Mrs. Van Deusen suggests that cheese be used with macaroni, with rice, with tomatoes and served with green salads. She emphasizes that cheese is a meat substitute and should not be used in large quantities.

GOVERNMENT EXHIBITS LARGEST WATCH KNOWN

WASHINGTON, June 22.—(U. S. S.)—The largest watch ever known to be manufactured is being exhibited in the priceless collection of the Government and housed in the National Museum. It was manufactured by a big watch-making company of Lancaster, Pa., and was loaned to the Government for two months for exhibition purposes. The mastodon among chronometers measures 19 1-2 inches in diameter, is 1 1/2 inches thick and has a main spring 9 feet long. It is an exact duplicate of the standard 23-jewel watch of commerce, the jewels being synthetic stones. The timepiece was constructed at a cost of \$5,000 and represents some of the finest workmanship of its kind in the country. The "train" the wheels which run it, is of solid gold, with the cogs in the teeth treated specially to harden them against wear. The winding wheel is of steel. Although it has a one-foot mainspring, the watch is run by a weight. It is the movement of the air and not any chemical property which enables a wind to impart a tracing effect. A promise unfulfilled is an untruth told.

HARVEY'S TALK BROKE MARKET SAYS BABSON
