### Introduction of Labor Clauses in Treaty of Vast Importance, Declares Report Issued by the Executive Committee.

(By United Press to The Bend Bulletin.) ATLANTIC CITY, June 9.—Five hundred and fifty labor leaders from all parts of the United States assembled here today for the 39th annual convention of the American Federation of Labor. The gathering is one of the most important in the history of the organization, in the opinion of many delegates.

With labor troubles threatening this country, and with discontent sweeping over Europe, President Gompers is faced with the difficult task of holding the more radical elements in check, and at the same time obtaining the maximum concessions from employers.

### Treaty Endorsed.

Unqualified endorsement was given the peace treaty and league of nations covenant by the executive committee of the federation in its report.

The basic principles of a lasting peace are in the treaty, the report says, and adds that with a peace so built, "the world has in truth been made safe for democracy."

The covenant of the league of nations, the report continues, "must meet with the unqualified approval and support of the American working people. It is not a perfect document and perfection is not claimed for it. It does, however, mark the nearest approach to perfection that has ever been reported in international affairs of mankind."

"We declare our endorsement of the triumphs of freedom and justice and democracy as exemplified in the covenant of the league of nations."

### Labor Recognized.

Discussing the peace treaty as a whole, the report states:

"The introduction of nine specific labor clauses in the peace treaty declares that the well being, physical and moral, of the industrial wage earners, is of supreme international importance.

"No such declaration has ever been written into international law through any previous treaty of peace and it is due to the efforts of American labor more than to any other single factor that it appears in this emphatic form in the present treaty."

A long reconstruction program, called the "most complete and most constructive yet made in this country," is set forth in the report.

### Program Inclusive.

The questions chiefly featuring in the program are democracy in industry, unemployment, wages, hours, women in industry, child labor, status of public employes, cooperation, political policy, government ownership, waterways and water-power, ownership of land, regulation of corporations, freedom of speech, immigration, taxation, education, employment agencies, housing, militarism, soldiers and sailors.
