HB 2387 FOR PATIENTS: FROM BAD TO WORSE.

The Oregon state legislature will soon make a decision on HB 2387, a bill that increases health insurance industry profits at the expense of patients.

Recent changes to the bill weaken patient protections and keep Oregon's big insurance industry as the main beneficiary.

Insurance companies would be allowed to cut coverage of certain medicines—without notifying patients. And they would be able to offer fewer affordable plans—without lowering costs or increasing access to care.

Is that what our state stands for?

Contact your elected officials today, and urge them to do the right thing for Oregon patients.

VOTE NO ON HB 2387.
