If you are holding your 1920 crop of wheat or wool this is the only way you can avert a "double shot" of income in 1921. The setting up and keeping of books requires more work than the old way of receipts and disbursements and cannot be done within the last day of grace.

NATION'S INDUSTRIES FREED OF SPY SYSTEM

CHICAGO, Feb. 15.—(U. P.)—Spies are being squeezed out of the nation's industry. The elaborate intelligence systems which are maintained by employers as a "strike insurance" are being dismantled in the present readjustment period.

The method of placing operatives to work alongside of the employees of industrial plants was the product of the labor scarcity in boom days during the war. The reports furnished the employers of the state of mind of the employees enabled the former, in many cases, to prevent labor difficulties by remedying the conditions or eliminating the agitators.

Strikes are no longer feared by the manufacturers due to the abundance of labor, they say. Men now think many times before they throw down their tools, because they know there are large numbers jobless. Scrapping of the intelligence systems is caused by a plentiful labor market and because the employers can no longer afford to make large outlays to maintain the system.
