

People Here and There

Three cars with eight passengers from states east of the Mississippi river camped at the Pendleton camp ground last night. One party of four was registered from Alberta, Canada. One party of five was from Iowa and a party of the same number from South Dakota and a party of four from Oklahoma spent the night in Pendleton. Other states represented at the party were from California, Colorado, Idaho, Washington and Montana. There were 34 cars registered with a total of 88 people. Following are those at the camp last night: Herb George, auditor, and Jack Potter; D. Porelin of Salem, with party of two; J. G. Specklines of Portland, two in party; J. R. Knight with party of three from Raymond, Wash.; John Hendrickson of Tigr, Wash., six in party; H. O'Keefe, wife and daughter of Seattle; E. Johnson of Portland, three in party; Floyd Bowers from Seattle to Montrose, Colo.; C. W. Thorne of Santa Ana, Cal.; Mr. and Mrs. H. C. Bjerring; E. Stocking of Grandfield, Okla., four in party; George Musser with party of five from Belle Plaine, Iowa; L. C. McLaughlin of Mitchell, S. D., five in party; Albert Scooby, electrician of Boise, Idaho, two in party; Fred L. Shepard, merchant, with wife and two daughters from Warner, Alberta; Chas. Hahn with party of two from Deer Lodge, Mont.; H. J. Van Westerner and wife of Detroit, Mich.; three from Jonesville, Ohio; Philip Peterson, farmer, and Willie Edwards of Twin Falls, Idaho; L. Ver-
 son of Pocatello, Idaho, three in party; C. B. Currey, physician of Portland, three in party; E. H. Ware, Coeur d'Alene lawyer with party of five; John Lees of Pomeroy, Wash., three in party; Everett Moon, printer, and wife on trip to Denver from Seattle; E. J. Moon with party of two from Denver; Frank Moss with

two in party; Eugene Lees of Ontario, Ore.; S. S. Walker of Myrtle Creek, five in party; James Davis, lawyer from Billings, Mont., four in party; and M. G. Niccum, Pet. Thompson and E. R. Niccum of Kokomo, Ind.

Earle K. Ray of Croton, N. Y., was a business visitor here today.

Al Slusher, who farms near Noim, expects to begin harvest within the next few days. He states that the warm days are hastening the beginning of harvest.

E. M. Burnham, of Salt Lake, is in Pendleton today. Mr. Burnham, who is in the grocery business in Salt Lake, states that business conditions are good. He is en route home after a visit in Portland. Mr. Burnham plans to visit Pendleton during the round-trip and will be accompanied by Mrs. Burnham and their son and daughter.

Out on the Columbia river the mosquitoes are plentiful and husky. Anyone who doubts this statement can have it verified by talking to Guy Cook who with Freddie Russell, J. A. Devin and Paige Long made a trip across the river last night in Cook's new motor boat. They were after bass, but the river was too high and they had no luck. But the mosquitoes bit hard and often, which resulted in the fishermen getting little sleep. They expect to try again as soon as the water is down a bit.

News Notes of Pendleton

Mercury Reaches 100. The mercury reached 100 today, with a minimum of 52 last night, says

DRY WEATHER IN JUNE CUTS CROP, KENT SAYS

PORTLAND, Ore., July 13.—Unusually dry weather over the greater part of the state during the month of June, following similar conditions during May preceding, has further reduced the 1922 crop prospects from the below average estimates of a month ago according to information gathered by F. L. Kent, agricultural statistician for the U. S. Department of Agriculture.

Winter wheat appears to have withstood the dry season better than any of the other grain crops. In the western part of the state it appears probable that the crop will make about an average yield per acre. The same is true of most of the eastern part of the state, although Wagon and Sherman counties report a prospect way below normal. Condition of the Oregon crop on July 1, was estimated at 85 per cent of normal, compared with 90 per cent on June 1, 100 per cent July 1, 1921, and a ten year July 1 average of 91. Present condition indicates a probable state production of 17,846,000 bushels, compared with a final estimate of 20,820,000 bushels produced in 1921, and a five year average of 14,867,000 bushels.

