Think Without Will Be Stopped

NEW YORK, Oct. 22.—Dun's Review says: Possibility of a widespread railroad strike was not without influence on business this week, but caused no conspicuous disturbance. Belief that a strengthened action toward that end was taken and early unsettlement arising from the threatened trouble was mainly confined to speculative markets. While requests to expedite shipments of goods under order were made in some instances, there was no general anxiety regarding supplies of merchandise and forward demands were not appreciably affected. Prospect of lower freight rates is entering into calculations but the disposition to defer commitments pending developments in this connection is maintained.
