NEW ARRIVALS HONORED.

Welcoming Rev. and Mrs. W. A. Greenman, who recently came to make their home in Pendleton where Rev. Greenman is pastor of the First Christian church, an informal reception was given last night in the reception rooms of the church.

In the receiving line were the honor guests, Mr. and Mrs. S. Reetz, Mrs. Frank Grealish, Mrs. Ida Olcott, and W. I. Gadwa. About 200 guests called during the evening.

For an enjoyable program, the following numbers were given: Address of welcome, Mr. Gadwa; response, Rev. John Beezer, pastor of the Methodist church; address by Rev. George L. Clark, pastor of the Presbyterian church; Rev. J. T. LaTooe, pastor of the Nazarene church, and Rev. Alfred Lockwood, pastor of the Church of the Redeemer, who spoke in behalf of the Pendleton Ministerial Association. Rev. and Mrs. Greenman each gave a short talk, and Rev. La Rose led in prayer.

Two very pleasing solos, "If You Were the Opening Rose," and "Margery Gray," were sung by Mrs. Lillian Rice, with piano accompaniment by Miss Pauline Rice. T. H. Rem-

bold sang "Out Where the West Begins." Additional musical numbers included selections by the United School band, and by McDonald's orchestra.

A St. Patrick's day motif was charmingly used in the decorations. Floor lamps cast a soft light upon a profusion of jonquils and ferns which gave a springtime effect. Punch and waters were served during the evening.

The success of the affair was due to the work of the various committees, which were under the general management of Mrs. Lester Boyd.

BACKACHE OF WOMEN

The back is often called the main-spring of a woman's life. What can she do, where can she go, so long as that deadly backache snags every particle of her strength and ambition? She cannot walk, she cannot stand, her household is a burden, or the long hours behind the counter, in the office or factory are crushing. She is miserable. The cause is many times some derangement of her system, and backache is a common symptom. Lydia E. Pinkham's Vegetable Compound is a reliable remedy for backache, as for more than forty years it has been relieving women of America from the ailments which often cause it.

A Clear Brain and healthy body are essential for success. Business men, teachers, students, housewives, and other workers say Hood's Sarsaparilla gives them appetite and strength, and makes their work seem easy. It overcomes that tired feeling.

DIAMOND MINE IS FOUND IN ARKANSAS

MURPHRESBORO, Ark., March 16. (A. P.)—The only diamond mine thus far discovered on the Western Hemisphere is located in Pike County, Ark., in which this hamlet is situated. The mine is two and a half miles south of here.

The diamonds are found in a "pipe" the crater of an extinct volcano which ages ago boiled up through the surface, and its terrific heat chilled by the waters of an inland sea, and left bits of carbon scattered through the peridotite which now fills the crater, to be pressed into diamonds by the contraction of the rock. The peridotite forms the original matrix of the diamond, and thus far the only diamonds found in the Western Hemisphere in their matrices are those of Pike county. Diamonds have been found in some twenty-five states, in Canada and South America, but always in river beds where, geologists surmise, they have been washed by the waters, or in places where it is presumed they have been deposited by glacial action.

The first Arkansas diamond was found in 1905 by John Huddleston, then owner of the farm on which the sixty-acre "pipe" was located by accident. Huddleston observed outcroppings of the gray-green rock, since called as peridotite and came to the conclusion that his hillside contained valuable mineral, perhaps copper. After picking around and without finding anything which looked to him like mineral, he picked up a crystal, and then one day showed it to some friends in Murphresboro. A little Rock jeweler pronounced it a diamond and made sure by verifications by jewel experts in New York.

The mining operations in Arkansas for several years at least, will be far different from those of the South African fields, although the formations are the same. In Africa deep shafts are sunk, the peridotite is brought to the surface and spread on drying for periods ranging from six to eighteen months. The rock has the peculiar quality of disintegrating when exposed to the air. In Arkansas, however, except for a few places, the peridotite already has disintegrated to a depth of about twenty feet, and mixed with vegetable matter formed a sticky clay, called "gumbo" locally. This over-burden of "gumbo" will be worked before blasting operations are started.

How Do You Feel When You Stoop?

Slow and sluggish movements, tired action, backache, rheumatic pains, stiff joints or sore muscles indicate that something in the human system is out of order. In most cases, these symptoms are the result of waste matter or poisonous acids being left in the blood by the failure of the kidneys to properly do their work of filtering and casting out impurities from the blood.

STOPPED HIS BACKACHE

"Last Tuesday, I tried Foley Kidney Pills, thinking I needed them as my back was hurting and aching all the time. I got the best relief I would ever get in the store while at work I could hardly raise my head as usual catch in my back. After taking just one bottle of Foley Kidney Pills, my backache was entirely gone and I felt good and strong. I think they are the greatest remedy for backache and irregularities of the bladder."—W. F. Tatum, E. F. D. L. Washington, Pa.

FOLEY KIDNEY PILLS have been used by young, middle-aged and old with complete satisfaction. You will find them different from all other remedies. They act quickly and surely and have given relief in cases of years' standing. If you have cause to suspect your kidneys are weak, disordered or inactive, you should act immediately.
