 T. H. Hookmer, of Augusta, West Virginia, is at the Wright hotel.

Critical Ignorance.
 Alfred Noyes, the English poet, complained rather bitterly at a bohemian luncheon about certain adverse criticisms of his poetry.
 "I attribute these criticisms to ignorance," he said. "These critics are like the chap who was asked by his little son what hexameters were.
 "Why," the man said reproachfully, "surely you're old enough, Willie, to know that a hexameter is a public automobile."—Philadelphia Bulletin.

Beginning of the Drama.
 The theater in the only sense that is worth considering was born in Athens. Both tragedy and comedy spring from feasts in honor of Bacchus, and as the jests and frolics were found to be out of place when introduced into graver scenes a separate province—the true drama—was formed and comedy arose. The father of the Greek comedy was Aristophanes, who had lots of fun lampooning the public men of Athens. The creator of Greek tragedy was Aeschylus, born B. C. 525. In sublimity Aeschylus has never been surpassed. He is to the drama what Phidias and Michelangelo are to art.

Soldiers and Socks.
 The German soldier does not wear socks, but fuses-lappen. These are strips of cloth soaked in tallow and wound about the feet. They are supposed to be preferable to socks, in that they wear more evenly, are more easily cleaned and, when properly worn, are not so likely to wrinkle and cause blisters.
 Military authorities disagree, however, as to the relative value of socks and tallow soaked strips. Either covering, though, is considered preferable to the custom of wearing no socks, which has prevailed in the French, Spanish and Italian armies.—Outlook.

Secret of the Baked Potato.
 Occasionally a restaurant or a system of railroad dining cars becomes famous for its baked potatoes. At the San Francisco exposition several college girls operated an establishment at which the baked potato was the piece de resistance and cost 50 cents. All these successes have been based on a simple little trick.
 A potato should be larded before being baked, so as to fill up the porous skin and retain the full flavor. It is necessary to cover only the skin with a little lard, bacon grease or butter to accomplish the end.
 A potato so treated and baked just the proper length of time, usually three-quarters of an hour, will surpass a potato cooked in any other way. It must always be broken open immediately upon being taken from the oven, so that the steam may escape.—New York Sun.

Flood and Stone Head Congress Committees on Foreign Relations

REPRESENTATIVE FLOOD (upper) SENATOR STONE (lower)

Photo of Mr. Flood by American Press Association.
 So far as congress is concerned our relations with Germany and other foreign countries are intrusted largely to the foreign relations committees of the two houses. The house committee is headed by Henry D. Flood of Virginia (upper in picture) and the senate committee by William J. Stone of Missouri (lower). Senator Stone is also a member of other committees, but the chairmanship of the foreign relations committee is Mr. Flood's only assignment. Mr. Stone was in Missouri when the news of Germany's move reached America, and he returned immediately to Washington.

A POSER FOR THE JUDGE.

The Way the Accused Put the Case Up to the Court.
 Writing of Polish temperament and talent, Sidney Whitman in "Things I Remember" has an amusing story of a bright Polish Jew who traded in chemicals. He was brought before the law courts for selling poison without fulfilling the legal enactments bearing on such transactions.
 The magistrate proceeded to read out the charge when the Jew suddenly interrupted him with the question: "Excuse me, Mr. President. Do you understand anything about chemicals?"
 "Mr. S., the expert, is here in that capacity," replied the judge.
 "And you, Mr. S.," queried the Jew, "do you understand anything about law?"
 "You have just heard from his worship that I am an expert in chemicals. If you want to know anything about law please address yourself to the judge."
 "I ask you, Mr. President, just to consider the case for one moment. You are the judge of the court and admit that you do not understand anything about chemicals, and the expert tells us that he does not know anything about law. And I, a poor Jew, am expected to be familiar both with the law and with chemicals. Now, Mr. President, I ask you how you can possibly convict me?"

FINDING THE ALTITUDE.

How Airman Measure the Heights to Which They Ascend.
 Altimeters or barographs are used by aviators to measure the heights to which they ascend. Both of these instruments are constructed on exactly the same principle as the aneroid barometer. They depend upon air pressure. At sea level, where the air is much compressed by its own weight, the pressure is about fifteen pounds to the square inch, but at greater heights it becomes less. The barometer is governed by the pressure and so indicates the height above sea level.
 There are many forms of barometers. The simplest is a bent tube of glass, shaped like a very long letter J and partly filled with mercury. The upper part is closed, and the space above the column of mercury is a vacuum. The lower or hook end of the tube is open and subject to the pressure of the atmosphere. As the pressure becomes less on rising above the surface, the mercury in the long part of the tube falls. The extent of the fall indicates the height.
 Airplanes use one of these instruments mentioned, which are practically self registering barometers, and when the airplane comes down the instrument shows how high it has been carried.—Philadelphia Press.

Caught Both Ways.
 Mrs. Eze—My servant girl has left me. She said I had so much company there was too much work to do. Mrs. Wye—That's singular. Mine has left me too. She said I had so little company it showed I had no social position.—Boston Transcript.

Not Yet.
 Mrs. Bacon—Don't you think I'm entitled to a pension, John?
 Mr. Bacon—Why, no. A pension is something you get after you are through fighting.—Yonkers Statesman.

Spring Suits Are of Deep Interest Just Now

SHE PROMENADES.
 Built of serviceable navy gaberdine, a jacket cut with finely plaited hip insets on a line with the side plaits of the skirt, this natty suit is one of the newest models. The turban is of navy straw, remarkably fine, with four jet ornaments on the band.

JUST ACROSS RIVER OPPOSITE NEW HOTEL

Because nowhere else in Bend can you buy a desirable lot (50 x 110) SO CLOSE IN for only \$300. Easy terms.

HARRISON LATHAM COMPANY, Sales Agents

CHICAGO MAY DIVIDE ON BASIS OF COLOR

(By United Press to The Daily Bulletin)
 CHICAGO, Feb. 15.—Solution of the race segregation problem, made acute in recent months by the steady influx of southern negroes, is the aim of action taken today by representatives of the owners of 50,000 of the 100,000 better class apartments in Chicago. Segregation statutes, similar to the ones in force in St. Louis, will be involved.
 "We believe the interests of Chicago demand that white people shall not encroach upon the colored or the colored upon the white," I. O. Ackley, a member of the committee appointed to perfect plans for immediate action, said. "Therefore we strongly urge the segregation of the races."
 Action taken recently in St. Louis has been decreed constitutional by the supreme court. It is perhaps the greatest piece of racial legislation since the fourteenth amendment.
 The real estate men have also determined upon May 1 as the date for a general 15 per cent increase in all Chicago rentals.

INDIANA DEMOCRATS FACE FRAUD CHARGE

(By United Press to The Daily Bulletin.)
 INDIANAPOLIS, Feb. 15.—Seven high city officials and former officials, including Chief of Police Perrott, are charged here with perpetrating election frauds. All are Democrats.
