

'BRAINS OF CHICAGO'S WORST GANG' HANGED

CHICAGO, April 16.—(U. P.)—Three men were hanged. Sam Carlinelli, "the brains of Chicago's worst gang," according to police, was carried to the scaffold unconscious. The gang leader lost his bravado as he was being brought from his cell and hanged

into unconsciousness from fear. The two others to hang, Sam Ferrara and Joseph Costanzo, were taken to the scaffold previous to Carlinelli. Although only heavy "stickup" men in the underworld, they held their heads high and maintained their composure until the trap was sprung. Carlinelli was hanged for the murder of Andrew Bowman, a crime for which two members of his gang had already been hanged and for which Ferrara and Costanzo are serving life sentences. Ferrara and Costanzo were hanged for the murder of Antonio Varchetto, a baker, in a holdup.

FISHING SEASON NOW OPEN

Why not start the season right and buy fishing tackle that will catch fish.

We have what you want.

None Too Sick to Vote

Everybody, entitled to a vote, cast it in the recent plebiscite in rich Upper Silesia, in which the Germans defeated the Poles. This picture shows a sick German being carried to the polls.

RUBBER COMPANY HEAD FINDS GERMANY ALERT

E. G. Work, president of the B. F. Goodrich Rubber Co., just recently returned from his annual inspection of the company's interests abroad, summarizing his observations in France and Germany, said:

"Industrially, Germany makes a better appearance than I noticed on my visit a year ago. Since then factory conditions have materially improved. There appears sufficient food, though not an abundance, and the spirit of the people has changed for the better. The meat restriction was removed November 1, and that commodity seems plentifully now, although prices are high.

"Labor conditions are very good. I noticed one German concern offering for sale coal which had been delivered to France by Germany. Apparently France is not in position to make immediate use of the supply delivered. Coal costs the Germans 180 marks a ton premium.

"From the social standpoint France has improved but business is bad. Their motor industry has been hurt. With gasoline at 90 cents a gallon, economy can naturally be expected. During the last two months there have been distinctive signs for better conditions in France. Paris appears optimistic and bankers see decided signs of improvement."

FARMERS SHOULD ORGANIZE

WASHINGTON, April 15.—(A. P.)—Farmers should build up an organization, capable of presenting facts to congress on matters affecting agriculture, Secretary Wallace declared today before the conference of the American farm federation bureau.

He "deplored" the complaint that appropriations for agriculture are in the nature of subsidizing a class since they are for the benefit of the farmers. Such appropriations are actually more for the benefit of the consumers than for the farmers, he said.

Chairman McFadden of the public banking and currency committee today announced that examination of the financial support of farm organizations, begun in the last session, would be continued.

The executive committees of the National Milk Producers' association and of the National Grange met today in preparation for the meeting tomorrow of a number of farm organizations which will endeavor to agree on a legislative programme.

The municipal council of Paris has decided to place a memorial stone at each and every place where a "Bertha" bomb shell fell.

John S. Williams (above), wealthy plantation owner of Covington, Ga., has been found guilty of the murder of negro peons and sentenced to life imprisonment. Mrs. Williams (below) broke down at the trial and sobbed aloud when the verdict was returned, but Williams was unmoved.

STEAM FROM RADIATOR IS GOOD VULCANIZER

Every automobile carries an excellent steam vulcanizer, says the B. F. Goodrich Rubber Co.

This may be surprising news to many motorists who thought that they were on very intimate terms with their machines but it is so, nevertheless.

"The radiator when full of hot, steaming water is a very satisfactory vulcanizer for inner tubes, and has been used to splendid advantage by ingenious motorists miles away from anywhere with a tube needing patching.

A little vulcanizing cement is smeared on the rubber patch and around the hole in the tube and then the two are put together, placed patch downward on the radiator and held firmly with the pressure of the hand until the rubber is cooked into a solid mass.

If no vulcanizing cement is at hand a little tube rubber dissolved in gasoline may be used as a substitute.

BREAK EVEN

LOS ANGELES, April 15.—(A. P.)—Los Angeles defeated Vernon yesterday 5 to 3, evening the series, each team having captured two games. Griggs made the winning run in the third inning, coming home from third on Crawford's sacrifice fly.

With a Wrench and a Screw Driver

It is wonderful how a powerful electric plant like the LALLEY—a plant that does so many things and does them so well—can be so simple and so accessible.

When you consider that the LALLEY LIGHT and Home Electric Power Plant has only three moving parts; when you consider that this great piece of machinery can be assembled and dissembled in a very few minutes, with only a screw driver and a wrench to do the work, it is even more remarkable.

The LALLEY is the most simple mechanism of its kind made.

—This is why the LALLEY seldom gets out of order.
—This is why it is so inexpensive to maintain—so easy to operate.

The simplicity of the LALLEY is just one of its unusual features. It has so many good points—there are so many things about its splendid construction, that you must see it in actual operation to know it, and better understand it.

Come in and let us go over the plant from top to bottom—inside and out. If it's not convenient for you to do so just now, drop us a card asking for the LALLEY Book. It will give you many valuable pointers on the saving of time, work and money.

BE SURE—See the LALLEY FIRST
