STUDENT MANAGERS AT HARVARD MAKE LOWER GRADES THAN PLAYERS

Report Shows That Ratings of Athletes Are About Normal; Managerial Men Show Slump

CAMBRIDGE, Mass., April 21.—Sports at Harvard University exact more 'fo' from team managers and their assistants than from the players themselves and have a more serious effect on their scholastic standing, a special study of the faculty of arts and sciences reported to President Lowell today.

Its report, which was made after the most thorough study of athletic conditions ever undertaken at Harvard, said that the players on athletic teams had a fairly good average record in scholarship and attendance, but that the team managers and candidates for managerships not only have to do more work than the players, but had a much lower scholarship standard and cut their classes more often.

The committee was appointed to investigate the question "whether the present methods of conducting certain athletic sports made unreasonable demands upon the time of the students."

Its principal findings were as follows: Players on major teams at Harvard were only slightly below the average in scholarship. While they obtained on the average only half as many A's as men not taking part in athletics, they had nearly as many B's, only slightly more D's and about the same proportion of E's.

"In 1919-20," said the report, "the managers obtained no A's, had only about one-third the proportion of B's obtained by non-participants, had nearly twice the proportion of D's and almost three times the proportion of E's."

"The scholarship of managers and candidates for managerships was strikingly inferior to that both of players and of students not participating in the major sports."

While the average non-athletic upper-class men had thirty unexcused cuts a year and the average player thirty-two, the average manager had forty-two.

Expects to Lift Polo Cup

UNIVERSITY WOULD WELCOME VOLUNTEER GRADUATE MANAGER

McLane, Present Incumbent Has Two Jobs; He Resigns but Council Never Accepts.

ENGINEER, Ore., April 21.—(A. P.)—Any applicant for the position of graduate manager of the University of Oregon will be received with open arms by Marion McClain, who holds the position at present, and also by the athletic council.

McClain has tried to resign a dozen times but the usual reply of the council is to adjourn immediately. McClain is also manager of the university's co-operative campus store—a part-time job in itself—and says he cannot do justice to both positions.

As graduate manager, McClain directs the business end of all Oregon athletic activities.

SEATTLE, April 21.—(A. P.)—Fifteen thousand fans saw the Seattle Rainiers go down in defeat before the Sacramento in the opening game of the baseball season here today, when the southerners chalked up a score of 7 to 4. Seattle scored three runs in a ninth inning rally which cut down the Sacramento lead materially. Niehaus pitched tight ball and held Seattle to scattered hits. Sacramento took 14 hits off Schorr and Geary. The game was opened with the usual parade and other ceremonies, with Mayor Hugh M. Caldwell pitching the first ball.

SAN FRANCISCO, April 21.—(A. P.)—The first arrest here for alleged violation of state gambling laws in connection with baseball since the season opened was made at the baseball park yesterday. According to police, Charles Logan, a laborer, placed a bet on the game with Detective Sergeant Frank McConnell. McConnell made the arrest.

AMERICA FORCES QUARANTINE.

HAMBURG, April 21.—(A. P.)—America's enforcement of stricter quarantine regulations to prevent typhoid-infested emigrants from carrying typhoid into the ports of the United States has caused German shipping companies, operating from this port in connection with American lines, to use greater vigilance in the inspection and delousing of passengers.

The facilities are so good here for handling passengers and the disinfecting plants are so large and modern that German officials have found little difficulty in meeting the suggestions of American health officers.

The Hamburg-American line, which is cooperating with the United American lines, has had model emigrant halls since 1907 which are isolated in a section of the city across the Elbe. Arriving emigrants are first put in what is called the "unclean" section.

After the emigrants are examined and found to be healthy they are bathed, their clothing is disinfected and deloused, and they are then transferred to the "clean" section. Here they are examined twice daily by physicians until they sail to make sure that they carry no disease upon the ships.

All emigrants who are ill are isolated in hospitals and persons who traveled with the sick passengers are put into observation stations until it is certain they have no communicable diseases.

ABLE TO DO HER WORK

After Long Suffering Mrs. Siefert Was Restored to Health by Lydia E. Pinkham's Vegetable Compound

Pottsville, Pa.—"I suffered with female trouble for four or five years and was very irregular. I was not fit to do my work at times and took medicine from a doctor and got no benefit. I saw Lydia E. Pinkham's Vegetable Compound advertised in the newspapers and took it and got all right. I gained twenty pounds or more and am now able to do my work. I recommend the Vegetable Compound to my friends and you may use these facts as a testimonial."—Mrs. SALLIE SIEFERT, 313 W. Fourth Street, Pottsville, Pa.

The everyday life of many housewives is a continual struggle with weakness and pain. There is nothing more wearing than the ceaseless round of household duties and they become doubly hard when some female trouble makes every bone and muscle ache, and nerves all on edge.

If you are one of these women do not suffer for four or five years as Mrs. Siefert did, but profit by her experience and be restored to health by Lydia E. Pinkham's Vegetable Compound.

GIRLS GO TO COLLEGE

HOLYOKE, Mass., April 21.—(A. P.)—Professional men, despite their proverbial niggardly salaries, predominate in sending their daughters to college.

Figures made public today from a census conducted by Mount Holyoke College show that although slightly more than three percent of the entire male population of the country are professional men, yet thirty-three and eight-tenths percent of the students there registered their fathers as professional men.

While the professional men are most interested in sending their daughters to college, the farmers are least interested, the census showed. Thirty-six per cent of the men in the country are engaged in agriculture, but only eight percent of the girls in college come from the farms.

Next to the professional men, the tradesmen are most interested in educating their daughters. Ten percent of the male population are in trades, yet twenty-four per cent of the Mount Holyoke students have tradesmen fathers.

Some FACTS About FORD

THE UNIVERSAL CAR

Here are authentic figures from the Ford factory at Detroit. They show you just how many Ford cars and trucks have been built each month since January 1, 1921 and how many have been sold to retail customers, in the United States.

Month	Produced	Retail Customers
JANUARY	29,883	57,298
FEBRUARY	35,305	63,693
MARCH	61,886	87,221

Total Production 127,074 Total Retail Sales 208,212 showing that actual sales for the first three months of 1921 exceeded production by 80,958 Ford cars and trucks!

April production already speefy 107,719 additional cars and trucks and the estimated April output of the factory and assembly plants combined calls for only 90,000!

These facts clearly show that the demand for Ford products is growing much faster than manufacturing facilities to produce and were it not for the dealers' limited stocks, which are now being rapidly depleted, many more customers would have been compelled to wait for their cars. It will be only a matter of weeks, therefore, until a big surplus of orders will prevent anything like prompt deliveries.

If you would be sure of having your Ford car or truck when you want it, you should place your order now. Don't delay, phone us or drop us a card.
