

GREENBACKS sell at 85 and 90 cents in Idaho City.

THE family of Gen. Sterling Price has returned to Missouri.

MR. WASHINGTON has bought the mill of Col. O'Neal, at South Boise, and has started it to running.

RICHARD RALSTON, who was shot in a personal difficulty some weeks since at Idaho City, is in a very precarious situation.

THE earthquake at San Francisco has had a fine effect in reviving the religious feelings of the people. It was much needed.

THE financial standing of San Francisco is much shaken, in the East, by the results of the earthquake.

A JAPANESE lately tried to assassinate the Tycoon. On being arrested, he committed "haskiri," which is the Japanese for suicide by ripping out the bowels.

NEW mineral discoveries have been made in the vicinity of Roby City. The specimens exhibited are even richer than those of the first mine.

THE Statesman protests that \$125,000 a year for a weekly steamer mail between San Francisco and Portland is too much. It is worse than that—it is a sinful waste of money.

GEN. WRIGHT and his wife were buried in the State House Square at Sacramento, with appropriate military honors, on the 22d of October.

THE Oregon Printing and Publishing Company have disposed of their interest in the Oregon Agriculturist to A. L. Stinson and A. C. Schwatka, by whom it will hereafter be published.

THE amount disbursed on this coast during the past nine months, ending September 30th, exceeded \$12,500,000, and the income of the Government for the same period, from all sources, amounted to \$8,000,000.

GENRITT SMITH lately declared at a temperance convention at Saratoga, that the temperance movement had been a failure, owing to the lack of faithfulness among its leading advocates.

FERDINAND PATTERSON was indicted in Boise county, I. T., for the murder of Sumner Plunkham, and his trial was set for the 30th of October. Before now the case has probably been decided.

GEN. BUTLER thinks that President Johnson's scheme of restoring civil governments in the late rebel States will not succeed. Gen. Butler's opinions on public questions are daily becoming of less importance.

IT is estimated that the Peace expenses of the Government will amount in the aggregate to about \$110,000,000 annually, while the income will, under the present laws, amount to some \$300,000,000.

THE Idaho Statesman says that if the Dalles and Boise City road "were better known to teamsters it would be more traveled." Yes; and if the Indians were subjugated, the road would soon be better known.

WALTER MARTIN left Rogue River Valley in July last for San Jose, California, since which time nothing has been heard of him. He was mounted on a good horse, and had \$600 with him. Foul play is suspected.

THE Folsom Telegraph says that a miner there who was nearly dead with inflammatory rheumatism, cured himself by the use of kerosene, applied externally, and also taken in small doses inwardly.

THE Idaho World has entered into the publication of its second volume. It is carefully written up, and is a valuable exponent of the mining and commercial interests of the Boise country.

THE Vesuvius Lode.—The Vesuvius Lode is a recent discovery, located sixteen miles up Moore's Creek from Idaho City. A shaft has been sunk; says the World, seventy-five feet on it, and ores are found which prospect from \$103 to \$415 to the ton. The owners think that it is a good thing, which is only reasonable on their parts.

ANOTHER PROTEST.—The Idaho Statesman of the 28th of October, protests against the policy of the War Department, in reducing the forces at the posts on the waters of Snake river, and says that representations of the threatening attitude of the Indian bands in the neighborhood of Boise and Owyhee have repeatedly been made by the officers stationed at Fort Boise, but entirely without effect. The shameful conduct of the War Department in discharging the volunteer forces could have been obviated by proper remonstrances, forwarded at the right time. It could yet easily be prevented if the itinerant Congressmen who have been through the infested districts, will take that interest in the matter which they profess to feel for the whole country. In point of fact, these gentlemen saw that in the mining camps people were perfectly secure from Indian hostilities; but they do not appear to understand that a state of war exists over a considerable tract of mining country, on all the great thoroughfares, and throughout the partially explored regions which furnish the most inviting field for the enterprise of prospectors. There is no difficulty in whipping the Indians as often as they can be caught, but the vast extent of country over which they roam renders it difficult for a small force to find them with any certainty. What is needed, is a sufficient number of detachments, to be sure and find the savages somewhere, and when found, those detachments should each be strong enough to defeat any band of them. As to the blanket and calico policy, it is contemptible, in view of past outrages committed by these red-skinned and red-handed assassins.

