Nation's Head Expressed Hope That Future Bring Less Need For Further Sacrifices.

NEW YORK, MEY 39.-(A.P.)message to the American Legion; made public last night, expressed hope that the future would bring less need for further national socrafices. The meaage follows:

"Americans have never been much given to the establishment of holidays and fete days. Pethapa our nutional life has been so short, and entirely within so matter of fact and practical a period of the world's history that we have been little moved by the senti-ments that such occasions inspire. Yet, I think no nation has ever established a national day of consectation that represented a more lofty and ennohi-ing sentiment than does our national nemorial day. To its observance we have brought the full measure of sincere reverence and gratifude that a great people is ever to entertain for

14:20 those who have made the great sacrifice in its behalf. Memorial day marks our recognition

of those who, from our national be-ginnings, have deserved the most that the nation could give of gratitude and appreciation. It reminds that in every generation, from Lexington to the Argonne, our valorous sons have well deserved the highest tribute that a na-tion, fortified, defended, preserved could give to them. Whenever the demand has come, and wherever it may have called the sons of our proud hand, it has always been answered. Though we have never been a militant or war-loving people, there has been no time when Americans did not rise to that foll measure of the requirement which national honor and national safety imposed on them. When national safety was the cause, the renotise was always insistent and devis When civilization summoned and ive: or some were called to the other seas and solis, we saw the same prompt-ness, the same zeal, the same devotion,

"On this memorial day of 1921 we stand, I trust, very close to chieved, to safety insured. May it be our common aim and purpose that in the coming years, our nation's aim and policy shall be directed to make certain that there shall be the least need for further sacrifices, greatest guarantees of the stability, the permanence and the inspiring character of those institutions of liberty to which ir nation has been dedicated
