Lorene Wilson, Chautauqua.  
Mary A. Hays, Chautauqua.  
George A. Patterson, Portland.  
W. H. Whitcomb, Portland.  
Mrs. Roscoe Howard and children, Deschutes.

## WANT WAR COMMENT IN ENGLISH ONLY

League for National Unity Urges Legislation of Order in Regard to Foreign Language Papers.

(By United Press to the Bend Bulletin)  
WASHINGTON, July 3.—Foreigners unacquainted with the English language will be deprived of newspaper reading as a wartime diversion if the recommendation that foreign language newspapers be compelled to print in English all editorial expressions and news bearing on this government's policies is adopted by the government as a war measure.

The American League for National Unity, which is fostering the move, urges federal legislation to enforce such a ruling and, if necessary, governmental control of all foreign language papers.  
The league charges that most foreign language newspapers disseminate news giving "secret aid and comfort to the enemy," and at the same time "only lukewarm support to the administration."

## BEND HOST FOR TWO DAYS.

(Continued from Page 1.)

of children can be packed into one conveyance, proceeded the Bend Water, Light & Power Co. display, showing the hot weather advantages of "cooking by wire." Rev. H. C. Hartman's Boy Scouts were a well drilled division.

The Oregon Fuel Co. and the Oregon Fuel and Transfer Co., both good industrial floats, were followed by the artistic W. O. W. display, and Glenn Slack's car, immediately afterward, was typical of the prosperous Central Oregon farmer. A boy and two pack burros, advertising the A. L. French store, gave a short interlude in the procession of vehicles, and were followed by the Bend Flour Mill Co. float, showing the large number of products manufactured at the local milling plant. Splendid exhibits of produce featured the Farmers' Union display, and a float labeled "Tumalo Land," carried a display of products grown in Central Oregon, and was followed by a number of cars driven by residents of the Tumalo section.

**Aged Veteran Leads Rifles.**  
The city fire department's new auto fire truck was followed by a company of the Bend Rifles led by Marsh Aubrey, veteran of the Mexican war. A submarine float caught the war spirit, and was first seen as "U-2," until spectators noted the second line, "should trade at Mannheim-er's."

Decorated cars driven by C. S. Hudson, Walter Coombs, Hugh O'Kane, W. H. Staats, W. H. Martin, and J. Ryan, preceded floats and cars from the Bend Garage, the King Bee Dentists, W. P. Downing, F. Thordarson, and the Presbyterian Sunday school.

Contrasting sharply with the up-to-date motor vehicles which had gone before, was the turnout driven by E. A. Smith, a "horseless carriage," formerly owned by Judge H. C. Ellis and said to be the first auto brought into Central Oregon.

**Exercises Close Morning.**  
Many cars joined the parade at points along the line of march, and when the end was reached, it was only that the crowd repair to the Chautauqua tent for the patriotic exercises which came as the climax to the morning's program.

Prizes awarded for the parade were as follows: Best decorated float, Parent-Teacher association; most distinctive marching division, Red Men; best decorated private automobile, Walter Coombs; best decorated Ford, F. Thordarson; most antiquated automobile, E. A. Smith; most prosperous appearing farmer, Glenn Slack; best decorated Maxwell, Miss Marjorie Hoover; second best decorated Maxwell, J. Putnam; best individual character, Fred Kasprovtz.

The patriotic program was well handled, and consisted of the singing of The Star Spangled Banner, by the audience, a solo by Mrs. N. F. Reed, a trio by Mrs. Fred Fish, Mrs. Genevieve MacLaurin and Mrs. Dell Parker, and the oration of the day, an excellent address given by Jay H. Upton, of Prineville. H. H. De Armond, of Bend, introduced the speaker.

## SUBMARINES IN WARFARE.

Only Men of Iron Nerves and Quick Decision Can Work Them.

"It calls for men of iron nerves and quick decision to man our submarines either in peace or war," writes Frank E. Evans in St. Nicholas. "Submarine experts look upon the factor of nerves as the most important of all, and they have given to it the title of calculation."

"Within the cramped walls that are the home of the crew are housed the most intricate mechanisms that man has invented for warfare. Outside its steel walls are mines, great nets of wire, explosives, shells and scapines, all devised for its destruction, and the sharp keels of ships that slice through them as a knife cuts cheese. The smallest shell can penetrate them, and nets can hold the submarine as helplessly as a child in the grasp of a giant."