The United States winter wheat condition on July 1 was estimated at 77.0 per cent compared with 81.9 per cent, on June 1, with 77.2 per cent July 1, 1921, and a ten year average condition of 81.0 per cent. The July 1, 1922 condition indicates a probable crop of 569,274,000 bushels. The final estimate for 1921 was 587,022,000 bushels, and the five year average, 550,950,000 bushels.

The condition of Oregon spring wheat on July 1, 1922, was estimated at 70.0 per cent, a decline of 15 points during the month of June. Reports state that some of the spring seeding has already been "worked into summer fallow." Much of the acreage will probably not be worth cutting for grain. Last year's July 1 condition was 92, and the ten year average is 88. The July 1, 1922 condition indicates a probable crop of about 3,000,000 bushels.

The United States spring wheat condition on July 1, 1922, was estimated at 83.7 per cent of normal, indicating a probable production of about 247,560,000 bushels, compared with the 1921 final estimate of 297,861,000 bushels, and the five year average of 243,609,000 bushels.

The continued dry weather in June caused a drop in the estimated condition of oats from 92 per cent June 1, to 70 per cent on July 1. This indicates probable crop of about 7,209,000 bushels. Fall sown oats, of which there is a larger acreage than usual, are in much better condition than the spring seeding. The 1921 crop was estimated at 8,704,000 bushels, and the five year average is 9,735,000 bushels.

The United States oat crop condition dropped during June from 85.5 to 74.4 per cent, indicating a probable final production of 1,186,626,000 bushels compared with 1,968,009,000 bushels in 1921, and a five year average production of 1,374,332,000 bushels.

TO DEVELOP.

(Continued from page 1.)

states. Here we find the Pendleton standard of compensation is equalled or exceeded in many localities and by a number of state salary averages where educational progress is being made. The problem of teacher selection is, therefore, a difficult one and will continue so until the supply of able, well-trained teachers is considerably increased.

Attention of the board to the probable need within the next year or three years for a new building to take care of requirements is called by Supt. Inlow. Since the school year of 1913-14 the total school enrollment has increased from 1696 to 1481. He recommends that when a new building is provided that it be built for junior high school purposes. He suggests that a site for such a building might well be secured at this time.

Stress is laid on physical education, the report points out. The possession of good health is necessary both from the point of view of the happiness and success of the individual and for the defense of the county, the report says, and that is why special emphasis is placed on physical education.

Attention is also called to the emphasis which is being placed on the fundamental subjects in the local schools such as reading, writing, arithmetic and language studies. Vocational education is also an important part of the system's work. In connection with the "worthy use of leisure," Supt. Inlow calls attention to the increasing interest that is being taken by boys and girls in music and in art work.

WORKS FOR CHILD MUST KEEP WELL

Mothers in a Like Situation Should Read This Letter from Mrs. Enrico

Chicago, Illinois.—"I took Lydia E. Pinkham's Vegetable Compound for a serious trouble. I had tried doctors and all said the same—operation. At first I only felt the pain on my left side but later I seemed to feel it on both sides. I am a power sewing-machine operator and have a little girl to support. I work in a tailor shop and that line of work has been very slack this year and I am home part of the time. I do not like to take any chances, so I consulted my friends, and one lady said, 'Take Lydia Pinkham's medicine,' so I did. I have felt better right along and am in good enough health to go to work. I recommend your Vegetable Compound and Sanative Wash to all."—Mrs. MARY ENRICO, 459 N. Carpenter St., Chicago, Illinois.

Often the mother is obliged to support her children and good health is necessary. Lydia E. Pinkham's Vegetable Compound is just the medicine you can depend upon. It is a medicine for women's ailments and the relief it brought Mrs. Enrico it may bring to you. Keep well by taking Lydia E. Pinkham's Vegetable Compound.

Reports indicate that barley has suffered less over the state as a whole, than any other spring sown grain. There was considerable seeding of winter varieties last fall. The July 1 condition of barley is estimated at 83 per cent indicating a probable final production of about 2,150,000 bushels. The 1921 crop was 2,240,000 bushels, and the five year average, 3,176,000 bushels.

The United States barley crop declined during June from 90.1 per cent to 82.6 per cent, indicating a probable final production of 181,586,000 bushels. The 1921 crop was estimated at 151,181,000 bushels and the five year average, 191,921,000 bushels.

