

**Manatees are the
state marine
mammals of Florida**

In 1981 singer/songwriter Jimmy Buffet and Bob Graham, who was then governor of Florida, started the Save the Manatee Club because manatees were put on the international endangered wildlife list.

The goal of the club is to protect the habitats where manatees live and reduce manatee deaths due to human interaction.

On their website you can watch manatees on their web cam during the season. The scars on their bodies identify individual manatees.

You can also adopt a real manatee through the club and help protect those manatees at one of three locations in Florida. On registration you get a full biography and a picture of "your" manatee.

For more information go to savethemanatee.org/coolstuff and to adopt call 1-800-432-5646.

Gentle Giants in Danger

In shallow salty waters and rivers, a large, slow-moving creature swims and grazes. It is called a manatee. A shy and very gentle herbivore, it is completely harmless.

For almost 50 million years, manatees have grazed the earth's tropical lagoons, rivers and bays. In Florida alone, there were once thousands of manatees. But now there are less than 3,000 in Florida. They are in danger of becoming extinct.

Varooooom! All too often the people who like to go boating in these same waters ignore the *Caution* signs. Manatees get cut by the sharp propellers and many die from these run-ins.

The warm, shallow waters where manatees live are disappearing or becoming polluted. This loss of habitat is another reason manatees are endangered.

Standards Link: Life Science; Living things depend on one another and the environment for survival; the physical conditions of the environment can change and these changes can be detrimental.

Worrisome Waters

When manatees accidentally eat trash left behind by humans, they can die. Help clean the lagoon by finding all of the things that don't belong.

Standards Link: Scientific methods; Sort objects by attributes.

What's That?

Manatees are mammals. To what animal is the manatee related? Complete the maze to discover the answer.

The Mermaid Legend

Long ago, sailors told tales of lovely sea creatures called mermaids. When early European explorers first saw manatees, they thought they were mermaids. Christopher Columbus wrote in his log book that they were not as beautiful as he had thought they would be.

"They are not as beautiful as they are painted, to some extent they have a human appearance in the face."

Manatee Facts

Manatees come up for air every to minutes.

Adult manatees eat over pounds of water plants each day.

Manatee calves are feet (meter) long when they are born and weigh about pounds. They grow to be about -feet-long and weigh about pounds.

THE MANATEE SECRET CODE

Standards Link: Life Science; When the environment changes because of natural or man-made forces some animals struggle to survive or become extinct.

Animals in Sports

Look at the sports pages of your newspaper. How many teams are named for animals? Why do you think each team chose that animal name? If you were to name a team the Manatees, what kind of sport would they play?

Standards Link: Social science; Connecting current events to students' lives.

If you are swimming in the ocean and a big alligator attacks you, what should you do?

ANSWER: Nothing. There are no alligators in the ocean!