"Danger lies everywhere for the tiger of the seas. The ocean in which it lives is a powder tank that waits but for a spark. Only nerves of iron can cope against such an array of enemies. The slightest hesitation of its captain in the face of any of them means the end of his ship and his crew."

"As one expert has put it, the whole A B C of submarine warfare is to act at an instant's warning with nerves of steel."

## MAKING GASES LIQUID.

Knowledge of the "Critical Temperature" Solved the Problem.

In regard to the boiling points of liquid, there is an upper limit to the point at which a thing boils—that is, changes to the state of vapor. It is called the critical temperature. No matter how great a pressure exists on a substance, if it is at a temperature greater than its critical it will change to vapor anyhow.

The ignorance of this point held back the making of liquefied gases—such as air, carbon dioxide, etc.—for many years. The experimenters tried to liquefy gases at ordinary temperatures by enormous pressures, whereas if they had just cooled the gases below their critical temperatures before applying the pressure liquefaction would have ensued immediately.

This is the method employed today in making liquid air. The air is compressed at first and then allowed to issue from a small orifice, thus expanding and cooling; is then pumped back and compressed by the pump, allowed to go through the orifice again, thus cooling still more, until at last it is below the critical temperature, when the compression caused by the pump liquefies it.

## GIRLS DIRECT WORK IN DUMA BUILDING

Women See No Reason Why Their Equality With the Men of Nation Should Be Doubted.

By William G. Shepherd,  
(United Press Staff Correspondent.)

PETROGRAD, July 5.—Sitting at an office table in the great Duma building, surrounded by hulking soldiers today sat a fascinating bobbed-haired girl who might have come from Washington Square, New York. She was eating a red-beet soup, in which she dipped black bread.

I was directed to her with my request to pass the Soldiers' and Workmen's Council. When she had finished her soup, she called a soldier who carried a rifle and directed him to take me to the proper office for passes. As I left, she was ordering another soldier to remove her soup plate.

The soldier led me to another office and there presented me to a woman who as to appearance might have been Emma Goldman herself. This woman looked at my passports, said something in Russian to another

## The Triumphant March of

A NEW CREATION OF SCIENCE AND NATURE

WHEN we announced Bevo recently, our hopes were high. We knew that we had the most unusual soft drink that had ever been offered: A leverage combining the nutritive extracts of wholesome cereals, the zest of Saazer Hops, a flavor all its own and absolute purity. We knew this because, true to our own ideals, we had experimented for years before we were satisfied to say, "We offer you Bevo—it is a different soft drink—it's good and it is good for you."

High as were our hopes for its reception, we have realized them far and beyond our expectations.

Bevo today is an established popular success. Everywhere the same question is asked:—"Have you tried Bevo?"

Now, one final word. We promise you that, in accord with the known principles of Anheuser-Busch and all its products, Bevo not only will forever maintain its present high standard of quality, but as time goes on our great endeavor shall be to make this soft drink even more perfect in every detail of its goodness.

You will find Bevo at inns, restaurants, groceries, department and drug stores, picnic grounds, baseball parks, soda fountains, dining cars and other places where refreshing beverages are sold.

Guard against substitutes. Have the bottle opened in front of you, first seeing that the seal is unbroken and that the crown top bears the Fox.

Bevo—the all-year-round soft drink

Bevo is sold in bottles only, and is bottled exclusively by ANHEUSER-BUSCH—ST. LOUIS

BLUMAUER & HOCH,  
Wholesale Distributors,  
Portland, Oregon.

soldier, who led me to another office and got me the paper I required.

It must be remembered that it was two women who had the say as to my admittance to this gathering of the people Russia. My final experience seemed to me like asking Emma Goldman for a pass to the national democratic convention.

I have simply cited these instances to show that the women are equals of the men in the new Russia.

Today that equality was even more strikingly illustrated by a big celebration. And there were as many women as there were men in the parade. Many marched arm in arm with men comrades, and the voices

of hundreds of thousands of women mingled with those of as many men in the chant of the Internationalist Socialists' Union.

It's true that women rank with men in the new Russia. It doesn't seem to have occurred to anybody that there might be any question about it.

## Be Sure of Authentic Shoe Style

A random selection of a pair of shoes sometimes does very well, but more often is a disappointment. Shoes should never be bought at random any more than a dress or hat, because, to-day, shoes play a most important part in the effect of a woman's attire.

Our Specialty is shoe fashions, and by consulting us before buying your shoes you will know that your selection is in harmony with the latest dictates of fashion. It costs you nothing, but may mean much to your personal appearance.
