DAILY EAST OREGONIAN, PENDLETON, OREGON, FRIDAY EVENING, AUGUST 11, 1922.

**MANNING WITH ARRELL**

NEW YORK, Aug. 11.—(U. P.)—Right in the midst of all the tennis and polo activities, the hot baseball race, track and field sports and big golf, football pops out of the closet.

Princeton made the first gridiron crack of the year when Bill Roper, coach of the Tigers, sent the call for the candidates to report on Sept. 11.

Roper's big problem is to develop a quarterback of the caliber of Maury Trimble and Don Lourie, two All-American men. A tough job! Six candidates—Barry, Perenkopf, Ritchie, Winstate, Frewer and Gorman are out for the position. They are all promising and they will have to be stepped into the shoes of two such illustrious predecessors.

This time last year, Princeton was being hailed as the sure champion of 1921. A team of veterans was coming back and the combination had been so successful that nothing appeared in the offering to heat them. Injuries early in the season shot the eleven to pieces and instead of having the most

brilliant record of years, the Tiger machine was the biggest disappointment of the season.

Yale finds herself in the same position that Princeton was last year. The Elis lost a wonderful player in Mac Aldrich, but the team this fall will start with a bunch of veteran players and the prospects are bright for a championship eleven.

Harvard is also looking to a big season. Several empty places on the line will have to be filled, but the backfield will be a veteran combination of great ability.

Harvard looks to be heading for a better all-around season than Yale or Princeton. The Crimson lost only twenty-three major sport letters by graduation, while Yale dropped forty and Princeton lost eighty-one.

Because of the great success of the University of California eleven in the past two years and for the reason that

another big east-west championship can be expected in December, the east will be watching California football with great interest.

California's chances for 1922 depend entirely upon what kind of a new line Andy Smith can develop to succeed Latham, McMillan, Cramer, and Barnes, who have all left school, according to information coming from the coast.

The backfield is expected to consist of Witter, Morrison, Nisbit and Nichols. Nichols is said to be almost as good a passer as Brick Muller, last year's sensation, who has graduated. Erb will be back at the quarter and will be understood by O'Brien.

Dope filters east that California may not play one of the eastern teams this year, as they may have a difficult problem in winning the championship of the Pacific Coast from Stanford.

Stanford under "radio" coaching from "Pop" Warner and with his assistant "Tiny" Thornhill in active charge, is said to have most promising prospects.

"Uncle Charley" Moran announces that Centre is coming back to beat Harvard again this fall. Bo McMillan is gone, but Moran says he has a lot of other "Bo's" ready to step in the hole.

Iowa coming east to meet Yale and Princeton going west to play a return game with Chicago will furnish two of the most interesting inter-sectional conflicts of years.

## This Bird Flies, Swims and Runs

A new British plane returning from an experimental flight before U. S. Navy officials at Anacostia, D. C. It can land on land or water. If on water, the wheels are lowered and the plane makes its own way to shore.

## FORMER SOLDIERS TO COLONIZE IN HAWAII

HONOLULU, Aug. 11.—Colonization of the rural districts of Hawaii by "citizen farmers" recruited from among discharged soldiers of the United States army who have seen service in the islands and have their respective, as a part of their military training, courses in tropical agriculture, will probably result from a conference held at Honolulu between Major-General Charles P. Summerall, U. S. A., commanding the Hawaiian Department of the United States army, Executive George P. Cooke, of the Hawaiian Homes Commission, and Dr. Elwood Mead, noted land-settlement expert, of the University of California, according to announcements made following the conference.

The need of Hawaii for a class of citizen farmers to effect the influence of the large number of orientals now holding land in Hawaii, coupled with the expressed wish of hundreds of soldiers who annually receive their discharges in the islands, to remain there and settle down, caused the army authorities and those in charge of homesteading the agricultural lands of the Territory to get together with a view to outlining a working plan by which both objects might be accomplished.

The project, as now outlined and endorsed by General Summerall and Dr. Mead, contemplates the establishment, as a part of the Regular Army schools, of courses in tropical agriculture to be given throughout the enlistment term of three years. Experts from the faculty of the University of Hawaii would give the courses as a part of the extension work now maintained by the university. As an incentive to the enlisted men to take the agricultural courses, arrangements will be made to secure considerable areas of arable land, which may be apportioned in small sub-divisions on long-term leases to those making application. It is also planned to arrange for financing those who take up the land in this manner, as well as for furnishing them with free advisory service when they are actually on the land.

It is stated by General Summerall that large numbers of soldiers discharged from the army in Hawaii remain in the islands. Most of these men go into mechanical trade, and practically all of them make good, the General states.

## CAUSES OF DEAFNESS IN UNITED STATES

WASHINGTON, Aug. 11.—The department of commerce announces results of the special study of the causes of deafness among deaf-mutes reported in connection with the 1920 census. The census bureau included as deaf-mutes not only deaf persons literally unable to speak, but others totally deaf from an early age, who learned to speak by use of those special methods or means employed for teaching the deaf who have not acquired the art of speech in the ordinary way.

