

# Only One More Shopping Day Then EASTER

the one day in the year when everybody strives to appear at their best, in gladsome new attire that reflects the rejuvenation of one's spirit as well as one's wardrobe. We have a wonderful stock of Easter wear, correct in every detail. Let us serve you in your Easter needs.

## Lovely Spring Dresses

Colorful, youthful and refreshing aptly describes this particular group of Canton crepes, crepe de chine, taffetas, satins and krepe-knit vic with each other in prettiness. Add to this that they portray numerous versions of mode and in a few of each, and you have the possibilities for a most becoming and exclusive choice. They are frocks with evidence of individualized modes, such as any modiste would be proud to call her own origination.

Priced from  
\$17.50 to \$75.00

## HERMISTON-STANFIELD BALL GAME YESTERDAY

(East Oregonian Special)

HERMISTON, Or., April 14.—The high schools of Hermiston and Stanfield will meet in baseball Thursday afternoon on the local diamond. The teams played last Friday at Stanfield, the local boys taking the short end of an eight to two score. Until the past few days practice conditions have been bad, but the team has been working hard the last few evenings and out to revenge their loss of last week.

The Union Pacific will lay 99 pound rails the entire distance from Hinkle to Umatilla immediately, railroad men here say. The road will also be rehabilitated. The rails are already in the local yards, ready for the work which will commence immediately. This work is part of the company's \$17,000,000 improvement plan.

The Oregon Hay Growers are making plans for the big hay rate hearing to be held in Portland about the first of May, when the hay-men will appear to fight for a reduction of rate on hay from railroads of the state, principally the Union Pacific and Southern Pacific. They contend that the rates discriminate against hay grown in this district and hope to gain a reduction of about \$1 a ton on an average haul as far as from here to Spokane or Portland.

What might be called a building boom appears to be starting here. Chas. Skinner, postmaster, has just broken ground for a new modern house of 11 rooms. The Inland Empire Lumber company announces that work will start next week on a new concrete office, the contract having been let to August Hesse, Peter Neudeau and C. H. Griggs are farmers who have announced their intention of building this spring.

The Junior class of the high school is putting on a vaudeville show at the Play House. The day is next Wednesday. The students have been selling tickets this week and expect a packed house.

As a result of the west end oratorical and declamatory contest at Umatilla last Friday, Frank Swartz of Hermiston, will represent the west end in high school oratory and Clara Parks of Umatilla will compete at Pendleton in high school declamation. In the grade school contests, Dorothy Shottwell of Hermiston, was the winner in class C and Lucile George of Echo, came out victorious in class D. Judges were Messrs. Crawford, Penny of Boardman and Stanfield and Miss Naomi Runner of Boardman. The county contest will be held in Pendleton May 5.

R. Alexander of Pendleton is in Hermiston for the first time in six months, having been lamed during the fall and winter with a broken leg. He states that he has to walk cautiously, but is well pleased to be able to get about. He is staying at the home of his daughter, Mrs. E. P. Dodd.

A. W. Adamson, manager of the theatre here, was in La Grande on business the fore part of this week, returning Tuesday evening.

The American Legion post started plans for Memorial day at their meeting of Tuesday night. They also appointed Carl Voren and Earl Kingsley to represent them at the meeting of the county organization in Pendleton tonight.

That the new Methodist church is attracting attention over the northwest is evidenced by an inquiry received by Rev. Wan from F. S. Logue of Cascade, Idaho, asking for a copy of the plans of this church and an estimate of the cost of building one similar to it.

The Hermiston Creamery reports a larger demand for its butter than it is able to supply. The concern, which started in business less than three months ago is already making more than 800 pounds of butter a day. The pay checks which the industry has distributed in this district is regarded as one of the causes of the business improvement which has become evident in the past few weeks.

The American Legion will let a contract in a few days for the construction of the new \$20,000 dance hall to be built in North Bend and completed before July 1.

## THE HOPE OF THE WORLD

The war of 1914 laid half the nations of the world in the dust. Their homes, their industries, their peace must be restored by the rising generation. In them is the hope of the world.

To make motherhood easier, to secure for every baby a clean bill of health and a fair start in life—that is the problem.

Ledia E. Pinkham's Vegetable Compound is an excellent medicine for mothers and for future mothers. For fifty years this medicine has been used successfully in all non-surgical cases of women's diseases.

