# New fair coordinator talks parking, carnival

By BRITTANY NORTON  
East Oregonian

With opening day just over a month away, the Umatilla County Fair's new coordinator is working to make its second year at the Eastern Oregon Trade and Event Center a success.

Angie McNalley assumed the title of fair coordinator in April, after former fair coordinator Cyndie Driscoll resigned in March.

McNalley was formerly the administrative assistant of the fair, which acts as a support position for the manager. She said she is familiar with many of the responsibilities of being fair coordinator.

"It wasn't the right time in years past when our man-

agers have left for me to accept the promotion," she said. McNalley has a 16-year-old son, and said now that he is older she has more time to devote to the fair.

In addition to promoting McNalley to fair coordinator, the Umatilla County Fair board has implemented a variety of other changes in attempts to improve this year's event. One such change is the flow of the parking lot and the appointment of Luke Dynes as the fair's new parking director.

Although the new grounds at the Eastern Oregon Trade and Event Center had more paved parking

McNalley

spots than years past, many fair-goers left upset about how long it took to exit the lot at the end of the night.

McNalley said the fair board has ideas for the layout of the new fairgrounds to enhance parking, improve security and better serve vendors based on the general flow of foot traffic.

"I'm just excited this year because we've gone through our first year and we've learned so much and gone through a lot of the aches and pains," she said.

She also hopes to improve the carnival compared to years past. The company that supplies the carnival

rides, Davis Amusement Cascadia, is under new management and McNalley is optimistic that carnival rides will go more smoothly this year.

"There were issues with the contractors that the carnival was using and it kind of left a bad taste in everybody's mouth. And I know that over the years everybody has been asking for more rides, bigger rides and better rides, so that's where we're at this year," she said.

Nonetheless, McNalley said despite the stress of planning the fair, she enjoys seeing it come to fruition: "Watching it all come together. That's the best part."

The Umatilla County Fair is August 7-11.

# Pipeline project reflects on first year of connections

By ANTONIO SIERRA  
East Oregonian

The Employee Pipeline Project set modest goals for itself in its first year and largely met them.

A collaboration between Eastern Oregon Business Source, the Pendleton School District and Umatilla County, Employee Pipeline officials gave a progress report to the organizations involved with the project's inaugural year.

An offshoot of the Schools to Careers program, the Employee Pipeline's stated goal was to place five Pendleton high school students in career-track jobs by the end of the school year.

Employee Pipeline coordinator Bonnie Day said four students were placed at local jobs while six more had serious leads on future positions. The four students found work at well-known employers: the Pendleton Fire Department, St. Anthony Hospital, Sign Men, and the Oregon Department of Forestry.

Overall, the program engaged more than 40

seniors and helped connect them with more than 90 internships, job shadows, mentorship meetings and tours.

The Employee Pipeline team also learned a lot on what worked and what didn't in a year. Schools to Careers coordinator Christina van der Kamp called the "pre-beta" stage.

Pipeline officials found that meeting with students one-on-one several times throughout the year kept kids engaged with the program.

They also experienced more success when potential employers were flexible, whether it was sending human resources representatives directly to the school to talk to students, working with students to accommodate their school schedule or holding a job until after graduation.

But staff also saw areas where they could improve.

While Employee Pipeline worked with more than 40 students, Day said many students fell off after a while because they lost interest or stopped communicating.

The program also sometimes struggled to set up kids with employers eager to bring students in.

Wildhorse Resort & Casino was enthusiastic about Employee Pipeline, but it was often difficult to find transportation to send a student to Mission.

Interpath Laboratory was also a willing participant, but the program had trouble preparing students to work there.

While internships at the Pendleton Unmanned Aerial Systems Range are complemented by Pendleton High School's robotics program, there isn't an equivalent class for medical lab work.

Susan Bower, the director of Eastern Oregon Business Source, said van der Kamp and Day spent a significant amount of time going over job search basics like filling out an application or requesting a Social Security number.

Bower said she went into the program thinking every child had an adult role model who demonstrated good work practices. "I learned a lot," she said.
