The foreign news remains much the same as it has been recently, that competitive countries are underselling us from 12 to 16 1-2 cents a bushel. The advance today having been more at the expense of the short interest, we believe developments of a more constructive sort than in sight at present will be necessary to maintain tonight's closing level.

CHICAGO, Feb. 8.—(U. P.)

Wheat futures soared today on the Chicago board of trade. March and May wheat registering gains of 3 1-4 to 3 1-2 respectively. The gains were influenced by heavy short coverings. Fresh speculative buying induced by reports of a better domestic milling demand, reports of light visible wheat and flour stocks. Another influencing factor was a report that destructive bugs were discovered in Texas fields.

LIBRARY COMMITTEE AGREES TO COMBINE IN CITY-COUNTY UNIT

Consolidation Now Only Lacks Approval of City Council, Which When Given Will Result in Transfer of Books at Once.

Consolidation of the city of Pendleton's library with the county library here is settled but for the stamp of approval of the city council, which is expected to ratify the agreement of its special library committee at tomorrow night's meeting. The city-library committee met on Saturday with the county library committee here, presented their plan for consolidation and met with the approval of the county board.

Should the council give its approval to the action of the committee, transfer of the books is expected to result immediately. The committee handling the matter on behalf of the city consists of F. Willard Bond, chairman, Manuel Friedly and Robert Simpson.

As soon as the present library quarters in the city hall are vacated, it is expected that the room will be made a boys' club under supervision of Pendleton Community Service. The Pendleton Commercial Association at its last meeting voted to allow this boys' club to use billiard tables belonging to the association, which are now in storage.

This matter has also been brought to the city council informally and it is understood that that body is willing to co-operate providing the proper supervision is maintained. The dedication of such a room to the young lads of the city is expected to fill quite a need and, with Community Service in charge considerably more good is expected to result than from the little-used city library there.

ers; the poultry industry and the wool and mohair industry. In Washington and Idaho associations have been formed with contracts similar to this and have now over 12,000,000 bushels of wheat signed up by their membership under agreements similar to this marketing agreement. Movements are on foot to establish strong market organizations in all the wheat growing states of the Union.

WONDERFUL EFFECT OF REOLO IN FILLING OUT HOLLOW CHEEKS WITH NEW FIRM FLESH

Regardless of what and how much you eat, if the nervous system is unstrung and the iron has been burned

out of the blood, the long, drawn face and haunted expression will remain. But put Reolo into your blood, let the nerve centers come in contact with it, and then you have started upward. There is one component of Reolo that actually provokes an increase of flesh. In combination with this element there are ingredients that increase red corpuscles enormously in certain anemic conditions. In a day or two, the appetite improves in a way that is a revelation to those who found it hard work to eat, and soon the bluish pallor of the skin is replaced with the pinkish hue of health. You now not only feel well, you look it, such is the remarkable influence of Reolo in but a few short days. But this is not all. Reolo has intensified the activity of the vital process to such an extent that the old feeling of exhaustion after effort is completely gone. It is certainly a most comfortable and satisfactory feeling of reassurance, and there is no other condition to be compared to it.

Ask any of the clerks at Thompsons Drug Store and any other leading drug store about Reolo. They are selling it and recommending it upon the strength of what they see every day, men and women the very picture of health who six weeks before were nervous and bloodless dependents. Get a \$1.00 box of Reolo today and live.

ROOSEVELT HIGHWAY BILL RECALLED FROM HOUSE BY SENATORS

Action Considered Preliminary to Ultimate Slaughter of the Measure Which Commission Violently Opposes.

SALEM, Feb. 8.—(A. P.)—The senate voted 15 to 11 to recall from the house the Roosevelt highway bill. This action was preliminary to a probable ultimate slaughter of the measure, which was violently opposed by the state highway commission. The bill to give the secretaryship of the child welfare and the industrial welfare commissions to a labor commissioner and the bill eliminating Mrs. Millie Trumbull, present secretary, went down in overwhelming defeat by an indefinite postponement in this house.

Bitter Protests.

SALEM, Feb. 8.—(A. P.)—The senate voted 17 to 12 to recall from the house the Roosevelt highway bill for reconsideration. The action was over the bitter protests of Senators Hall and Norblad. Hall declared he had not traded a vote on any measure to get votes for his way bill. He accused Chairman Booth of the highway commission of lobbying against it. Norblad also made the charge. "Talk about lobbying," he shouted. "Who is lobbying Senator Hall and I or Mr. Booth. In all fairness I think you will say that the log rolling has been on the other side."

ORE.-WASH. HAY GROWERS AMALGAMATION PLANNED

The combination of the Columbia Basin Hay Growers Association and the Washington Hay Growers Association in the formation of a central selling agency and the adoption of a contract for the marketing of baled hay by growers was planned at a meeting of stock feeders in Hermiston Saturday, says Fred Bennion, county agent, who attended. The board of directors of the Columbia Basin association was instructed to enter into negotiations with the Washington association.

Robert Withycombe, of the Eastern Oregon Experiment station, who spoke on the feeding of beef cattle, sheep and hogs at Stanfield Friday, repeated his talk at the Hermiston meeting. He showed that it is impossible to grow straight alfalfa feed or to obtain the best results when using other feeds such as silage, and also pointed out that diversified feeding lowers cost of production.

"A steer will gain 8 pounds per day on a straight diet of 25 pounds of alfalfa hay," said Mr. Withycombe. "On 25 pounds of hay and 25 of ensilage, he will gain 1.8 pounds per day. It is well to remember the importance of marketing hay, not baled, but in the stock."

Mr. Bennion spoke and induced the farmers to unite in the purchase of metal forms for the construction of concrete silos. J. N. Price, manager of the Washington Hay Growers Association, emphasized the need for a hay marketing association.

EDUCATIONAL TOOTH TALK NO. 3

Tartar and Disease

"Tartar" is a lime-like substance that forms on the teeth. It is composed of saliva, phosphate of lime, etc., and becomes attached to the teeth near the salivary duct. It is porous like a sponge and holds particles of food which decompose and taint the breath with an offensive odor. This tartar, once formed, increases, always in the direction of the gums; first, inflaming them, then causing them to puff up and recede from the teeth, and finally, by absorption of the bony sockets, to cause good, sound teeth to drop out for want of support.
