BANK OF ENGLAND WILL HAVE NEW HOME SOON

LONDON, Sept. 1.—(A. P.)—The long projected rebuilding of the Bank of England will start almost immediately, the Daily Express understands. A meeting of the directors is to be held soon to make the necessary financial arrangements.

It is understood that the plans to be adopted are those of Herbert Baker, the architect who collaborated with Sir Edwin Lutyens for the new capitol at Delhi. Mr. Baker was also the designer of the South African government's administrative buildings at Pretoria, and of the cathedrals at Capetown, Pretoria and Salisbury (Rhodesia), and the Cecil Rhodes memorial on Table Mountain.

The staff of the bank of England is now double what it was shortly before the war, largely owing to the vast growth of the National Debt, and the existing accommodations are utterly inadequate. Sections of the staff have been working for a long time at various places in the vicinity of the bank.

A special committee of the directors, including Cecil Lubbock, has been considering alternative schemes for the rebuilding. The idea of razing the whole of the existing one-story building to the ground was, it is understood, abandoned, partly on sentimental grounds and partly because of the difficulties of obtaining accommodation for the staff during the reconstruction. The present proposal is to retain the outer wall, which abuts on

Threadneedle-street, St. Bartholomew Lane, Lombury and Princess-street. This wall, which entirely surrounds the site of between three and four acres, was erected from the designs of Sir John Scames about 130 years ago, shortly after the Gordon Riots, when the bank clerks, sword and pistol in hand, defended the bank against a furious mob.

The wall is in the classic Grecian style, and in some places is 40 feet high. Security demanded that it have no windows and the architect achieved the difficult task of making the wall look ornamental by masking it with Corinthian columns and blank windows. The new building will rise within the wall to a height of 70 or 80 feet above it, and will thus be nearly 120 feet in height.

"DIRY FLEET" PLANNED—SAN JUAN, Porto Rico, Sept. 1.—(A. P.)—Prohibition Director Mariano Pesquera soon will have a fleet consisting probably of one submarine chaser and two motor launches to assist him in catching persons bringing liquor into Porto Rico.

Requisition for this fleet recently was approved in Washington. The submarine chaser will have a roving commission, while the launches will operate from fixed bases.

CALGARY, Alberta.—Three new areas for the preservation of rare species of wild life have been recently proclaimed national parks. These are Nevelksian and Wawsarka Parks in southern Alberta, and Niwessawook Park in Saskatchewan. These reserves which include a total area of 58 1/2 square miles, have been set apart for the protection of the prong-horned antelope, of which there are about 100.

FARM LOANS

The American National Bank is in an unusually good position to aid those who desire long-time loans on improved and partly improved wheat and stock ranches, alfalfa land and small farms, all the way from three years up to thirty-four and one-half years.

The Hoover lifts the rug from the floor, like this—filters it upon a cushion of air, greatly "hoos" out its embedded dirt, and so prolongs its life.

The perennial beauty of a valuable rug is the reward of frequent and thorough cleaning. Such cleaning is easy to perform with The Hoover, because it beats... as it sweeps, as it suction cleans. All injurious embedded dirt is fluffed out by gentle beating. All stubborn litter is detached by swift sweeping. All loose dirt is withdrawn by strong suction. Only The Hoover combines these three essential operations. And it is the largest-selling electric cleaner in the world.

You may have a Hoover placed permanently in your home for a nominal sum, and its purchase arranged on convenient terms. You may also have it demonstrated for you any time, either in your home or in our store.