Hay yields have for the most part been somewhat below average per acre. Total production will be considerably below the average, except in some of the newer irrigated districts, where new alfalfa acreage is just coming into production. The second cutting of clover will be very light, and spring grains sown for hay will produce a very light yield. The alfalfa weevil is reported as having done considerable damage in Malheur county, and has been found present in some of the fields in southeastern Baker county. Alfalfa growers are of the opinion that the spread of this pest westward is only a matter of time. The total 1922 hay crop of the state will probably be about 2,150,000 tons.

Condition of the United States hay crop showed very little change during June. The 1922 production is

WHY THIS STORE SELLS GRUEN WATCHES

Owing to the fact that really fine watches can be produced only in limited numbers, the Gruen Watchmakers Guild confines the sale of its watches to a highly restricted list of jewelry stores—the best in each community. We have been chosen one of the Gruen jewelers for this community.

We have just received a new shipment of Gruen Watches—strap and pocket models for men and dress wristlets for women. We urge you to come in and examine them now while our stock is complete.

Sawtelle's Jewellery
The Largest Diamond Dealers in Eastern Oregon

now estimated at 106,750,000 tons. The 1921 crop was 96,802,000 tons and the five year average, 99,269,000 tons.

Reports indicate an increase in potato acreage over last year of about 7.0 per cent for the state as a whole. The present acreage therefor, is about 46,000. The July 1 condition was estimated at 85.0 per cent indicating a probable production of 5,150,000 bushels. Present weather conditions however, indicate a further falling off in condition during July, hence it is probable that the 1922 crop will doubtless be under 5,000,000 bushels. Very large increases in the early potato acreage are reported from the irrigated sections of Malheur and Umatilla counties. Most of this early crop will be ready for market during July and August. The 1921 Oregon crop was estimated at 3,912,000 bushels, and the five year average at 4,800,000 bushels.

The United States potato acreage for 1922 is estimated at 4,225,000 acres, being an increase over 1921 of 10.8 per cent. Condition is placed at 87.3, indicating a probable total production of 428,607,000 bushels. The five year U. S. production is estimated at 385,391,000 bushels.

The commercial apple crop was estimated on June 7, at 5645 cars. This estimate is believed to be fairly representative at the present. The commercial pear crop was estimated a month ago at 1074 cars. The Rogue River district prospect has improved somewhat, and local estimates are for 1600 cars in that district alone. The state crop therefore, should reach about 1300 cars.

HE'S SQUARE, ANYWAY!

POPULAR BLUFF, Mo., July 13.—(U. N. S.)—Cupid is not the kind of a guy that he is cracked up to be. Falling through the ordinary method, J. S. Williams, a farmer, living near Popular Bluff, has advertised for a wife. He told that he was thirty-eight and that any girl twenty years old, or younger, would be eligible as an applicant. "I am a hard-working fellow and guarantee any girl to be a good husband. I feel that wives are staple articles, and every man should have one. A wife is one of the necessities of a home," he said. Then Williams, after considerable thought, continued: "I have but one eye, one being put out while I was young. Of course, that hampers my facial appearance somewhat, but I want to be square and tell girls, so that they may not answer if they don't want a one-eyed man." If Williams succeeds—in getting his spouse through the medium of the newspaper want ads, he will have lost all faith in Cupid.

Cute, Bah Jove!

Miss Heather Thatcher, London society girl, wears a monocle at the races. That's equal rights for you.

As certain as a lighted candle will burn up its wax—

EVERY informed man and woman knows that the most important of all rules of health is *moderation*.

The man or woman who overeats is sowing the seeds of ill-health. Just as certain to shorten life as a lighted candle is sure to burn up its wax.

To feel your best, to do your best work, to keep healthy for many long, happy years, you cannot afford to eat heavy, indigestible food.

That's why men and women of energy and activity everywhere make Grape-Nuts a regular part of their diet.

Grape-Nuts is a sensible food, delicious, nourishing, satisfying and sustaining—a cereal food baked for 20 hours and made entirely from whole wheat flour and malted barley.

With milk or cream, Grape-Nuts is a complete food.

You'll find Grape-Nuts sold everywhere—grocers, hotels, restaurants, lunch-counters, etc.
