Umatilla River Still High.
The Umatilla river is still running bank full through Pendleton and is out of its banks in a large part of its course below here. Near Reith, Youkum and Nolin there are large flooded areas and the volume of water emptying into the Columbia is immense for the Umatilla river. No road or railroad damage below here has resulted of late. The warm weather on the mountains is responsible for the large volume of water.

Gun Club Was Not Notified.
Pendleton Rod & Gun Club was scheduled yesterday to open the Spokane Spokesman-Review telegraphic trap shoot against the Cheney, Wash. team, according to advices received today by C. G. Matlock, secretary of the club. No notice had been received that the shoot was to have been held, the belief of the local shooters being that the tournament would open in two weeks. In case a good day comes later this week, Mr. Matlock said, the local gun men will go to the traps at Collins Park to shoot their match with Cheney. Next Sunday the first regular shoot will be held. Mr. Matlock has not been advised against what town the locals will compete.

Mrs. Brown Returns.
Mrs. D. C. Brown, of Alexander's department store, has returned from the Eastern markets where she purchased the new spring and summer models for the women's wear department of which she is head. Mrs. Brown states that two new materials, kvatine and twill cord, will be noticeable features of the new suits. Navy and sand are two popular colors. Short box coats, Elton jackets, and other models are shown, some having circular skirts instead of the popular straight skirt. For the coats, the wrap models are shown, as well as the sports coats in polo cloth, in gray, light and dark tan. Mrs. Brown noted that Copenhagen blue was popular for blouses as well as new shades, honey dew, tomato red and neptune green. For dresses mouffat effects are shown, and eyelid embroidery is a popular trimming.

CRITICISM WAS BASED ON ERRONEOUS REPORT

That an error was made by press correspondents at Salem in sending out the original story of the salary increase bill by the Umatilla delegation is shown by a letter from Roy W. Ritter, president of the state senate, today. Mr. Ritter takes exception to criticisms of the bill by the East Oregonian as hasty. The Associated Press report from Salem to the East Oregonian and also to the Portland Oregonian omitted the names of the assessor and county superintendent in the list of those to receive advanced

Dr. Temple Recovers.

Gas Man Takes Green House

Meeting to Be Held.
Athena is to have a Farm Bureau meeting tomorrow, says Fred Bennion county agent. Among matters to be discussed is a wage scale, pooling of gasoline and distillate, farm leases, demonstrations, boys' and girls' club work and wheat marketing. A large crowd is expected.

Decided Change in Weather.
The weather did an acrobatic turn last night, the temperature falling to the freezing point, 32, after a day of warm sunshine with the mercury at 69. Yesterday's weather was of such unusual warmth that it called forth scores of motorists. A heavy rain fell in the evening, however, and this, with snow early this morning, caused a precipitation of .50 of an inch. Today the maximum is 42 and the barometer registers 29.40.

Labor is Plentiful
Farm labor will probably be extremely plentiful this spring, in the opinion of local farmers. A report from Portland says that 4,500 idle men are seeking farm work. Sherman county recently fixed the following wage scale, which will probably affect the decision as to wages in this county: Single men, \$40 a month, with board and room; married men, \$60 to \$70 a month, house to be furnished; tractor operators, \$4 a day, board and room; cooks, \$20 a month.

Many Farmers Attend
Fruiting demonstrations in west end towns last week-end were well attended, says Fred Bennion, county agent. They were held at the M. C. Saragor orchard, Stanfield, Thursday; the F. P. Phipps orchard, Columbia, Friday, and the A. W. Ptam orchard in Hermiton Saturday. Professor C. L. Lusk, of O. A. C., spoke and explained fruiting methods. Orchards have been dotted and a record of pruning is being kept. The same people will prune the orchards during the next three years and trees will be checked to see what method is best to secure a large amount of fruit.
