

# SLEEVES UP

to move forward

**I could not wait to become vaccinated.**

For months, I worried about bringing the virus home to my adult son who is disabled with heart disease. I even bought a RV, parking it on the property and isolating myself on some of my days off, when I had been around Covid patients in the ER.

Now I am fully vaccinated, and my son is fully vaccinated!! And now we can enjoy the RV and adventure together.
