THE SENSE OF INFERIORITY

A Starved Nervous System Takes the Snap Out of the Otherwise Strong and Capable

Imaginary unfitness, the peculiar nervous strain that causes some men to shrink so lamentably, is merely a condition of semi-starvation. If you doubt

let the reconstructive influence of Reolo drive it out of your head completely.

When the nerves have gone smash and the iron has been burned out of the blood, then is the time that the red-blooded fighter lords it all over his pale-faced rival. Reolo is a wonder. It gives you conscious strength. You feel an increased nerve force, control, no more bluff, no halting, no hesitation. With an improved appetite the nervous that were starved cease to cry out with pain, the red corpuscles in the blood increase enormously, there is a tinge of color to the skin and a sense of fitness from head to foot. Such is the marvelous capacity of the system to respond to the influence of Reolo. This wonderful reconstructive and strengthening combination so intensifies the activity of the vital processes that you approach any task with a vim that is fairly astonishing.

Ask any of the clerks at Thompson's Drug Store or any other leading drug store for a \$1.00 box of Reolo. Ask them about its wonderful effect upon a host of people they have sold it to.

TRIANGULAR DEBATING CONTEST TO BE HELD

(East Oregonian Special.)

ECHO, Feb. 15.—The Echo people are beginning to realize that some day Echo may be placed on the map in a larger type than it now is. With the Teal Irrigation Project adjacent to the city and now that 5000 acres of land lying between the Umatilla river and the Columbia river above the Furnish project, approximately near to Echo have been leased by J. T. Hoskins and sons, to Standard Oil interests who expect to start drilling for oil on the land as soon as the terms of the lease are stipulated and the papers drawn up. More than 20 years ago small quantities of oil have been reported to have been found near Arlington and it is also reported that the Standard Oil Co. is now drilling for oil on the north side of the river and the Atalla fields.

John Montgomery, prominent real estate dealer of Pendleton, was a visitor to Echo and the surrounding vicinity, Sunday.

A triangular debating contest will be held Friday evening, February 15, among the Echo, Pilot Rock, and Stanfield schools. Echo's affirmative team, Veda Wattenburger and Homer Saling, will meet Stanfield's negative Earl Saling and Alfred Conna, who debate here at Echo with Pilot Rock's affirmative team, and Stanfield's affirmative team will meet Pilot Rock's negative team at the same evening. The debate which was held between Echo and Pilot Rock February 4th resulted in a tie, the affirmative teams winning 4 points at both places while the debate between Stanfield and Hermiston last Friday evening resulted in a victory for Stanfield which gave them 7 points. It was thought at first that Pilot Rock and Echo would "scrub" off the tie, but the idea of a triangular debate was later decided upon. The debate between Echo's negative and Pilot Rock's affirmative will be held here at the M. E. church Friday evening.

MISSIONARIES OF AMERICANISM

CHICAGO, Feb. 15.—Thirty-two missionaries speaking twenty-seven different languages are working among the foreign-born of Chicago, Rev. G. K. Flack, secretary of the Chicago Tract Society, said today.

Rev. Flack said that the missionaries are not only trying to convert the foreign-born, but also to preach the gospel of Americanization to them.

"It is not enough for an immigrant to be a church member," he said, "he should also be an American citizen."

Funds are being collected for the work, he said. A million dollars is the goal.

Germs and Teeth

There is nothing spectacular about the process by which a tooth decays. The microscopic germ, while eating its way, so to speak, through the falls of the house that shelters the nerves, goes slowly; it works its way through the hard, outer, layers and into the small inner chambers before the victim knows it is present. It is in no hurry, but if left alone, it reaches its goal. Many physical ailments require quick action: not so the tooth. It may be months before a quick stab of pain warns the patient that the germ has reached the nerve. A rush to the dentist then convinces the victim that he has sacrificed a perfectly good molar on the altar of neglect. Care in time would have saved it.

Seven Cows for One

Just as an example of the time and money the LALLEY LIGHT will save you:

A milking machine operated by the power from the LALLEY will milk seven cows in the time it takes you to milk one by hand.

We could go right on down the line and show you how the LALLEY Plant is a money making plant, as well as a lighting plant.

For instance: It supplies power in plenty to pump water, heat the irons, run the washing machines, sewing machine, vacuum sweeper, cream separator, churn, fanning mill, grind stone, emery wheel, etc., etc.

So, if the old saying, "time is money" is true—if this old "saw" means anything, the LALLEY LIGHT means real dollars and cents in your pocket.

And we want to impress upon your mind the fact, that the LALLEY LIGHT does all this money-saving work better because it has been tested and perfected through ten years of actual owner use.

We want the opportunity to show you personally just how and why the LALLEY "Does More—Does it Better."

We know that if we could demonstrate to you these facts here never would be any doubt in your mind as to "Which Plant" Come in—make a point to
