Just Folks by Edgar A. Guest

THE THING A COMPLETED

If you would know the depth of satisfaction
Or come to feel a sense of proper pride,
You must be watchful of your every action,
And till the task be done not turn aside.

Though humble be your duty and your station,
Fill it with credit; not with sham or bluff;
Give it your best and spurn the explanation
That poor endeavor may be good enough.

Seek not in words of praise from men who flatter
For true contentment—it is never there.

Be your own judge and let the thoughtless chatter,
You know your work and is it false or fair.
Remember this, and be no vain regretter:
In little things man meets his sternest test;
Be not content with work that you could better,
The humblest task's deserving of your best.

You need not fear the future. Men shall find you,
No matter where you toil or where you dwell,
If every time you leave a task behind you,
You know yourself that you have done it well.

PULLING TOGETHER FOR UMATILLA COUNTY

THERE are indications that decided good will result from the newly formed federation of commercial organizations in this county, the directors of which met here last evening and discussed affairs in a broad spirit of cooperating for the general welfare of the county. There are many subjects where the interests of the county as a whole are involved. In such cases the only thing to do is to get together with representatives present from all sections and talk things over. There will seldom be trouble when the full facts are known and the prevailing spirit is one of fairness. Only through square dealing can confidence be inspired and without such confidence on the part of the people we will not get anywhere.

The visit to Grant county by a county-wide delegation, under the auspices of the county federation, cannot fail to produce good results. That trip will be an enjoyable one for those who make it. It is a trip that will be greatly appreciated by Grant county folk and there is every reason to believe the results of the undertaking are distinctly county-wide in character.

It goes without saying that similar trips to different parts of this county will be equally beneficial. Umatilla county in itself is a big empire. There is always danger that people living in one section will not properly understand the views and needs of those in other sections. There are a number of important road projects in the county that justify attention and investigation by the people of the county as a whole. It is good, sound, constructive citizenship, to look into these subjects and to do so openly, with chances for all to be heard, and with ample time for deliberation. Such study by the people or by accredited representatives from different regions cannot fail to be a wonderful help to the county court which by the nature of things always has trouble trying to accomplish everything that is wanted.

The success of democratic government always rests primarily on the intelligence, zeal and public spiritedness of the citizenship which constitutes the power behind the throne. Therefore it follows that good will always result when people get together, bring out the facts and discuss affairs in a broad minded way. Umatilla county people being proud of their county, its prestige and its record, for fighting, fishing and everything else, are admirably situated to lead out in this line of effort.

SOMETIMES IMPORTS ARE A LIFE SAVER

OPINIONS being expressed by various authorities are that when the tariff bill gets to the senate it will be sidetracked in favor of the tax revision bill. There are many who will rejoice if this proves true because in certain lines American manufacturers have been charging extortionate prices. Some industries forced to rely upon our manufacturers for essential products have been almost ruined by the prices charged while the manufacturers have been reaping fat profits. The best chance for relief has been through importations and only by importing have prices been brought down to reason.

Were the Fordney bill now a law this wholesome settling down process would be checked.

The "joker" in the bill is the "American valuation" clause, by which the value of the article is fixed at the port of entry and not at the port of shipment. This will make the tariff rates much higher than they appear to be under the schedules of the bill. For instance, as the Philadelphia Record points out:

If a foreign article is valued at \$1 and the same article here is valued at \$2 and the duty, say, is 100 per cent, the value of the foreign article thus becomes \$4, duty paid. The American manufacturer could raise his price to \$3 or even \$3.50 and undersell his foreign competitor and the treasury would get no revenue whatever.

Representative Garner (Dem. Tex.) who made the principal speech against the bill, declared that under American valuation the present Underwood bill would yield more revenue than the Fordney bill.

Now people are not going to like a tariff bill that raises prices and yet does not carry with it the compensating benefit of raising national revenue. The business situation calls for readjustment along natural lines, not for favoritism and continued extortion by favored manufacturers. The senate will help business and give good politics if it tames down the tariff bill.

