While the new gowns are less radical, buyers say they continue to be complicated and expensive. With the reappearance of dresses of a pre-war standard, color dominates all gowns.

PARIS SPRING AND SUMMER FASHION DISPLAY INDICATES A RETURN TO SANITY IN DRESS

PARIS, March 11.—(A. P.)—A return to conservatism in woman's dress is indicated in advance displays for spring and summer now being held in Paris.

The Paris dressmakers continue to show extreme effects in afternoon and evening wear, but the majority of the gowns reflect a return to sanity in dress.

The season is only half finished, but a general indication has already been given of the changes. One of the most noticeable innovations is the lengthening of skirts at least one inch.

Bunches of fruit and flowers are worn at the waist and some of the gowns have belts of roses around the waist.

While the new gowns are less radical, buyers say they continue to be complicated and expensive. With the reappearance of dresses of a pre-war standard, color dominates all gowns.

justifies them by pointing to the artistry involved in their creations and also to the fact that materials used were purchased at top prices.

For the eastern type of beauty the season offers much. There are draperies and turbans of all variety of color and long strings of beads of all the colors of the rainbow.

The season's effects have been built for the normally built woman and the extremely plump and extremely thin women will have some difficulty in choosing becoming gowns.

The corset has again been ignored. So serious and consistent has become the opinion in what was formerly fashion's basic principle, that corset manufacturers are contemplating an extensive campaign to bring the corset back into its proper place.

Feathers play a most important part in the new hats. Ostrich plumes in particular are being used on large hats. Hats for the most part are small and are worn crushed down on the head in many shapes.

Fruit is invading the realm of fashion. Bunches of fruit and flowers are worn at the waist and some of the gowns have belts of roses around the waist.

The prophecy of fuller skirts is slowly but surely coming true, according to buyers. Although it is not yet fully realized, the season's gowns are fully wider.

JAZZ MUSIC IS PLAYED ON JAPANESE FIDDLES

WASHINGTON, March 11.—(A. P.)—Jazz music in this country is being extracted from Japanese made fiddles. A report from Consul Hawley, at Naxoya, Japan, says a quarter of a million dollars worth of Japanese fiddles were brought by the United States in 1919, this country taking the great bulk of the product of this new industry, built up in Japan since the world war broke up Germany's business.

Hawley says, in 1888 using as a model "a foreign instrument brought to Naxoya as a curiosity." The enterprise had a total product of musical instruments in 1914 valued at \$24,419, but had spread out to three factories employing 1,180 people in 1919 when the output reached \$139,440 of which \$298,491 went in export, the United States taking 63 per cent. The first six months of 1920 saw the plants develop a business aggregating \$304,142.

themselves so firmly in foreign markets, and especially in the United States that they can not be displaced.

The key to the situation appears to be in Japanese labor costs and the consul says that wages run from 22 cents to \$1.28 a day in the Suzuki factories. Men workers get from 60 cents to 1.30; boys from 22 to 30 cents and women from 25 cents to 65 cents a day's work.
