

The Lash

featuring
Marie Doro

a drama of social contrasts in which Miss Doro as a fisher maid of Brittany is introduced to Modern society and its temptations.

TUESDAY AND WEDNESDAY
BEND THEATRE

At the Movies

Bend Theatre.

Marie Doro will be seen at the Bend Theatre Tuesday and Wednesday in the Jesse L. Lasky production of "The Lash," a vital society drama, written especially for her by the noted writer, Paul West, and prepared for the screen by George DuBois Proctor. It is a Paramount picture.

For the story of "The Lash," Paul West has selected a forgotten little island, St. Batisse, and the drawing rooms of a fashionable society. The scenes of the picture are laid, was settled several centuries ago, by some hardy voyagers from Brittany and, although the rest of the world has advanced, this island still retains the customs and the religious bigotry of its ancestors. The inhabitants are ruled by a "Perfect," whose word is absolute law, and one of the customs is that any woman sacrificing her honor, is to be lashed, by the "Perfect," across the shoulders with a heavy whip.

Miss Doro is seen as the daughter of this "Perfect." She falls in love with a young chap from the outer world who has been nearly drowned and brought to her father's house. She goes to the mainland and they are married.

Later, she is the idol of fashionable society and an attractive young widow attempts to take the St. Batisse girl's husband away from her. How the girl of the island applies the law of her ancestors to this society butterfly, and eventually wins back her husband, is brought about in a manner which must be seen to be understood and enjoyed. Miss Doro is supported by a cast of unusual excellence, including such prominent artists as Elliott Dexter, James Neill, Veda McEvers, Raymond Hatton, Thomas Delmar, Jane Wolff, and others.

OPENING OF INN SUCCESS

(Continued from Page 1.)

public spirit and exceeding good taste of the creator of this beautiful place of entertainment and to express the hope that he may receive a rich reward not only in the plaudits of the multitude we ardently hope will follow us through its doors, but that he will also receive that more substantial return to which he is so richly entitled. Then follows my oft repeated conviction of the vast importance to every community and interest of the modern hotel or inn, as this has been so fittingly called.

"No single public institution cuts so large a figure in the framing up of social activities, the creation of the community spirit and in the development of all constructive work as the modern hotel. I am sure this one will make my Central Oregon R. R. work much easier.

"I have just come from Del Monte, where the newspapers have railroads built while you wait, and you don't have to wait long. Nevertheless, to be more serious, more railroad building and like activities are cooked up where our creature comforts are best catered to than the average of humanity ever dreams of.

"California's wonderful development has been more largely due to her tourist attractions, chief of which are her hotels and climate than to anything else. There are now 130,000 tourists in California spending over \$1,000,000 per day, \$30,000,000 per month, or \$120,000,000 for the four tourist months. Among them are thousands of investors and home-seekers who ultimately put many millions more into property or business enterprises or in buying and developing lands which would never have been done but for their first

trip as delighted tourists.

"These wonderful results of California tourist and hotel life in winter will be attained in large part in the Pacific Northwest when we are prepared to properly entertain that kind of people in summer. Bend's magnificent mountain views, glorious climate and other attractions now supplemented by this superb hotel will be the strongest possible magnet to accomplish this much desired result. Our country not only supplies everything for the summer tourist, but it affords business and investment opportunities far beyond their's.

"But we still lack one great essential—a through rail line from Portland via Bend to California and the east. We cannot hope to adequately realize on all these resources and attractions while our Central Oregon country is sidetracked by only one branch line service. Again permit me to appeal to you to join me in straining every nerve to bring this about at the earliest possible moment."

GIRLS KNOW LITTLE OF WAYS OF BABIES

Test Shows Harvard Men are More Intimately Acquainted With the Subject.

(By United Press to the Bend Bulletin)
CAMBRIDGE, Mass., March 19.—Twenty Radcliffe girls were asked by Prof. George E. Johnson, of Harvard, how many different ways a baby creeps. They could think of only two. Prof. Johnson derided their ignorance and said he asked 20 Harvard students the same question and got seven answers, to wit: They creep on all fours. They hitch along, using their hips for navigation. Some roll along like a ship in a stormy sea. Some, instead of creeping forward, creep backward. Some move on their hands, lifting their bodies as a man would on crutches. Some move forward with hands and feet in front, like a rabbit. Some put their heels in front of them, propelling themselves along. This test proved, the professor said, that the boys were more observing and had better memories than the girls.

LADY MARY HAMILTON MAKES WAR SUPPLIES

(By United Press to the Bend Bulletin)
LONDON, March 19.—Lady Mary

Hamilton, daughter of the Duke of Abercorn, celebrated her 21st birthday by working all day in a munitions factory, just as she has been doing for more than a year. During this time she has had one lay off, due to a rather bad accident.

They say Lady Mary is more than pretty, which likewise is true of Lady Capell, daughter of the Earl of Sussex, who began her war service as a nurse and is now a chauffeur. The latter's younger sister, Lady Joan, is parlor maid at Londonderry House, a hospital for officers.

The roll of beauty-on-the-job also includes Yvonne Fitzroy, daughter of Sir Almeric Fitzroy, who has been nursing in the Balkans under severest conditions for many months. There are others, also.
