This Is the Way to Make Every Buy a Bargain

BUY advertised goods. Only good goods, fairly priced, can stand the spotlight of publicity.

A merchant or manufacturer would not dare to advertise merchandise that is poor in quality, poor in make or that will not give reasonable wear. The penalty of such tactics is too heavy. No goods—and no business concern—can thrive under the weight of public condemnation.

A merchant places the whole reputation of his business at stake every time he advertises. Naturally enough, he is careful of what he says and when his statement is placed in the newspaper—where everyone in town may read—so that any untruth in it will be known to all of his employees and most of his friends—then you may be sure he is doubly careful.

When you buy advertised goods you get a bargain because they must be as advertised.

So it pays you to read advertisements. Advertising protects you.

Read the advertisements in this paper and get the best of the bargain.

RECEPTION FOR MRS. STANFIELD

Dr. and Mrs. David B. Hill will be hosts on Thursday evening for a reception in honor of Mrs. Robert N. Stanfield, sister of Dr. Hill. HOME DEMONSTRATION IDEAS FOR HOUSEWIVES

- General Instructions for Canning.
- Use only fresh sound fruit and vegetables and sterilize the same day they are picked.
- Use only perfect glass jars.
- Wash the jars thoroughly, then place the jars in Conservo or boiling water and sterilize for at least ten minutes. Only new sterilized rubbers should be used.
- Blanch vegetables and all fruits, except berries, by leaving them from one to fifteen minutes in clean boiling water. Vegetables like squash and pumpkin must be cut into pieces. Length of time to blanch vegetables depends upon whether they are young and fresh. Older vegetables take longer. Blanch all greens in Conservo rather than in boiling water.
- Remove the blanched vegetables from boiling water and turn quickly into cold water.
- Remove immediately and let them drain.
- Place the blanched fruit and vegetables into hot jars, taking care not to bruise or mash them, but packing solidly as possible.
- Next pour the boiling syrup on the fruit; or fill the jars or of vegetables with boiling hot water, to which a tablespoonful of salt has been added.
- Place the rubber over the glass jar and screw on the cover slightly. The glass top cover should be held in place with the top wire only.
- Place jars in Conservo. Have the water boiling in the copper tank. Allow the food to sterilize according to the time table given in this book.
- As soon as the sterilizing process is completed, remove the jars and tighten the top at once, then stand the jars upside down in a cool place, but where no draft will strike them. Watch for leakage and tighten top when necessary.
- Store in a cool, dry place, but not where the food is exposed to freezing temperature. Wrap in paper to prevent bleaching.—E. V. D.
