IDEAS FOR HOUSEWIVES HOME DEMONSTRATION

A recent farm magazine carried this heading for one of its articles: "Can You Afford to be Without a Sink?" The average farm woman if she were asked to write the heading for an article on the kitchen equipment she needs might say: "Can I Afford to be without a sink?" There are several devices for sink and hot water tank for farm kitchens that do not take a plumber to install. In one neighborhood in another state a group of farm-ers brought this convenience into the kitchens for about twelve dollars through cooperative buying. Where the kitchen could not have running water, the water was pumped each morning by the man of the house into a tank thereby lessening the woman's usual labor of lifting heavy buckets.—E. V. D.

AT DEATH'S DOOR

"Ten years of stomach trouble reduced me to a living skeleton. I had attacks of pain that doubled me up like a jack-knife and I was as yellow as a gold piece. No medicine or doctors helped me and was really at death's door. A lodge brother advised me to try May's Wonderful Remedy, and I found it to be the only medicine to touch my case." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.—Druggists everywhere.

Wheat—The market was erratic most of the session but developed considerable strength towards the close, accompanied by short covering and light offerings. The chief bullish incentive was a report from Kansas City to the effect that country offerings have dried up, while the milling demand continues to broaden because of increased activity in the flour trade.

The seaboard reported one million wheat worked for export, mostly Manitoba, but some was hard winter. On the other hand, our advices from the Pacific coast said Japan has withdrawn from the market and is not expected to be a buyer again until after the first of the year. That the congestion at the gulf was confirmed by the announcement that railroads have embargoed grain shipments to Galveston. Domestic trade conditions will bear watching, but we doubt that this demand which has recently appeared will prove sufficient to offset the lack of important export buying.

Oats—Some buying by western interests gave this market a fairly firm tone, but the trade was not large and there was sufficient selling in the pit by northwestern interests in the form of hedges to satisfy the demand. Receipts were estimated at 130 cars and the cash market was steady at yesterday's basis.
