#### Hogs Decline, Cattle And Sheep Steady

(From the Oregon Journal.)  
Hogs were lower for tops, cattle were steady and there was apparently a steady tone in the sheep alloys with a big run there.  
Enormous supplies of sheep have been marketed at North Portland recently and at this time the market and price retains a steady tone with no change shown for Thursday morning. It begins to look, however, as if the market was getting about all it could take care of and any long continued big run would likely cause demoralization.

Market for cattle ruled steady at

North Portland for the Thursday morning trade. Receipts were limited and there was practically no change in prices.  
Frank W. Burke, a prominent local livestock man, just returned from the East, says that Portland is today the best cattle market in the United States and quality considered, was paying the extreme prices.

Killers here appeared more determined to wreck the hog industry of the Pacific Northwest, for a further cut in price was made during the Thursday morning trade at North Portland. There was a lowering of top prices by at least a quarter with a few extreme sales beyond this at \$9.25.

commerce commission within the next 10 days asking for restoration of fruit rates in force before the 23 per cent rise of August, 1920, according to W. J. Urquhart, secretary of the Yakima Traffic and Credit association. Wenatchee and Spokane districts support this move, he stated. A telegram from H. A. Adams, vice-president of the Union Pacific, to P. M. West, agent of that line, here states that the new rate of \$1.50 per hundred to eastern territory includes storage in transit privileges. This will mean a reduction of \$2 per car from the present applicable rate.

Wheat Price Bulges But Is Lost At Close  
Chicago, June 10.—(A. P.)—Continued buying shot wheat prices upward 3 1/2¢ yesterday but the effect was largely transient. Demand was due for the most part to reports of a possible big railroad strike July 1 and to the government crop report that the winter wheat yield would be curtailed 51,000,000 bushels. The market closed unsettled 1-1/2¢ to 2¢ net higher with July \$1.34 1/2 to 1.35 and September 1.17 1/2 to 1.17 1/2. Corn lost 5-8¢ to 1¢ and oats 1-2¢ to 3/4¢ to 7-8¢.

Bullish aspects of the government report brought about a decided upturn when the wheat market opened. Rushes to buy were held in check by new breaks in foreign exchange and because of weakness in the stock market. Then gossip circulated that railway employes were discussing a general tieup and that the consequence might be great difficulty in the delivery of wheat on contracts, especially during July 1. Shorts took alarm, and did not stop bidding until the market for July had gone to \$1.49 1/2, a level within one cent of the topmost price this season. Subsequent downturns were apparently due to profit-taking by holders and to advices from Springfield that proposed anti-trust legislation was again a factor.

Railroad strike predictions were bearish as to corn, although bullish as to wheat, the reason being that terminal stocks of corn are heavy, whereas the wheat supply is light. Oats were depressed by the government report. Provisions averaged lower in line with hogs.

#### Slowness Characterizes Day On Stock Market

NEW YORK, June 10.—(A. P.)—Liquidation and professional pressure hit stock quotations yesterday. Leaders dropped one to three points and many speculative issues forfeited two to seven points.  
In many instances notably steel, equipments, fertilizers and chemicals, minimum prices were the year's lowest. United States Steel, at 76 1/2, came within a small fraction of its low level in almost two years. Sales 800,000 shares.  
The reversal progressed to the heavy close. Primary factors included increased demoralization in foreign exchange and Mexico's proposed heavy export tax on oils.  
Continued contraction of operations in the steel and motor industries, additional price-cutting and more dividend omissions provided the aggressive shorts with fresh ammunition.  
Money on call was easy opening at 4 1/2 per cent, the minimum initial rate of the last fortnight, and easing to 5 per cent in the last hour. In the open market, free offerings were made at as low as 5 per cent. Time funds were closely held except for prime collateral.  
Exchange on London broke to \$3.55

or 4 1/2 cents below yesterday's final quotations and slightly more than 20 cents below the high of three weeks ago. Continental remittances suffered extreme losses of six to 35 points but rallied sharply with sterling before the close.  
Interest in the bond market centered mainly in the state of New York gold bond offering, for which many large bids were reported from banking syndicates. Mexican issues eased as a result of the break in oils and European flotations were irregular. Most domestic bonds reflected slighter the heaviness of stocks. Total sales, par value \$16,450,000.

#### No Revival In Business Apparent

WASHINGTON, June 10.—(A. P.)—World economic conditions during May pointed to no immediate general business revival, according to the monthly summary from its foreign representatives issued last night by the bureau of foreign and domestic commerce.  
Considerable improvement financially was noted in Europe, but trade and shipping were dull with marked industrial deficiencies apparent in some countries. In the Far East improvement was reported slight and in South America the situation was declared practically unchanged with a less confident tone to future prospects.  
Money is easier in Great Britain. The coal strike has caused a general stagnation of trade and industry, the London report declared.  
The industrial situation probably has never been worse, the report continued, with over 2,000,000 persons idle.  
France appears satisfied with the success of the \$100,000,000 loan floated in the United States and feels it will permit payment of debts previously contracted in this country. Ex-
