### CIRCLE TO MEET.

The Bible Reading Circle will meet tomorrow afternoon at 3 o'clock in Parish Hall, Church of the Redeemer. A very interesting and enthusiastic meeting was held last Wednesday. The story of Balaam, as prepared and discussed by the members, proved to be one of the most interesting of the Bible narratives.

Mrs. S. A. Lowell has consented to hold the office of Dean again this year, with Mrs. I. M. Schanep and Mrs. Agnes Stillman as her assistants. Miss Ida Boyd is leader, and she has appointed the following heads of departments: Mrs. D. J. Hobart, head of the history dept.;

Mrs. N. Berkeley, literature; Mrs. Wm. Humphrey, music and art; Mrs. C. C. Whitman, story telling. Each meeting during the month is in charge of one of these ladies, who suggests the line of thought to be emphasized during the reading for that day and brings in supplementary readings to illustrate or enlarge upon her special theme, thus adding interest to the subject in hand.

The officers and members of the circle extend a hearty invitation to all ladies who would enjoy these readings. The outlines for each week's reading can be studied in the homes, so that the ladies may have the co-operation and assistance of the gentlemen in the family, who

will be welcomed as honorary members in that capacity.

### MARRIAGE IS SOLEMNIZED

At a wedding this morning at eight o'clock at St. Mary's Catholic Church, Mrs. Fred Walters, daughter of Mr. and Mrs. Fred Walters, became the bride of William O'Rourke. Father Patrick O'Rourke, of The Dalles, an uncle of the groom, officiated, in the presence of a small number of guests. Asters decorated the altar before which the ceremony took place.

The bride wore a tailored suit of blue, with collar of wolf and becoming hat of sapphire blue velvet. Her corsage bouquet was of Ophelia roses. Miss Peggy O'Rourke, cousin of the groom, was maid of honor. She was attired in blue tulle with sprigged collar and hat of wood brown. Her corsage was of roses. Albert Walters, brother of the bride, was best man.

Following the ceremony, a breakfast was held at the Walters home. After a short wedding trip to Victoria, Mr. and Mrs. O'Rourke will reside at the Security Apartments.

### SEC. HOOVER ADVISES BUSINESS ON TRADE

WASHINGTON, Oct. 17.—(U. P.)—A world information service revealing to American business opportunities for the sale of raw materials and manufactured products across the seas, has been established by the Department of Commerce under the direction of Secretary Herbert Hoover.

In little more than half a year, Paul J. Croghan, chief of the editorial division of the Department, has built up a news-gathering agency with more than one thousand correspondents, scattered in every corner of the globe and he has increased his "bona fide circulation" from 5,000 to 5,000,000.

All of this has been accomplished by a combination feature service, conceived and prepared by Croghan and his assistant, William L. Kilwein. This service is divided in three sections.

The first section is entitled "What the World Wants and Needs: Trade Opportunities." This publication is released every Monday and contains up-to-the-minute information from all over the world on needs of the various nations together with actual advertisements announcing the wants of specific concerns for American goods.

The second publication is released on each Tuesday and is entitled "Foodstuffs Around the World." Crop conditions, trade in foodstuffs and allied subjects are treated with in this portion of the service.

The third is the "Weekly Cable Service," compiled by the Department's foreign staff and touching upon general matters of interest abroad. Financial and economic developments in every country in the world are reported and forecasted expertly and accurately in this publication.

Based on the advertised circulation of newspapers carrying portions of our printed service weekly, we now have 5,000,000 readers. Papers which carry this news throughout every section of the United States and each carrier from a column or less to more than a full page. Under the old system of mailing out a daily commerce report we reached not more than 5,000 persons.

Six million readers, however, it was pointed out, is not the limit of the circulation of this news. Every paper in the country receives through its Washington correspondents or through news services the important or nationally interesting portions of the Department's service.

Every American consul, trade commissioner and commercial attaché, numbering in all slightly more than a

thousand, report interesting happenings in their sections of the world for use in Croghan's service. Reports come in by wireless, cable and mail, depending upon their importance. By way of reward for their efforts, newspaper clippings, all giving appropriate credit, are returned to the men from whom the reports originate.

"It works better than a salary," Croghan avers. "When they see all the publicity they get back in the States they redouble their efforts, and we could print an entire newspaper with the copy we get daily now."

Iron. These are natural builders. Remember too, that yeast vitamins must be thoroughly ironized in order to make you rise gloriously from your exhaustion. It is the first and last word in body force, nerve energy, blood richness, because it is Nature's own, your body breaking down in middle age, do you look older than you really are, is your complexion pale, ugly, coarse, muddy, spotty, is your blood watery, stomach weak, have you dark rings about the eyes, are you exhausted at little exertion? ### HOME DEMONSTRATION IDEAS FOR HOUSEWIVES

- \* The production of milk for butter making is not given the attention as a rule which it should have. The milk intended for butter making should be produced with as great care as that intended for market milk, for it is impossible to make high grade butter from anything but high grade milk.
- \* The barn and surroundings should be kept clean. No feeding or any other operation which will cause dust should be performed at milking time. The cows should be kept clean, and occasional brushing and the wiping off of the udders with a damp cloth before milking will be great factors in production of sanitary milk. The milker should have clean hands, milk with a dry hand, not allowing the milk to touch his hands before entering the bucket. The covered bucket also prevents a great deal of dust from falling into the milk.