It is unnecessary to say that the road money of Umatilla county is intended for roadbuilding and that the people propose to see it used for that end and no other. The arrest of the road bookkeeper on a forgery charge constitutes a scandal that should be probed to the bottom. The county officials, headed by Judge Schamp, are to be complimented on the vigor with which they have acted. They will be justified if they go farther and through the aid of experts and the grand jury scrutinize every road warrant and contract. The public wants the truth presented without fear or favor and it will be only fair to the innocent that the investigation leave nothing uncovered.

THE OLD HOME TOWN By Stanley

WIRELESS TELEPHONE AS AID TO EVERY FARMER OF NATION IS PLAN OF POST OFFICE DEPT.

Radio Antennae Attached to Tree Will Bring Weather Forecasts; Market Reports.

By GEORGE R. HOLMES, International News Service Staff Correspondent.
WASHINGTON, July 21.—If Will H. Hays, the diminutive dynamo now presiding over the world's greatest business, which is the United States postal service, doesn't quit fooling around and experimenting with things some of these days a farmer in the country is going to be able to put up a thingumajig in a peach tree in his backyard and find out instantly what steel is selling for in New York, what wheat and hogs are bringing in Chicago, and the market price of oranges in sunny California.

It may sound fantastic, but it's true. Not only will the farmer have his market reports brought right to the peach tree in his backyard, but he also will have the governmental weather reports from the same tree, which will enable him to decide whether it's safe to figure on cutting wheat or hay tomorrow.

All this is going to be accomplished Hays believes, through the development of wireless telephone and the cooperation of the United States department of agriculture and the post-office department.

The groundwork has already been laid and is being added to daily. It is not generally known that right now market reports are going out of Washington several times daily from the big radio station at the postoffice department. These reports are picked up by the radio stations of the air mail service all over the country, where they are available for anyone who applies for them.

These stations are comparatively few in number at present, the principal ones being at St. Louis, Omaha, Cincinnati, Salt Lake City, Cheyenne, Reno, North Platte, Neb.; Elko, Nev., and Bellefonte, Pa.

The success which has attended initial efforts at this broadcasting has convinced officials of the feasibility of doing it on a national scale, providing of course, that the scientific sharps continue to make progress in the simplification of radio telephone. Radio telephone apparatus is soon to be installed at the air service stations.

The heat was so intense in Washington, D. C. recently, that a Kentucky representative won a bet when he said it was hot enough to fry eggs on the steps of the Capital. The eggs were procured and the heat slowly fried them.

BIRTH OF AN EMPIRE IS LAID TO RAILROAD

ATLANTA, Ga., July 22.—(I. N. S.)—The romantic history of the Western and Atlantic railroad, the only state-owned railroad in the United States, was recently related by Chairman C. Murphey Candler, showing that the road has brought about much of the progress of this part of the South, creating the city of Atlanta out of a "mere point eight miles east of the Chattahoochee river" and developing the tiny trading post of Ross Landing into the present city of Chattanooga. The original purpose of the road was to link the South with the grain fields of the west, explained Mr. Candler. From an original investment of \$5,000,000 the state of Georgia has realized \$25,000,000 from the two leases running for forty years and for the next fifty years will receive \$22,500,000 revenue from the Nashville, Chattanooga and St. Louis railroad, the present lessee.

Chairman Candler severely criticized the action of the state in disposing of part of its terminal around in Atlanta and Chattanooga and urged that no further space be sold.

COURT ORDERS ALBERS TRIAL BE CONTINUED

PORTLAND, July 22.—(U. P.)—The supreme court sent a mandate ordering procedure in the trial of Henry Albers, formerly sentenced to three years and fined \$10,000 following his conviction for espionage. He was later granted a new trial because of improper evidence featured in his former trial. Albers now paralyzed and blind is unable to stand trial, which will probably be postponed.

28 YEARS AGO

(From the Daily East Oregonian, July 22, 1892.)
T. J. Watts, a veteran farmer of Weston, is in the city on his return from Crook County, where he has been prospecting for precious metal.
Mrs. R. Alexander and family leave this evening for Bingham Springs.

DOINGS OF THE DUFFS WILBUR ENTERED INTO THE SPIRIT OF IT. BY ALLMAN
