Gerard, the former United States ambassador, spoke, as did two American generals. Many

Americans were here to decorate the graves."

**Land Bank Man Here.**  
 Making inspections of land on which farmers apply for loans from the federal land banks is the business of James McKittrick of Spokane, who is with the federal land bank there. Lumber has been stolen from the site, the contractor states. It is probable that a watchman will be secured to guard the lumber and material. The contract calls for the completion of the building by August 1.

**Maloney Wins Cases.**  
 Decrees have been handed down by Judge D. E. Parker in circuit court in which judgments asked by J. W. Maloney and Edgar L. Forest against L. Gagnon, James Duncan and Louis Hingle are granted. The judgments amount to \$526, \$572 and \$456 respectively. After the suits were instituted Omer Stephens started proceedings to enjoin the judgment for an account which he held against Forest which he said to have been contracted before the partnership between Forest and Maloney was formed. According to the decree of the court, Stephens' case is dismissed with prejudice and the defendants are awarded costs at the plaintiff's expense. The original suits against Gagnon, Duncan and Hingle brought by Maloney and Forest were to recover money claimed due for harvesting work done by the plaintiffs. Fee and Fee represented Maloney and Forest in the case.

## Two Sides of Turnover

The alert business man dealing with present day conditions knows that the big word today is "Turnover." Whether he be a merchant, manufacturer, jobber, or banker, he sees that one thing with a clear vision unbiased by the limits of his own business. It is in the air, and on the tip of every tongue.

And yet many of them—entirely too many—are thinking on only one side of Turnover. They think of it as meaning rapid selling—putting money in and getting it out quickly and at a profit. They realize that they must put greatly increased efforts back of all their plans for selling and distribution.

The other half of Turnover is the consumer. All selling plans and efforts fail if the consumer doesn't want to buy. His desire for the product must be created. He must meet the seller half way. He must be in a mood to buy before the salesman meets him across the counter.

That is the function of Advertising—

ing—to create consumer demand and consumer preference. With this demand as a fact all selling plans have a chance to succeed. Without it they fail. The only chance for salesmanship to succeed without an existing demand is for salesmanship to assume the task that belongs to advertising—the task of creating demand.

If the present efforts that are being put into selling were amply supported by a corresponding effort to create consumer demand through Advertising, the business conditions of this country would be rapidly changed into an era of great prosperity—in spite of Old World conditions and everything else.

The proof of this is in the fact that right now, under these very conditions, the manufacturers who are putting proper emphasis on creating a demand for their product, as well as selling it, are doing a big business and are actually getting the high turnover that others are trying so strenuously to get through intensive selling.
