BEAUTIFUL WIFE OF FAMOUS AUTHOR PROVES THAT WOMEN CAN DIRECT SCREEN PRODUCTIONS AS WELL AS MEN

NEW YORK, Aug. 11.—It used to be an old saying that the husband and wife couldn't both be inordinately bright. This seemed to be especially true where literary talent was involved.

But Mrs. George Randolph Chester has proved that there is nothing in that notion. For the last 9 years Mrs. Lillian E. Chester has collaborated with her talented husband in all of his books and stories. It is the only case on record of an international author working in complete collaboration with his wife.

It will probably be of interest to thousands of readers to know that Mrs. Chester aided her husband in writing the famous Wallingford stories. It now develops that Mrs. Chester put many twists into the very original character of "Blackie Daw."

In one of her husband's stories there was a wealth of detail regarding the girl's dresses, and many readers probably remarked that "no mere man could write all these details about a pretty girl's clothes." And it now develops that it was Mrs. Chester who supplied the feminine touches.

When George Randolph Chester decided to picture his stories several years ago and learn the technical part of the silent drama Mrs. Chester decided also to take up scenario writing and the making of movies in the studio. Like her husband she became a pupil in screen and studio technique, and they have several screen successes to their credit.

While American women are entering all fields of activity and enrolling in positions formerly held sacred to mere men, it has been left to Mrs. Chester to set up a new record for women in motion pictures.

In collaboration with Mr. Chester she recently wrote the story and scenario of the final episode of the Wallingford series.

Then she accompanied her husband to a California studio and with him personally directed the screening of the story. Mrs. Chester carefully guarded every detail, as if she were rearing a child instead of a celluloid.

After all the scenes were "shot" she accompanied her husband to a New York studio and with him in new titles editing and cutting their films.

"Mrs. Chester and I work together as one person," says her distinguished husband with enthusiasm. "We make an ideal combination, for we really collaborate, and she should have the credit for it."

As a means of checking up on prospectors, a device has been invented by a Los Angeles man which consists of an attachment secured to the front of the car, which is supplied with three lights. When running slowly, a white light shows, which continues until the rate passes the limit of the city ordinance, when a green light comes on, showing that the country rate is being used.
