NEWS OF FARM AND RANGE

IDAHO POULTRY AND DAIRYMEN VOTE TO JOIN OREGON CLUBS

Relations of Two Sister States to be Closer as Result of Action by Farm Bureau.

Poultry and dairy interests in Oregon and Idaho were drawn more closely together at the meeting of the Idaho State Farm Bureau at Boise held last week, according to Bruce Lampton, state manager of the Washington Cooperative Wheat Growers' association who was in Pendleton yesterday on his way home.

Weeds Few This Year.—There are but few weeds in Umatilla county this year. The grain has grown so well and the stand is so high that weeds are not thick. Small weed growth is one of the advantages gained from early blowing.

Big Crop Expected.—Milton expects a big strawberry crop this year. The plants are looking fine and there is a large acreage. It is thought that the berries will be ready to pick by June 1. All danger of frost is past and the crop prospects are exceptionally favorable.

CHIEF JUSTICE WHITE PASSES AWAY TODAY FOLLOWING OPERATION

For Years He Conducted Game Fight Against Physical Disability, Staying by His Work.

WASHINGTON, May 19.—(Herbert W. Walker, U. P. Staff Correspondent)—Chief Justice Edward Douglas White died at 2 a. m., unaroused from the coma into which he sank late Tuesday after an operation performed the preceding Friday. Mrs. White and two nieces, Anne Montgomery and Mary Broussard, were at his bedside. A Catholic priest was present also.

Justice White was 76 years of age. For more than 27 years he was on the supreme court bench. He had been chief justice since 1910.

Eyesight and Hearing Failed.
Only three weeks ago White delivered a vigorous partial dissent from the opinion of his colleagues in the government's prosecution of Senator Truman H. Newberry of Michigan.

For years White had conducted a game fight against physical disability, staying by the work he loved when a less determined man would have retired.

White was 76 and his years told on his eyes and ears. In reading the numbers of cases he called, he bent close to the page and often had to appeal to Justice McKenna or Holmes who sat beside him on the bench.

Served As Louisiana Senator.
White was elected to the Louisiana state senate in 1874, and appointed associate justice of the state supreme court four years later. In 1891 he took his seat in the United States senate, but he never finished his six-year term. In 1894 President Cleveland appointed him to the United States supreme court.

NOLIN CITIZENS VISIT IN 'ROUND-UP' CITY

(East Oregonian Special.)
NOLIN, May 19.—Among the Pendleton business visitors today were Earl Massey and Chas. Dallas.

H. S. Perrin drove some cattle through Nolin this morning on their way to the summer range at McKay creek.

A surprise party will be given Friday night on Harley Weltzine, who lives four miles north of Nolin. Young Weltzine graduated from the eighth grade this spring.

James Beard, Nolin merchant, visited in the west end of the county yesterday.

HARVEY ATTENDS COUNCIL.

WASHINGTON, May 19.—(U. P.)—Colonel George Harvey, the American ambassador to London, will attend a meeting of the supreme council which is to take up the Silesian boundary dispute, was definitely stated at the state department.

UNIVERSITY HIGH NOW HAS MODEL BUILDING

UNIVERSITY OF OREGON, Eugene, May 19.—The University of Oregon high school is now housed in its new building, which will be formally dedicated May 27 and which has already created much interest in Oregon communities that are planning school buildings in the future.

The building was constructed for a maximum of 200 students at an approximate cost of \$80,000. It is a brick structure of the one-story type becoming so popular in mild climates in the past few years.

The building contains six class rooms, three being sufficiently large to be used as roll rooms, an auditorium, two laboratories, a typewriting booth, a library, an art studio, outdoor gymnasium, boys and girls shower and dressing rooms, lavatory rooms, teachers' office, principal's office, supply rooms and play porch.

The rooms are arranged on either side of a long hall running the length of the building. All rooms open on this hall with the exception of the art studio, gymnasium and dressing rooms. This feature makes the supervision of the halls a relatively simple matter. At the middle of the building this hall is traversed by a short hall giving the building a front and rear entrance.

Among the most convenient features of the building is the roomy auditorium with a seating capacity of about 225. The auditorium is equipped at one end with a stage suitable for the production of plays and operettas and at the other with a standard fireproof moving picture booth. A moving picture machine and a combination bal-oopticon will be used for the program of visual instruction which Carl R. Douglas, Educational Director of the School, and the teaching staff, have been developing. Dramatics, the production of short original plays, and other types of oral English, have been made a feature of the English work of the school and the stage and auditorium will furnish the desirable laboratory for this work.

One is forced to ask "why not?" when shown the teachers' office plan for the use of women teachers when not engaged in the classroom. Adjoining this room is a kitchenette

equipped with gas plate, sink and cupboard.

The library is light, spacious and cheerful. Three long oak study tables are surrounded with chairs, most of which are occupied throughout the day. Shelving is placed on three sides to accommodate approximately 3,500 volumes.

A feature worthy of interest to small high schools offering courses in typewriting is the commercial room. Part of this room is set off by a glass partition for a seating capacity of ten to twelve operators. Here small groups of typewriting students may practice under the incidental supervision of the instructor who will hold classes in other commercial subjects in the main portion of the room. This plan is in use in Ontario, (Oregon), and one or two other smaller cities and works as well in practice as in theory.

A large outdoor gymnasium with circus seats along one side is connected with the main building by a covered porch. Here regular instruction in physical education may be given the year through and basketball and indoor tennis may be scheduled. In the main building are large shower and dressing rooms for boys and girls.

One of the features most likely to seem unusual in the art studio. The study is a large room equipped with cabinets, work tables, benches, chairs and slates, and with apparatus for pottery, weaving, drawing and kindred arts.

The classrooms have blackboard placed on three sides, there being no board on the side from which the light comes.

Two laboratories are placed near the middle of the building—one for physical and one for biological science. These are side by side and are connected by doors. Cabinets are built in on all sides except in front where blackboard space for instruction is provided. The demonstration and laboratory tables were also built, effecting an economy at no expense of efficiency.

The lavatory rooms are on the main floor, there being no basement. That for the boys is located next to the office of the principal and that for the girls next to the office for the lady teachers.

The long wide hall is a pleasing feature. It is easy to supervise and facilitates rapid passing to and from any part of the building to any other.