Schedules mailed to all persons reported in 1920 as deaf-mutes. Of 44,885 so reported, 35,926 filled out and returned the schedules. There were 22,592 who reported the cause of deafness, and of these 13,513, or 41.5 per cent, reported that they were born deaf.

So far as possible, causes of deafness were grouped according to the part of the ear chiefly affected.

Of those for whom the cause of deafness was reported, 5290, or about one-fourth, reported causes which do not cause ulceration.

Nearly one-fifth, 4429, or 19.6 per cent, were reported as deaf from causes which affect the internal ear. Those comprised chiefly 5378, or 18.3 per cent who were stated to be deaf from causes which affect the hearing nerve, and 272, or 0.8 per cent deaf from diseases which affect the labyrinth of the ear.

Of the specific diseases reported as causing deafness, scarlet fever accounted for 3,246, or 10.3 per cent; meningitis, together with "brain fever" (which is really meningitis in most cases) was reported by 4551 cases, or 14.0 per cent; typhoid fever accounted for the deafness of 642 cases, or 2.0 per cent; measles was reported by 1,933, or 5.3 per cent; and whooping cough by 436, or 1.3 per cent of those reporting cause.

Infantile paralysis, which was reported by only 0.3 of one per cent for 1910, was the stated cause of deafness for 226, or 0.7 per cent of those reporting. This notable increase was due to the severe epidemics of this disease which have occurred in recent years.

## PILES

Fatigue, Flushing, Itching and all other rectal conditions except Cancer permanently cured without a surgical operation. My method is painless, requires no anesthetic and is permanent. There is no confinement in bed, no interference with business or social engagements.

I eliminate all doubts as to results by agreeing to return your fee if I fail to cure your Piles. Call or write for booklet. Dr. C. J. DEAN, Second and Morrison Sts., Portland, Ore.

## HAWAII IS UNABLE TO CURB DRUG SMUGGLING

HONOLULU, Aug. 11.—Attempts to smuggle opium into Hawaii on a wholesale scale continue despite all efforts made by government agents to put a stop to the traffic, according to a statement issued by W. D. Allen, agent in charge of the narcotic squad of the Honolulu Customs Office.

Evidence recently has come to light implicating members of the Honolulu police force in attempts to smuggle opium into the Territory, and the theory is now held that the "opium ring" which is believed to exist extends into police circles.

A recent attempt to smuggle opium into Hawaii from a trans-Pacific steamer was frustrated by the customs officials, who forced the crew of a Japanese sampan which had met the steamer outside Honolulu Harbor to throw overboard two packages containing 150 tins of opium, valued at \$27,000, in order to avoid arrest. Information that this amount of opium has been dropped overboard from the steamer was secured from members of the crew, and it is believed that the packages were picked up by the crew of the sampan and later dropped when chase was given by police launch.

## QUITS SCHOOL BOARD WHEN CHILDREN FINISH

MIDDLETOWN, Me., Aug. 11.—Gus C. Kendall, school board member, has resigned.

Reason—the last of his children has grown old enough to quit school. In his place a woman has been named by the City Council, the first woman to win such a position in Middletown. She is Mrs. John G. Minnie, child of the Civic Club. She was against a man backed by Mayor Parker. The Mayor's choice was Monroe Keeton. He received only the Mayor's vote, and the Mayor then had to make the election unanimous.

DAVIDSON'S BREAD—Include a loaf in your order. Whole Wheat, Rye, Graham, Raisin and Cracked Wheat.

## BRITISH STUDENTS TO EXPLORE THE PACIFIC

LONDON, Aug. 11.—(A. P.)—Discouraged at the outlook in this country, disabled with the after-war Britain, but actuated mainly by a love of adventure, about a dozen engineering students of Loughborough college are setting out on September 1 for an uninhabited Pacific island belonging to Ecuador.

Most of them are ex-officers. Among them is an author, G. L. David who wrote "A Brot." He expects to find in the new settlement work for his pen as well as his hands. A 90-ton vessel is being made ready for the expedition.

The chief means of existence they hope to find by utilizing the resources of the island itself; the development of fruit-growing and the breeding of cattle.

All hands will be required to work, although climatic conditions, it has

been ascertained, are ideal and all they will need for food can be obtained without working, if they are content just to "loaf and invite their souls."

Their destined home, the adventurous say, is about 500 miles from the Panama canal.

A. C. Manning, a mining prospector, is revisiting Salem after an absence of 50 years.

### HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it—stop your system of Catarrh or Discharge caused by Catarrh.

HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves the catarrhal inflammation, and the Internal Medicine, a Tonic, which acts through the Blood on the Mucous Surfaces, thus assisting to restore normal conditions.

Sold by Druggists for over 40 Years. F. J. Cheney & Co., Toledo, O.