ABANDONED.—The project of putting a steamer on the Pen d'Oreille Lake, to facilitate the transmission of freights to Montana Territory, has been abandoned, for the present at least. The only remaining chance to secure the trade of that section to the Columbia River, is by having the Mullan road opened in time for the Spring trade and travel. The route to the Coeur d'Alene Mission, by the south side of the Coeur d'Alene Lake, sometimes called the Old Mullan Road, presents the best chance for a permanent route of any now engaging public attention. But unless the overflow of lands on the margin of the lake is obviated by drainage, even this road is not available during the Spring months and early in the Summer. Unless some very energetic action is taken in the matter, the business of supplying the Montana mines will fall into the hands of the St. Louis people, and we will have lost the trade of at least ten thousand of our best mining population.

THE ILLINOIS LODE AND MILL.—The Illinois Lode of gold-bearing quartz is located about five miles above Idaho City, on a gulch running into Moore's Creek. It is surrounded by a forest of pine, and is convenient to sufficient water for milling purposes. The lode is from six to fifteen feet wide, running from northwest to southeast, and dips at an angle of about forty-five degrees to the west. Two tunnels have been run into the lode, and in July last a ten-stamp mill commenced crushing rock from it, and has since been in continuous operation. The average yield, working all the rock as it was taken out, has been between \$45 and \$50 a ton. The gold averages the value of about \$15 an ounce. There is now a new mill of twenty stamps on the ground, ready to be put in operation in the Spring. The improvements at the Company's mines and mill are of a very substantial character, and are so arranged as to conveniently deliver the ores to the mill.

MINING BUREAU.—The preliminary steps to organize a Mining Bureau have been taken by some San Franciscans. Its principal object will be, so the projectors say, to collate evidences of the character and richness of the mines on the Pacific coast. It is more probable that one of its leading purposes will be to keep the mines of Idaho, Oregon and Washington Territory in the shade. This appears to be of as much importance to the Californians generally as the development of their own mines.

A MAN engaged in the queensware business in Salem, under the assumed name of Smith, has levanted, and left his San Francisco creditors in the lurch. It is said to be the first commercial failure which has ever occurred at the Capital.

GEN. HOOKER ON FARMING.—At the last annual fair of the American Institute, Gen. Hooker was in attendance, and made two speeches. The first was immediately upon his arrival at the place of exhibition, and was a very pretty piece of rhetoric; the second was after partaking of "refreshments," and was an eloquent and gorgeous piece of declamation, in which the General declared his preference for agricultural over military pursuits. The General declared that he was very "happy" to be present on such an occasion.

IF Sodom and Gomorrah had contained ten just men, we are told, those cities of the plain would not have had the filling knocked from under them. If San Francisco has the required number of blameless characters, the terrors of future earthquakes may be safely defied; but judging from the representations of one of the daily papers of that city, if the people depend upon such a contingency for impunity, they may find that they are leaning on a slender reed.

THE Washington Standard thinks that Washington Territory will be glad to get rid of Walla Walla county, as that Copperhead district was the cause of a Democrat being elected to Congress two years ago. This is certainly a very cogent reason for the segregation of Walla Walla from the Territory. "If your right had offend you, cut it off," and why not a county, my boy?

THE Pacific Christian Advocate says, "Thus far there seems to be but little prospect of colored people getting access to the ballot-box; just now the prospect is gloomy enough." The prospect is rather dark; that's a fact.

Columbia Lodge, No. 5, I. O. O. F.—Meets every Thursday evening at 6 1/2 o'clock, in Gates' Hall, corner of Second and Court Streets. Brothers in good standing are invited to attend. By order. N. G.
