NOVEMBER 20 IS DATE ANNUAL TURKEY SHOOT

Turkeys and ducks will surely suffer on Sunday, November 20, because on that date the members of the Pendleton Rod and Gun Club will hold their annual shoot. A decision to this effect was reached last night at a meeting which was held in the office of J. H. Estes.

A number of dances and socials will be held in the clubhouse during the winter months, and the club house will also be rented to other responsible organizations for meetings and dances. A house committee was authorized, and President Fred Lampkin appointed J. H. Estes as chairman of this committee and the other members will be named later.

The committee to secure the ducks and turkeys for the shoot consists of R. A. Rudd, L. A. Smith and Fins Kirkpatrick. The committee in charge of the shoot consists of George Haer, Sol Baum, Fred Lampkin, Jim Estes, Guy Matlock, Dan Bowman, Guy Wyrick and Louis Scharpf.

GOVERNMENT WANTS TO KNOW WHERE MARKET DUCKLINGS ARE KILLED

Mr. Duck Hunter, have you killed any young ducks this year which had aluminum bands on their legs, with the legend, "Bio. Sur. Wash. D. C." inscribed on the metal? Between 30,000 and 40,000 young ducklings were so marked last spring and summer during the breeding season in the Dakotas, Alberta, and other Canadian provinces by the U. S. Bureau of Biological Survey. The object of the bureau was to ascertain the distance, course and time of migration of the ducks when they leave the breeding grounds. Hunters who kill any of the ducks are urged to write to the bureau at Washington giving the time and place of the killing of the birds.

ROBBERS CUT HOLE IN DOOR AND ENTER STORE

BOARDMAN, Ore., Oct. 13.—Prof. Jackson of the U. S. Biological Survey is in Boardman to continue the rabbit extermination campaign recently begun by the department. The local situation will be carefully studied and baits tried out and after two drives per week for the next month it is expected that poison methods will get the rest.

There is a general and steady development of the business section of Boardman. Within the past two weeks there has been opened a first class barber shop by Joe Webster of Tigard, Ore., an office by Dr. Ray Logan of Emattilla who will give two days per week to this section, and a most market by A. E. Partlow. In addition the post office has moved into new and commodious quarters in the Root building. The community, too, is showing advance in the importation of several carloads of milk cows now en route from western Oregon and Washington. It has been realized that there can be no permanent success of agriculture when the crop is ruined and shipped out of the country and nothing returned to the soil. This is especially true of irrigated sections. The application of manure increases the yield of alfalfa. This calls for

PAID FANCY PRICES

"I paid an international authority on diseases of the stomach \$1,500, and he didn't do me five cents' worth of good. I have been to various spas in Europe, as well as this country and have spent fully \$20,000 fruitlessly in search of a cure for my stomach trouble. Naturally I lost faith in any remedy for my case. My wife's brother had taken May's Wonderful Remedy and praised it so highly that I tried it and am now entirely rid of that trouble. It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.—Druggists everywhere.

When Mr. Jones was saved from the frying pan—

They talk yet of the change that came over Jones. Some said it was psycho-logy. Some said it was a miracle. All said it was a mystery.

When they asked Jones, he said it was liberation from slavery—slavery to the frying pan, and to grease and starch.

Jones used to take his breakfast fried, and followed this with a heavy lunch.

In those days they said at the office: "Old Jones has a secret sorrow and he's sore on the world."

One day Jones started late—no time for the usual breakfast to be cooked.

Jones had a breakfast on **GRAPE-NUTS** with good cream. He was delighted with the crispness and rich flavor. Felt satisfied and "fed." Tried it again at lunch. Kept on breakfasting that way—often lunching, too.

Jones began to "perk up," talk up, step up—GET up.

"Let Jones show you how to do this," they began to say at the office.

As to Jones—he said: "That's a great food—**GRAPE-NUTS**."

There are thousands of Joneses, both kinds—reckless feeders and wise feeders.
