**H O M E DEMONSTRATION IDEAS FOR HOUSEWIVES**  
 \* The ideal modern rural home \*  
 \* has:  
 \* A water system with the following fixtures: Kitchen sink, \* bathtub, wash bowl, commode, \* stationary laundry tubs, and \* facilities for heating water.  
 \* A good waste disposal system, \* such as a septic tank.  
 \* A furnace or similar heating \* system.  
 \* A lighting system which generates current for a washing machine, electric iron, churn and vacuum cleaner.  
 \* A sleeping porch.  
 \* Of these the water system with all its fixtures are by far the most important. Next in value perhaps is the furnace, not only because a cold bathroom would not be used much in winter, but also because water pipes freeze in an unheated house. A furnace saves labor and the moderate, even heat relaxes nerves and muscles. The washing machine and churn can be run by a gasoline engine if it is not possible to install a lightning plant at once.—E. V. D.

## GOLD SPRINGS NEWEST TOWN IN THIS COUNTY

Umatilla county has a new townsite today.

It is Cold Springs, and the owner of the site is E. P. Dodd, real estate man of Hermiston and president of the Commercial Association there.

The plat of the site was filed with the county court today by Mr. Dodd following an examination of his plats by the court, the county surveyor and the county assessor. Approval of the plat was given by all three offices.

Cold Springs is 10 miles northwest of Hermiston and it is about 30 miles from Pendleton. It is nine miles from the state line and is on the Spokane branch of the O. W. R. & N. between Umatilla and Pasco, being about halfway between Umatilla and Wallula, Wash. Twenty acres of land is included in the townsite.

The Holdman-Cold Springs road will touch the site when it is completed, and this road will prove one of the big advantages of the site, Mr. Dodd believes.

The town is the logical marketing place for wheat that is produced on an area of 30,000 acres and 5,000 acres of the Hermiston project is tributary to it. Another development of the not far distant future is the utilization of a waste drain ditch which will eventually provide water for irrigating about 1,500 acres of land near the site.

"It isn't going to be a big town," Mr. Dodd said this afternoon, "but it is a logical place for a town. Right now it

## "Load me well and keep me clean, And I'll fire a shot to Calais Green"

—Inscription on an old cannon at Dover, England

After every shot old cannons had to be cleaned. The chemical and physical action of the priming fouled the barrel and marked it with tiny "pits."

Modern rifles also suffer from the effects of the priming. For years manufacturers have studied to reduce the effects of the priming on the barrel. And now a new, wonderful priming has been developed in the U. S. laboratories.

The priming in all U. S. Rim-Fires reduces fouling and erosion. It lengthens the life of a rifle to a remarkable degree. The rifle is easier to clean. It is more accurate, because a barrel worn or pitted by ordinary priming loses in accuracy. The slightest effect in the barrel is multiplied by the distance the bullet travels.

Be good to your rifle. "Load it well and keep it clean" by using only U. S. Rim-Fires and cleaning it before putting away. We have in stock all popular styles and sizes for all makes of rifles. Money back if you are not entirely satisfied.
