## WAR OF REVOLUTION IS GIVEN NEW TWIST

LONDON, May 1.—The Pilgrim Fathers did not break away from the Mother Country because of harsh treatment. What really caused the separation was not oppression but distance, different surroundings and the fact that the most advanced Radicals of England had found refuge in America and carried into effect that the ideas of government that were repressed in the Mother Country.

Thus declared Professor E. Raymond Turner, Professor History at the University of Michigan, in an address to the Royal Colonial Institute in London on "The Relations Between Western Europe and America."

"Though the original English stock had become largely intermixed with Dutch, German and other foreign elements, America remained English in language, institutions and laws," he said.

"Of the 150,000,000 English speaking people in the world, almost 100,000,000 are in America, and of these about 50 per cent were supposed to be directly descended from British stock."

Professor Turner declared that if ever a real League of Nations were established its foundations would be the peoples of Western Europe and the peoples of America.
