HIGHWAY BOARD SAYS START WORK AT COLD SPRINGS

Victory is Scored by Those Favoring Work on River Road Route to Holdman.

STATE TO MATCH \$35,000 FOR PILOT ROCK PROJECT

Under Ruling by Commission Cold Springs Work Will be Extended as Far as Possible.

Work on the Cold Springs road will start from Cold Springs landing if the county court carries out its expressed intention of complying with the recommendation of the state highway commission.

The state highway commission announced at 3:30 today the improvement of the Cold Springs road should start from Cold Springs along the most feasible and practical route to Holdman and as much further toward Pendleton as the money now available in the hands of the Umatilla county court, will grade and macadam.

The action of the commission is a victory for those who have been insistent that the road should be built from the river and through Holdman, rather than through south Cold Springs.

At the instance of farmers living closer to Pendleton an effort had been made by late work started from the Pendleton end. Among the leaders in this move were E. P. Marshall and D. H. Nelson.

The commission yesterday agreed to match \$35,000 of Umatilla county bond money to be used on the road west of Pilot Rock.

The Oregon unit of the organization has been in operation only a brief time, but the unit has been active during the recent session of the legislature and its efforts were chiefly instrumental in the defeat of five bills which touched on matters of public health.

CITY COUNCIL HOLDS ITS WEEKLY MEETING

The advisability of having a building code to which petitioners for building permits within the city would be required to conform in making plans for new structures was brought to the attention of the city council last night by Councilman Friesly.

"I think we should have a building code in addition to our present ordinance," Friesly suggested. "Other cities have them, and that would provide added protection to the city in the way of getting buildings put up in proper shape."

Mayor Hartman agreed with the councilman on the proposition in a general way. "There is no doubt we should take every precaution to protect the city, the public and the private owners of new buildings in every way we can," the mayor said.

The permit to build a new \$30,000 theater. The plans and specifications for the structure call for wooden stairways from the balcony. It was divulged, and the use of wood is said to be in violation of the city ordinance in this one respect.

To study sympathetically and systematically from the humanitarian and utilitarian standpoint such social problems as are the cause of effect of disease.

SCHOONER IS LAUNCHED. PORTLAND, April 7.—(U. P.)—The schooner "Undaunted," the last shipping board of the Ferris type, with wooden hull, launched in the United States, will take water at 3 p. m. today.
