IDEAS FOR HOUSEWIVES HOME DEMONSTRATION

- The housewife should take advantage of the opportunity in summer of training her family in health and food habits. It is no trouble to get children or adults to take cold baths during the summer, and once started, the habit is likely to continue. Fruits and vegetables are never so well received as during their own season, while tea and coffee can be replaced daily by more refreshing drinks.
- It is unnecessary for any housewife who is willing to plan her work to spend long hours in the hot kitchen. Except in the houses where there are a number of men doing manual labor and requiring heavy food, the cooking for the day can be done in the early morning. In summer the protein requirements of the diet should be filled by eggs, milk, fish, fowl and cheese, instead of by heavier diets. Vegetables, particularly the succulent ones, many of which can be eaten raw, should be used in abundance. Fruits and berries should appear as such and not combined with rich pastries. In canning by the cold-packed method much of the heat and worry of canning is eliminated.—E. V. D.
