**GOVERNMENT WINS SUIT**  
WASHINGTON, Dec. 19.—(A. P.)—The government today won a suit

to compel members of the American hardwood manufacturers association to terminate cooperative selling methods and agreements alleged to have been adopted for the purpose of eliminating competition and to maintain prices.

Justice Clarke, delivering the decision, said it was clear from evidence that the plan was a combination to restrict production and increase prices. Calling the organization "an open competition plan" was merely putting an old evil in a new dress, was Clarke's opinion.

### IDEAS FOR HOUSEWIVES HOME DEMONSTRATION

- The Second Six Points to be Remembered in Serving Table (By Request.)
- When a course is to be removed all large dishes containing food should first be taken, then all silver, glass and china, then clean glass, silver and china, and all those things pertaining only to that course, and then the crumbs.
- Plates should be removed from the right. All other things should be removed from the side on which the waitress can reach them most easily, and with least discomfort to the guest. The waitress must never reach across a cover at table.
- Dishes should never be piled one on another; one may be removed with each hand or small dishes may be set side by side on a tray but never on top of one another.
- When a course has been entirely removed the additional silver may be placed from a tray for the following courses.
- The waitress must see that glasses are kept filled, butter, bread and rolls always supplied without being asked for, and other things at hand as needed.
- The crumbs should be removed before the dessert course. This should always be done quietly and neatly. A clean napkin and plate are the best things for the purpose.—V. D.
