### BIG ELEVENS SETTLE DOWN TO HARD GRIND IN GAMES TOMORROW

#### Intersectional Contests Will Give Idea of Strength of Stronger Team of Country.

By HENRY L. FARRELL  
(United Press Staff Correspondent)  
NEW YORK, Oct. 14.—Getting away from the paved pikes of the early season, the big football elevens begin to hit the first of the hard going tomorrow.

Four interesting intersectional games feature the card in the east, while the west will watch with equal attention the first real conflict of the "Big Ten."

From an intersectional standpoint, the battle between Harvard and Georgia, one of the ranking elevens of the Southern Conference, is the feature game of the day.

The south also will step onto the eastern stage when Tennessee meets Dartmouth at Hanover.

Colors of the middle west will be carried against the east also at Pittsburgh, where Glenn Warner's famed Panthers will play the University of

Cincinnati and at West Point, where the Cadets will oppose Wabash.

The biggest and perhaps the hardest fought battle of the day will be between Princeton at the Naval Academy at Annapolis. All the bitterness worked up in last year's battle, when "dirty football" was charged and counter-charged by both elevens, has been carried over. The midshipmen would take the same delight in trouncing the Tigers that they do in beating the Army.

Yale has a comparatively easy game with Williams, and Penn is expecting no great trouble with Swarthmore. Penn State has a man-sized job with Lehigh, and the Syracuse-Brown game should be anything but a pink-tea engagement.

Ohio State and Minnesota have the banner attraction in the Western Conference. Northwestern and Wisconsin, and Iowa and Illinois will furnish the other banner conference games. Notre Dame will mingle again with a "Big Ten" team by playing Purdue.

No important games are carried in the south. Centre has a soft opponent in St. Xavier's of Cincinnati, and Georgia Tech has the same in Furman.

A book of Scriptural reading in no fewer than 42 tongues and dialects has been prepared by the British and Foreign Bible Society.

The two extremes in human hair are that of the negro, flat in section and curly, and that of the Mongolian, which is round and straight.

### After World Billiard Title

Roger Conti, 21, is the French aspirant for the world's championship billiards. He has arrived in America to play for the title in practice sessions is proving as big a sensation as he did in Paris, of cue experts.

### BLACK STONE IS DECLARATION OF WAR AND THEN ONLY THOSE WHO WOULD FIGHT ARE INVOLVED

HONOLULU, Oct. 14.—(I. N. S.)—Evidence pointing to the development by the ancient Hawaiians of a remarkably advanced type of civilization has recently been brought to light.

In these modern days only prize

fighters, bullfighters and screen stars can stipulate the conditions under which they will fight and the time and place of the encounter; real fighters must still clash with the enemy wherever and under whatever conditions he may be encountered, even as their savage ancestors did.

Not so the ancient Hawaiian warrior!

In those days when a chief or a king felt like having a good soul-satisfying scrap with one of his neighbors he did nothing so crude and uncivilized as to get an army together and try to take his enemy by surprise. Instead he sent his intended victim a little message, usually a black stone, upon receiving which the victim—being a liberal allowance of time in which to train for the fight and sent back an answer. If the time suited the challenger a place was agreed upon, and on the appointed day and hour the two armies met and mixed it hard to hand, keeping it up until one of the two had nobody left to continue the fight. In this manner nobody had to fight if he happened to be enjoying life in peaceful pursuits and, on the other hand, nobody had to go around long carrying a chip on his shoulder.

One of the most popular battlefields among the ancient warriors was an old lava-flow, just south of historic Kealahouka, on the Island of Hawaii, the scene of Captain Cook's violent death. Here many a bloody battle was fought, and here lie the warriors who died in battle and were buried, according to custom, where they fell. The place is now a mecca for tourists and natives alike, recent discoveries of graves and implements of war having drawn many interested visitors.

### DANGER FOUND IN DUST BY PROBE BY U. S.

BY HARRY WARD  
(International News Service Staff Correspondent)

WASHINGTON, Oct. 14.—Investigations being conducted by the Federal Bureau of Mines have emphasized the fact that dusts of various types are intensely harmful, occasioning to some industries terrible explosions that produce great loss of life and property. In other trades they are responsible for a highly increased death rate from lung disease.

The fact that coal dust has tremendous explosive powers, once scuffed at by the veteran miner, is now demonstrated frequently by the bureau in its own coal mine at Experiment, Pa., near Pittsburgh. Pulverized coal, blown in the furnace through compressed air lines, is an ideal fuel in certain industries, but the bureau points out that clouds of dust release from such pipes are as dangerous as a body of unconfined natural gas when illuminated in close proximity to open flames or red-hot metal.

**Aluminum Dust Explodes**  
Aluminum dust has also been found to be quite explosive, and several disastrous explosions of this dust have occurred in manufacturing establishments. The dusts of various grains have been found by the Department of Agriculture to be responsible for a number of severe explosions in flour mills and grain elevators. Hard rubber dust is also declared to be explosive.