## TERMS RAD'IO 7TH WONDER OF TODAY

GAINESVILLE, Ga., April 14.—The radiophone is the seventh wonder of the modern world. Dr. H. J. Pearce, president of Brenau College for Women, told the world, in a message he broadcasted at the installation of a radiophone in the college recently, believed to be the first in a woman's college.

The other six wonders of the modern world, in the order named, he said, were the automobile, the aeroplane, the phonograph, the X-ray, anaesthesia and radium.

Dr. Pearce contrasted what he termed the seven wonders of the modern world with the seven wonders of the ancient world. "The seven ancient wonders, of which the Pyramids is typical, consisted of great masses of matter fashioned by the hand of man," he said. "The seven modern wonders consist of relatively small masses of matter most delicately adjusted."

"The wonders of the ancient world involved ponderous elements, requiring great strength in their adjustment, the wonders of the modern world involve the imponderable ether and the air, requiring great intelligence and delicacy of touch in their adjustment."

"The ancient wonders were located at fixed points on the earth and were the property of certain nations; the modern wonders are produced anywhere and are the property of all people."

"The ancient wonders were subject to decay, and all except the Pyramids have already disintegrated; the modern wonders are eternal principles, and time will only add to their perfection and efficiency."

According to Dr. J. D. Adams, director of the bureau of animal industry, the total number of livestock in Idaho is decreasing to an alarming extent. He reports a loss of 2000 in the last three months.

## MINNESOTA POSTS OF LEGION PLAN HOSPITAL

ROCHESTER Minn., April 14.—With its hotels, lodging houses and even streets full to the brim, with wounded ex-service men, victims of the German methods of warfare, this little town of less than 14,000 souls greatly resembles the small French villages which were located just back of the allied line of battle in 1918, to which the then maimed members of the A. E. F. were carried.

From all parts of the United States ex-soldiers, many of them with but one leg or one arm, all suffering from wounds in some part of their bodies, have come seeking betterment of their condition at the clinic which the Mayo brothers operate here. Local authorities estimate that more than 3000 ex-soldiers have visited this place in the past three years. Hundreds of them are still here and more arrive each day.

Cases of suffering from causes other than war wounds are brought to the attention of the American Legion and other patriotic organizations daily. Many of those visiting Rochester in search of health arrive without funds, all their money having been spent in transit. To care for these former soldiers and sailors was a task which the community was ill-prepared to shoulder and the greater part of this necessary relief work has fallen on the American Legion and its affiliated organization, the Legion auxiliary.

During the three years that Rochester has been sought as a place where all ills can be cured, the Legion has spent thousands of dollars in providing food and shelter for their comrades. The two Mayo brothers have given their professional services gratis in many instances but in all have first required that the cases be passed on by the Legion.

In order that the expense and care of the ex-service men who visit Rochester in the future may be ably taken care of the 30,000 Legion members in Minnesota plan the immediate erection of a 500 bed hospital here. The expense of building and maintenance of the hospital will be borne in full by funds which the Legion posts of Minnesota are now collecting by entertainments and other means.

REGINA, Saskatchewan.—Saskatchewan game wardens are making an attempt to establish a partridge colony in the Cypress Hills district in the south-western part of the province. The territory mentioned is well suited for the birds, but for some reason or other has never been inhabited by them. Families of the birds are being now placed in the preserve.

## 22 BILLION TELEPHONE MESSAGES SENT IN 1921

BUENOS AIRES, April 14.—There were twenty-two billion telephone messages carried over the telephone wires of the United States during the year 1921, an average of over sixty million messages a day, according to the report of W. S. Vivian, of Chicago, vice president of the Telephone Men's Association, speaking before the Rotary Club here on "The Service of the Telephone."

## INTERNATIONAL CHURCH CONFERENCE ARRANGED

LONDON, April 14.—(I. N. S.)—Under the auspices of the World Church League for the Promotion of International Understanding, an International Church Conference is to be held in Copenhagen from August 5 to 11.

Between a hundred and fifty to two hundred delegates are expected to attend, and the subjects to be discussed include the position of national and religious minorities, cooperation with other Christian movements and with labor organization, reconciliation and reconstruction.

## Human Motor

## Human Motor

Aviator Swend broke the world's record when he stayed in the air 45 seconds in a motorless plane at Gstaad, Switzerland, landing in a spot designated before the flight. He controlled the plane by movements of his legs and body.
