# LEADING AUTHORITIES NOW SHOW JUST WHAT TANLAC REALLY IS

**Physiological Action of Principal Ingredients of Celebrated Medicine On the Human System Is Explained.**

**SUPREMACY CLAIMS WELL SUPPORTED**

**Many of the Medicinal Elements Have Been Known and Used Since Civilization First Began.**

Tanlac, the celebrated medicine which has been accomplishing such remarkable results throughout this country and Canada, is composed of the most beneficial roots and herbs known to science. The formula is purely ethical and complies with all National and State Pure Food and Drug Laws. Altogether, there are ten ingredients in Tanlac, each of which is of recognized therapeutic value.

Many of these ingredients have been individually known and used since civilization first began, and some of them have been used and prescribed by leading physicians everywhere, but until they were brought together in proper proportion and association, as in the Tanlac formula, humanity had not heretofore realized their full value and effect.

In referring to one of the more important ingredients of Tanlac, the Encyclopaedia Britannica says: "It has been the source of the most valuable tonic medicines that have ever been discovered." In referring to others of the general tonic drugs contained in Tanlac, the 12th Edition of Potter's Therapeutics, a standard medical text book, states that "They impart general tone and strength to the entire system, including all organs and tissues."

This same well-known authority, in describing the physiological action of still another of the ingredients of Tanlac, which is of value in treating what is commonly known as "a run-down condition," uses the following expression:
