## LIVELY NEW BALLS MAY CAUSE BOSSES TO CHANGE RULES

### Use of Resin by Pitchers to Enable Them to Grip Ball May be Permitted Soon.

NEW YORK, June 4.—(Henry L. Farrell, U. P. Staff Correspondent.)—Admitting that a lively ball is in use, even if not intentionally, bosses of the national pastime are now looking for measures to curb excessive hitting.

If the American League will concur, the National League is willing to come to the help of hand-capped pitchers by permitting the use of resin on finger tips.

Veteran pitchers, such as Fred Toney and Slim Sallee, have maintained the harrangue of resin an unwarranted measure in as far as its use to dry damp fingers and get a better grip on the balls is concerned.

Ben Johnson, president of the American League, recently admitted the new ball is lively, but he quoted the statement of the manufacturers that it was the result of the use of a better grade of wood, that gave the sphere more resiliency, rather than an intentional desire to make it go farther.

Players have maintained all along that the ball was livelier, harder to pitch and more difficult to handle.

Bill Killifer, star catcher of the Chicago Cubs, said recently there was no doubt the new balls had more life.

"One of the new balls hit squarely will either ride out of the yard or line down the infield too hot to handle," he said. "I've seen balls driven through the infield too fast to be seen."

"Increase in hitting is not due entirely to the ban on freak deliveries or the new pitching rules. Pitchers who never used and kind of tricks are being hit just as hard as the ones who used to use emery, resin and other prohibited substances.

"As the ball is harder to handle, so it is harder to pitch. It seems to take more effort to get a fast one across and more stuff to get a hop on it."

### 7 HOMEERS IN ONE GAME

PHILADELPHIA, June 4.—(A. P.)—Philadelphia established a season record and equaled the major league record by registering seven home runs in its 12 to 9 victory over Detroit. C. Walker drove in six runs with his circuit drive.

## MAY FORM WINTER BALL LEAGUE IN CALIFORNIA

LOS ANGELES, Cal., June 4.—(A. P.)—A winter baseball league, composed of two teams in San Francisco and two in Los Angeles may be formed at the close of the present Pacific Coast League season, it was announced here yesterday by George Putnam, secretary of the San Francisco club of the Pacific Coast League.

Putnam is said to have discussed the plan with President John F. Powers and Edward Maier of the Los Angeles and Vernon clubs respectively, and they are reported to be favorably disposed to the new organization.

The second San Francisco club, it is said, probably would be called the Mission team. A 10-week schedule beginning October 5, providing for seven games in each series has been tentatively arranged. Putnam said he intended to go East soon to learn whether major league stars could be induced to play in the winter league.

## SPANIARDS PROTEST PLAN TO SELL COMMISSIONS

MADRID, June 4.—(A. P.)—The reform of the system of recruiting the Spanish army, which is henceforth in principle to be formed of the entire youth of the nation, thus doing away with the drawing of lots, is greeted with general enthusiasm.

One clause, however, of the bill drafted by Viscount Eza has brought sharp criticism in the press. This refers to the selection of reserve officers, who are to be chosen from among the troops not according to their ability or skill, but because their parents are able to pay a premium, which will be calculated on their wealth, those possessing the most money being called upon to pay more.

The newspaper El Sol protesting, asks: "Is it the intention to make all citizens go into barracks and to impose on them the leadership of a caste based on money power? This appears to be abominable.

"What is being done thereby is to levy a tax on the vanity of those innumerable youths without a profession who aspire to wind in the wearing of a uniform a kind of reason for their existence. It is dangerous to speculate with things referring to the army, despising the really intelligent class and forming a caste of wealthy."

illiterates who are no more than an embarrassment and who actually create irreparable injury to the moral homogeneity of the army."
