HOME DEMONSTRATION IDEAS FOR HOUSEWIVES

- * A modern home protects the health of the members of the family by—
- * Reducing the hours and lessening the strain of work for farm women.
- * Providing a safe system of waste disposal, thus reducing the chance of family having typhoid, dysentery, malaria.
- * Giving greater opportunity for family to keep physically fit because of: Better air, easy bathing facilities, and more convenient arrangement for eliminating wastes of the body.
- * A modern home is a wife and mother-saver. It eliminates the strain of lifting and carrying heavy loads of water and of washing clothes on a washboard.
- * It decreases the depressing fatigue which comes from the drudgery of doing the additional work and walking useless number of miles required in doing housework in a house that is not modern. The average length of day for a woman on the farm is found to be 12 to 15 hours, with an average of one hour a day for rest or recreation.
- * During these long hours the farm woman's work is mostly hard physical work. It has been estimated that many farm women lift over a ton of water a day.
- * This is based on the use of 3,000 gallons a month, which is the average amount that families use, according to waterworks companies, and upon the lifting of each gallon of water three times, once when drawn, once when used, and once when carried out as waste, making each gallon of water, plus the pail, represent the lifting of 27 pounds.—V. WHEAT—TRADE IN FUTURES WAS SMALL

and market fluctuated within a narrow range, but held remarkably well in spite of the absence of outside buying power. During the early hour trading a substantial part of the offerings were taken by seaboard interests and although the volume was not given out up to the close it was thought a good sized export business was done today. All cash markets were strong and higher especially southwest where millers and exporters were in competition for wheat. Receipts while still quite large showed a material falling off compared with last week, and country offerings to arrive were said to be much smaller. In other words, the urgent selling of new wheat appears to be about at an end, and this in our opinion should spell higher prices.

25 ACRES OF WHEAT IS DESTROYED BY FIRE

(East Oregonian Special)

ECHO, Aug. 2.—Thomas Ross, local merchant, has given \$50 to the Echo firemen for the service done at the burning of the Hotel Hoskins.

M. E. Myers had the misfortune to lose about 25 acres of his best wheat by fire last week. Fire was started by backfire from the engine, and obtained quite a head way before it could be checked. The grain was insured at nearly its full value.

Rev. S. M. Mathes and family left Saturday for Dayton, Washington, where Rev. Mathes has a pastorate. For the past three or four years the Mathes family have been located at Pine City, where Rev. Mathes had charge of the United Brethren church.

L. H. Gobbell and daughters Miss Lois and Miss Ruth Gobbell spent Friday in Pendleton.

H. R. Willis and Sherman Wells spent Friday evening on business in Stanfield. Asa B. Thompson returned

SAYS SHE HEARD THEM CHOPPING WOOD ALCOHOL

AKRON, Ohio, Aug. 2.—(I. N. S.)—A woman, living in the neighborhood of Kipling and Eighth streets, told the police that neighbors were making wood alcohol.

Sergeant McGuire and members of his vice squad futilely and exhaustively searched the neighborhood in question. Then the officers went to the home of the woman informant.

"What! You find nothing?" she asked.

"Well, I don't care," she continued. "I know they make wood alcohol, because I hear them every night in their cellar chopping."
