## TRANS-CONTINENTAL AIR SERVICE TO BE ESTABLISHED SOON

By H. T. HOPKINS, (International News Service Staff Correspondent.)

PORTLAND, Ore., May 19.—Carrying both freight and passengers, numerous air liners will, in the not-far-distant future, be placed in service between New York, Chicago, San Francisco, Portland and New Orleans, according to Merle Thorpe, editor of Nation's Business, the official publication of the United States Chamber of Commerce.

eral business conditions, declared business is "looking up" literally, as well as figuratively. He stated the formation of a \$250,000,000 corporation in Boston, which will establish the mentioned air service, is only one indication that "business is looking up," judging from his extensive survey of conditions from coast to coast.

He asserted that contracts already have been awarded for the construction of two giant lighter-than-air flyers, which will be capable of carrying 700 tons of freight and 500 passengers, and which will be powerful enough to maintain a speed of not less than 110 miles an hour.

"These first two planes will be placed in service between New York and Chicago," said Thorpe. "Plans of the company call for the construction of nine other machines for service between Chicago and San Francisco with feeders to New Orleans and Portland."

Competition in Air Lines  
"Within a very short time business will have to adjust itself to 'look to the air' for there are other phases of air development that are demanding attention. There should be no time wasted in controversies between railroads and bus lines, for the real competition is coming in the air lanes."

"Another dramatic incident in development of air channels is the wild-fire growth of radio-telephony. Already there are 600,000 radio telephones in use in the country, and some programme of franchises of the air must be worked out to prevent some trust gaining a monopoly. Seven years from now I predict that every family in the United States will be able to hear the inaugural address of the President. Business must be ready for this development and the development of aerial carriers."

ANNAPOLIS ROYAL, NOVA SCOTIA.—A prize of \$5000 is offered by Frank Barnison, of Annapolis Royal, for a practical method of combatting and suppressing the spruce bud worm, bark beetle and borer, which caused so much damage in the forests of eastern Canada and United States.

Fortune knocks at the door but she won't search the house for you.

I hate you most tremendously  
I hate the very ground you tread;  
I hate with great intensity  
Your hands, your feet, your face,  
your head.

I hate quite everything you think  
And deeper hate the things you do  
I hate to eat—I hate to drink,  
Because you do the same things too.

The Modern Parable.

Long ago, the Wise Virgins arose, trimmed their lamps, filled them with oil, and went forth to meet the bridegroom. When he arrived, they were ready.

Today the W. V.'s drop a little beladonna into their lamps, trim their eyebrows to a thin line, darken their lashes and go forth to meet a bridegroom. When he arrives, they keep him waiting half an hour.

Dear Office Cat: While in Washington not long ago I noticed a peculiar thing in connection with the statue of Washington et al, in the Capitol Square. The general is looking at the senate and pointing to the penitentiary. Has this any significance?—I See it.
