NEWS OF FARM AND RANGE

HEAVY FLEECES ARE CLIPPED IN PLANTS OF BIG SHEEPMEN

Everything About Game Good This Year Except Prices Received or in Prospect.

Everything about the sheep business this year is good except the prices that are being received or are in prospect for the wool and mutton from which the sheepmen receive the money that enables them to conduct their business. This is according to Dan Smythe, member of the firm of Smythe Brothers whose holdings of both sheep and range are considerable.

Shearing is in full swing throughout this section of the country. The shearers will be done with about 4500 of the Umatilla Sheep Company's bands by Sunday evening. The work is being done at Coomb's Canyon. Activities are in full blast at the shearing plant of Smythe Bros., six miles south of Arlington where the wool is being lifted from the backs of 20,000 head of the wools.

"Our wool clip this year is the best we have ever grown," Mr. Smythe said today. "It is cleaner, freer from grease, and there is a long, fine staple. The excellent quality is due to the very favorable season we have had on the range during last fall and winter, and also during this spring."

"The sheep we have been shearing at Arlington are averaging 15 pounds. The lamb crop is also encouraging both as to the number of lambs and on condition. Our average percentage for all our sheep will run between 110 and 115 per cent, and in some outfits, the increase ran to 125 per cent."

The sheep will be taken to the summer ranges about May 15, and during the latter part of June and the first part of July the black-faced lambs will be shipped to Chicago.

Bloom Very Heavy.
The bloom on the fruit trees in the Hermiston section is unusually heavy this year, says Fred Bennion, county agent. There are but few cherries and peaches because of the injury caused by the severe weather a year ago. The apple bloom is very heavy and the crop will probably be correspondingly heavy on many of the trees because of the lack of vitality, from the cold weather a year ago.

May Change Location.
The new site for the Hermiston experiment station is favored by J. T. Jardine, state director of experiment stations, who visited Hermiston recently. The new location is on the McKay creek project and would increase the size of the station from 40 to 160 acres. Mr. Jardine points out, during his visit, that the activities of the station should in future be confined not so much toward seeking new varieties of alfalfa and other plant growths but to demonstrations of the best cultivation of crops in the irrigated section of the Columbia River Basin.

Raising Chickens.
Mrs. William Rhodes, of Columbia, who recently moved with her husband to the blessing place is going into the chicken business on quite a large scale and is undertaking the work in a scientific way. She has a cement floor brooder house which is heated and lighted in such a manner that the baby chicks have perfect care and comfort. When one batch of chickens are large enough they are moved to another more commodious building to make room for more younger ones in the brooder. She has the full blooded strain of White Pouter Leghorns and is preparing to raise in the neighborhood of five hundred and by the methods she uses and the thorough care she takes of the chicks, it seems that she will be entirely successful.

Formal Dress

The style shown in this dress for formal occasions gives the long graceful lines obtained with heavily-beaded fabric. This model in black satin with jet beads or white georgette with white beads in all-over scroll pattern is particularly effective.

CHURCHES

Announcements for this department must be submitted to the East Oregonian not later than Friday evening in order to be assured of publication on Saturday.

Get a Farm from the CANADIAN PACIFIC RAILWAY

THE Canadian Pacific Railway offers you a great opportunity to own a farm home. Much of these farms have been paid for (underwritten) with the first crop. Out of the last big block of reserve farm lands you can buy your farm under a plan that lets you pay for it in small amounts that are reasonable in the history of farm investments. The country is ideal for mixed farming and grain growing. Later, the same lands can be bought all from private owners—prices will be higher. Never again in North America will farm lands be offered at prices so low.

Your Last Big Opportunity
Until this land is disposed of the Canadian Pacific Railway offers you the most wonderful opportunity in the world to own a farm, either in Idaho, Montana, or in Western Canada. It offers you a chance to buy your farm lands in the rich open prairie and fertile pastures of the Yellowstone and Snake River valleys of Idaho, Montana and Saskatchewan or in beautiful British Columbia for an average of about \$10.00 an acre.

Twenty Years to Pay—If You Wish
The Canadian Pacific offers you this land under a plan that lets you pay for it in small amounts that are reasonable in the history of farm investments. The country is ideal for mixed farming and grain growing. Later, the same lands can be bought all from private owners—prices will be higher. Never again in North America will farm lands be offered at prices so low.

No Sale Without Investigation
The Canadian Pacific will not sell you a farm until you have investigated it. You must be satisfied with the land before you buy. Investigation is provided and made free. Don't delay your investigation. This announcement calls attention to the last great block of Canadian Pacific Reserve Farm Lands.

Special Rates for Home Seekers and Full Information
Special railway rates for home seekers make it possible for you to visit the land and see for yourself. Send now for free literature. Full particulars answering all questions and telling you how to get the land, the price, the terms, the conditions, etc. Do not delay. Write TODAY.