The dust of rock containing free silica, found in some metal mines in the West, setting in the lungs of the miners, is responsible for a heavy annual death rate from tuberculosis. The Bureau of Mines found in an investigation of conditions in the Butte, Montana, copper mining district, that the tubercular death rate of Butte miners was nearly thirteen times as great as that of residents of the State of Michigan. Pulmonary diseases due to rock dust among the miners of the Johns, Mo., lead and zinc district affects probably as high as 50 per cent of the miners employed in certain classes of mines. Remedial measures are being found by the introduction of better ventilation and through the use of water in drilling and in the ore piles to prevent formation of a dust cloud in the air.

Not all dusts are the enemies of mankind, however. The Bureau of Mines is encouraging the use of coal mines of barriers of certain rock dusts which, when jarred by the explosion of coal dust, scatter and act as a

### How To Keep Your Blood Pure and Wholesome

It Is the Person With Rich, Red, Normal Blood—The Person of Health and Energy—That Meets With Business and Social Success.

A Lowered Vitality Is Usually Due to Waste Products in the Blood.

When your blood is impoverished and loaded with waste products, you don't get the full strength out of your food, and as a consequence, you become weak, nervous, and easily upset. Waste products get into the blood mainly through the intestines, but there are other sources—for instance, the glands. Some glands secrete digestive juices, while others excrete waste products. If they fail to properly function, waste products accumulate.

As a result, nature strives to cast off the poisons. It may be through the skin in the form of some skin disorder, but it is not infrequent for it to settle in the muscles and joints and cause rheumatism.

For over 50 years, thousands and thousands of men and women have relied on S. S. S. to clear their blood

of waste products. S. S. S. will improve the quality of your blood by relieving you of the waste products which cause impoverished blood and its allied troubles—skin disorders, rheumatism and a lowered vitality. The same qualities which give S. S. S. its beneficial effect in clearing your blood of waste products make it extremely desirable for keeping your blood in good condition.

Get S. S. S. at your druggist. Use it strictly according to directions and write Chief Medical Director, Swift Specific Co., D-718 S. S. S. Laboratory, Atlanta, Ga. for special medical advice (without charge). He is helping people every day to regain their health and strength. Ask him to send you his illustrated booklet, "Facts About the Blood"—free. S. S. S. is sold by all drug stores.

screen for the stoppage of the exploding coal dust. The dust waste from slate quarries, amounting to about 10 per cent of the entire material mined, has been found by the bureau to be peculiarly adapted to use as a filler in the making of asphalt road surfaces.

Although blind, a Canadian ex-soldier recently passed the Canadian civil service examination for employment as a shorthand clerk.

Lincoln Highway, 3,284 miles long, connecting twelve States, is the longest road in the United States.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. All druggists sell Bayer Tablets of Aspirin in handy tin boxes of 12, and in bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacid-ester of Salicylic acid.

### RIETH MATRON HOSTESS FOR 'FLINCH' PARTY

(East Oregonian Special.)  
RIETH, Oct. 14.—Mrs. Allen Kennedy entertained a few of her friends Saturday evening at her home with a flinch party. Those present were Mrs. Archie Cog, Misses Florence and Esther Powell and Miss Margaret McQuerry, Messrs. Clarence Snider, Teddie Roberts and Perry Woods.

Mr. and Mrs. Geo. Roberts have returned to Rieth from Portland where they had gone to spend the winter.

Mrs. C. May was shopping in Pendleton Saturday.

Mr. and Mrs. Wm. Roberts and son Teddy, Mr. and Mrs. Harley Roberts and son and Mr. and Mrs. Geo. Roberts were visiting at the home of Mrs. F. Turner, their sister and daughter Sunday, about a mile west of Rieth.

Mr. and Mrs. J. C. Langley and little daughter Lois spent Saturday and Sunday visiting relatives in Walls Wall.

Mrs. Fely Duke was shopping in Pendleton Tuesday.

Mrs. J. M. Harrison and daughter Haroldine had a narrow escape from a serious accident a few evenings ago when Al Sterlesky drove his car into the front of the Harrison car in which the ladies were sitting. There was considerable damage to the cars, but no one was hurt.

Frank Hart was in Pendleton Tuesday afternoon.

Workmen are busy on the highway building a railing around a dangerous place where the road was filled in a short distance from Rieth.

Mrs. Wm. White and children were in Pendleton Tuesday shopping.

Mr. and Mrs. R. J. English and children and Fredrick Heath went to Pendleton Tuesday evening to attend the entertainment given by the Artisan Lodge.

Mrs. John Nelson and son Jack motored to Pendleton on a business trip the first of the week.

Mrs. W. W. Snider visited both rooms at the school Friday.

Sam Wall returned Sunday from a hunting trip.

Mr. and Mrs. Brown of Pendleton were visiting at the home of Mr. and Mrs. Allen Kennedy Sunday.

Mr. and Mrs. Fletcher of Combs Canyon stopped in Rieth Tuesday on the way to Pendleton.

### DR. LYNN K. BLAKESLEE

## THE UNIVERSAL CAR

The Ford Sedan is the favorite family car, seats five comfortably. While an enclosed car with permanent top, it has large windows, and may in a minute be changed to a most delightful open car with always a top protecting against the sun. In inclement weather it is a closed car, dust-proof, water-proof, cold-proof. Finely upholstered. Equipped with electric starting and lighting system and demountable rims with 3 1/2-inch tires front and rear. A real family car. Won't you come in and look at it?

The delights of the electric car with the economy of the Ford.
