TODAY'S WHEAT PRICE SHOWS SLIGHT INCREASE

A gain of three and one-half cents a bushel over yesterday was recorded today in the price of wheat, the market closing at \$1.40 3/4. Following are the quotations received by Overbeck & Cooke, local brokers:

Wheat.				
	Open.	High.	Low.	Close
July	1.37 1/2	1.41 1/4	1.36	1.40 3/4
Corn.				
July	.67 1/2	.67 1/2	.66	.67
Sept.	.69	.69 1/4	.67 1/2	.68 1/2

July	.42 1/2	.42 1/2	.41 1/2	.42
Sept.	.43 1/2	.44	.42	.43 1/2

July	1.29 1/2		1.31 1/2	
Sept.	1.12 1/2		1.15 1/2	

Wheat—Early in the day the buying power showed indications of diminishing but about midday session the market developed pronounced strength stipulated in part by the inside report indicating a loss of 47,000,000 bushels for the states of Texas, Oklahoma, Kansas, Nebraska, Missouri and Illinois. Another significant item in his analysis of the situation was the prediction that the carry over of wheat this year will be one of the smallest on record. If this should prove true, it is almost a certainty that available supply for delivery on July contracts will be very meagre. Exporters were again in the market and estimates placed the sales for the day as high as 2,500,000 bushels. All cash markets were strong with Chicago premiums about two to three cents lower than yesterday. Minneapolis and Kansas City reported the most urgent milling demand seen for many months. Country offerings were limited with spot offerings meeting such ready demand at big premiums over July and the cash location gaining strength daily, we feel quite convinced the future will continue to show strength.

WOOL MEN SHIP CLIPS TO BOSTON BY WAY OF PORTLAND AT SAVING

Sixty Cents the Hundredweight Less Cost by Water; Wool Takes on Weight in Transit.

Advantage of the big saving in freight rates that can be effected by shipping by water from Portland is being taken this year by the Cunningham Sheep Co. who just recently loaded out a number of cars of wool. This shipment was carried by rail to Portland, and from there it will go by water to the eastern market.

The saving in money on the cheaper rates will amount to \$1,500 on the whole clip of the company. The rail rate from Pendleton to Boston is \$3.85 the hundredweight on wool, and from Pendleton to Portland by rail and thence to Boston by water is \$2.25, a saving of 60 cents when the latter plan is followed.

Another little item that the canny sheepman is always taking into account is whether his wool will gain or lose in weight while it is in storage. This question is of particular interest because if conditions are such that the wool will dry out rapidly, the loss in weight will be sufficient to cost him a lot of money. By shipping over the water route, the wool is in transit about the same length of time as if it were shipped by rail, and it gains a little in weight.

The recent rains have been very beneficial in insuring the proper filling of the grain that is now headed out. Over an inch of rain fell during the past two weeks, according to M. D. Orange, who has charge of the government weather bureau at Pilot Rock. In some parts weeds are reported but these cases are few and isolated. J. W. Eiler, prominent land owner and grain raiser, says that he has never seen nicer prospects for a crop in this part of the county. T. Gilliland, another prominent grower, reports that he is looking forward to a good yield. Herbert Boylen Sr., while not directly engaged in the raising of grain is a close observer of crop conditions, says there is every indication of a banner yield this season and a return to "normalcy" after the marketing of the crops.
