New Gold Test

This machine provides a spectroscopic analysis of gold which measures the fineness of the metal more accurately than one part in a million. Electric sparks jump between two bars of gold. Photographs of the sparks are taken through a diffraction grating, showing the smallest particle of baser metal. This, at the Bureau of Standards.

CHURCHES

Announcements for this department must be submitted to the East Oregonian not later than Friday evening in order to be assured of publication on Saturday.

English Lutheran.
There will be English Lutheran sermon at the First Christian church at 2 p. m. Preceding the sermon there will be Sunday school at 1 p. m. Rev. E. Mismaman will preach the sermon.

Church of the Redeemer.
Rev. Alfred Lockwood, Rector. 8 a. m. Holy Communion; 9:45 Sunday school; 11. Holy Communion and sermon; 7:30, evening prayer and sermon.

The rector will preach at the morning service on "Fighting for a Kingdom" and in the evening will give a Labor Day message. The public is cordially invited.

Christian Science.
First Church of Christ, Scientist, holds services at 513 1/2 Main street (first stairway north of the Inland Empire Bank). Sunday services are at 11 a. m. and 8 p. m. The subject of the lesson-lesson for Sunday, September 4th, is "Man". Sunday school begins at 9:45 a. m.

A Wednesday evening meeting which includes testimonials of healing is held at 8 o'clock. The Reading Room, which is maintained at the same address, is open daily from 9 a. m. to 9 p. m., where the Bible and authorized Christian Science literature may be read, borrowed, or purchased. The Bible is cordially invited to attend the church services and to visit the Reading Room.

Christian Church.
Sunday, September 4 is re-opening Day at the First Christian Church Bible school after so many have been away. We have prepared a special program for the opening of Bible school and urge that all be there at 9:45 when Landell's orchestra will begin playing. Men's chorus and special songs will also feature the occasion. The Bible school starts a six-week contest at this time. It promises to wake up the school in good shape. There are three sides, and already each "works to win."

Morning sermon at 10:45. Subject, "More Like the Master—in Laboring and Building for God." Every woman in the church is urged to be present at this morning service to hear matters of special importance.

Christian Endeavor social hour at 8 p. m., followed by devotional and consecration service. Meeting lead by Martha Hogue.
Sermon at 7:30. Subject, "What's in a Name?" W. A. Gressman, minister.

Presbyterian Church.
Corner College and 4th streets, Rev. G. L. Clark, pastor. 10 a. m. Sabbath School, A. C. Funk, Supt., 11 a. m. Sermon by the pastor. 7:30 p. m. sermon. A welcome to all.

UMATILLA COUNTY GIRLS DISPLAY INTEREST IN BREADMAKING CONTEST

Contest Will be Held for Girls Between Ages of 9 to 18 During Hay and Grain Show.

Much interest is evinced by Umatilla county girls in the bread-making contest to be held here during the Northwest Grain and Hay Show. The contest is for girls between the ages of 9 and 18, and the prizes are to be given for the best loaf of bread baked by the individual, and exhibited the morning of September 22 at the high school in Pendleton. All of the bread that is sent in to be judged will be exhibited at the Northwest Grain and Hay Show tent from September 22 to 24. The first prize is \$10, the second prize is \$7.50, the third prize, \$5.00 and the fourth prize \$2.50. The girls are not required to be club members in order to compete in this contest.

Mrs. Edith G. Van Deusen, home demonstration agent, who is in charge of the contest, gives the following suggestions to be used in breadmaking: A loaf of bread should be light in weight, considering its size, and should have a symmetrical form and an unbroken, golden-brown crust. The crust should be smooth on top, and should have a certain luster, to which the term "sheen" has been given.

The kinds of yeast most commonly used are compressed, dry, and liquid yeast. The first-named is very convenient, for in this form the yeast plants are active and ready to begin their work. However, it is not easy to keep it long in good condition and so is commonly purchased fresh each time it is needed. When in good condition compressed yeast is soft and yet brittle and is the same color throughout, a creamy white. It should have no odor except that of yeast, which is familiar to most people but difficult to describe. Compressed yeast may now be obtained by parcel post either from manufacturers or from dealers. It is therefore, no longer out of reach of those who are far from markets.

Here is a good liquid yeast recipe: 4 medium sized potatoes, washed and pared.

1 quart hot water.
1-4 cup sugar.
1 teaspoon salt.
1 cake dry yeast soaked in 1-4 cup lukewarm water, or
1 cake compressed yeast.
Grate or grind the potatoes directly into the water (a food grinder is convenient for the purpose). Boil about five minutes, stirring constantly. Add the sugar and salt and allow the mixture to cool. When lukewarm add the yeast. Keep at ordinary room temperature (about 70 degrees) for 24 hours, when it will be ready for use. The yeast should be kept in a cool, dark place. An earthen jar or enamel-ware pail is a good container for it and should be scalded before the yeast is put into it.

In making bread a small amount of dough may be saved for use in place of yeast at the next baking. The same care, however, must be taken with it as with liquid yeast; it must be kept covered and in a cool place.

Milk.
Whole or skim milk may be substituted for part or all of the water used in making bread. It should be scalded thoroughly before use. When the long or overnight process is followed, it is well not to use milk in the sponge for it is likely to turn sour.

Fat.
Fat, if used, may be butter, lard, beef fat, cottonseed oil, or any other of the ordinary fats used in cooking. It should, however, be wholesome, of good quality, and in good condition. Bread is so little improved by the addition of fat that it is a mistake to run the slightest risk of injuring its flavor by using fat of questionable quality.

American Beauty ELECTRIC IRON
the best iron made

You are living in an electrical age make the most of it. Come in and let us show you the wonderful time and labor saving devices we carry in stock—Irons, Washing Machines, Vacuum Cleaners, Toasters, Grills, Percolators, Water Heaters, Stoves, Radiant Heaters, Lamps, Fixtures, Sewing Machines—anything and everything electrical.

CAT EARNS ITS BOARD BY CATCHING RABBITS

SAN BERNARDINO, Cal., Sept. 3.—Mrs. G. W. Smith, who resides near Claremont, has a cat that earns his own board. His name is Tiger, and every day for some time he has been going out into fields near the Smith home and bringing back a rabbit.

When thoroughly scrubbed and cleaned said cotton-tail furnishes meat for the Smith family. And a choice, well-cooked piece always goes to Tiger. He is happy, and he's cutting down the high cost of living for the Smith family.

Troops Have Encounter.
CHARLESTON, W. Va., Sept. 3.—The federal troops had their first encounter with the armed men near Sharples today when they disarmed a band holding a locomotive on the little Coal river branch of the Chesapeake and Ohio railroad.

The End of a Bank Robbery

This photo was taken one minute after two robbers were shot as they tried to hold up the bank at Benton, W. Va. The bandit in the center of the picture was killed. The one sitting up, on the right, was wounded. On the left, with the rifle, is Dr. DeFor, head of the Vigilance Committee. He fired the shot that killed the bandit. Four men attempted the robbery, two others being captured later.
