**Hogs Go Lower On Portland Market**  
(From The Oregon Journal.)  
Hogs were lower with more limited offerings, cattle showed strength with a decreased run, while sheep and lambs were considered steady at the Monday morning opening trade at North Portland. Total run in the a-lers over Sunday included 79 cars compared with 114 cars a week ago, 45 cars the previous week and 55 cars a year ago.  
In the swine alleys there was a much smaller run for the day as compared with last Monday, but this failed to check the bearishness in the buying crowd. General top for swine did not reach above, \$11.50, a loss of \$2 from the previous extreme, although a nominal supply sold early at \$11.40.  
General hog market range:

There was a smaller run by nearly 1000 head than the big showing of last Monday and killers were early bidders with a general top of \$5.25 in the steer division. Good stuff was scarce and most of this run to slightly heavier weights than wanted for tops. In the cow and heifer division a firmer tone was generally noted and higher prices forced, with early sales around \$5.50 but considering quality a \$7 top was established.

## OUTBURSTS OF EVERETT TRUE

### THE OLD HOME TOWN

By Stanley

**Stock Exchange Has Lighter Day**  
NEW YORK, May 2.—(A. P.)—The striking feature of yesterday's bond market was the decided diminution in the volume of operations, although transactions, mostly at higher levels, comprised many separate issues.  
Constructive features included several of the local tractions, especially Interborough Rapid Transit 5s and 4 1/2s and Third Avenue adjustments.  
New Haven 4s of 1955 led the rails at a gain of over 43 points, but other underlying issues of that system moved contrarily. Advances of fractions of 1 point attended the demand for Minneapolis & St. Louis refunding 4s, Denver & Rio Grande refunding 5s and St. Paul, Kansas City, Southern and Reading issues. Chicago & Alton 3 1/2s recovered part of their recent sharp decline.  
Firmness was shown by most of the European and other foreign offerings. Chinese railway 5s developed weakness, presumably in connection with the war in that country.  
Total bond sales, par value, aggregated \$17,472,000.  
Liberty issues lacked a definite trend, but hardened later, net gains exceeding losses in that group.  
Industrial and commercial advices published over the week-end recess, combined with the bullish "literature" issued by a majority of the commission houses, gave impetus to the further advance of stock market prices.  
The movement was uneven for the most part, however, seasoned shares again being relegated to comparative obscurity by the greater prominence of speculative issues. These mainly comprised leaders of the oil, motor, independent steel and copper groups.  
Specific instances of unusual activity and strength included Associated and Pacific oils, Standard Oil of New York, Studebaker, which threw off the disappointment shown at the failure of the directors to declare an extra dividend, Baldwin Locomotive International Paper preferred and Lackawanna, Gulf States and Republic steels.  
There were numerous additional gains of 1 to 2 points among specialties, shipping, chemicals and utilities, the latter embracing Montana Power, but rails, apart from the junior issues, were at all times backward.  
Sales amounted to 1,135,000 shares, making the 22d consecutive full session in which transactions ran into seven figures.  
Railroad tonnage for the preceding week showed a moderate decrease in the middle west, but this was balanced by general business gains in that section as well as at more remote points, notably southwestern territory.
