C. M. BONNER WANTED ON BAD CHECK CHARGE

Lake county officials are searching in vain for a trace of C. M. Bonner, charged with issuing fraudulent checks, it was learned here today. Bonner was formerly a resident of Bend. Just before the warrant for his arrest was made out, Bonner left for Burns by auto and was last seen at Ontario.

MRS. A. C. READ AND BABY

"I think it is the most wonderful thing that has ever happened—I knew he would make it." So said Mrs. Albert C. Read, wife of Commander Read, who made the first flight across the Atlantic in an airplane. The photograph shows Mrs. Read and her five-

TOO FEW USE THEIR BRAINS

Result Truthfully May Be Said to Be the Greatest Waste in the World.

The recent invention which renders wireless transmission independent of atmospheric conditions and the discovery by which seven messages can be sent simultaneously over a telephone wire are striking instances of latent possibilities long unsuspected.

For thousands of years we did not even suspect the existence of electricity, and, being ignorant, derived no advantage from it.

If we had never heard music, we would say it was merely the dream of a simonist to expect the most beautiful harmony of sounds from a combination of wood, intestines of a dead cat and hairs from the tail of a horse. But the violin, plus the man who knows how, accomplishes the wonderful result.

Active talent is the source of both quantity and quality of production, and that does not lie in capital but in men, and it usually is latent.

Every man has power and courage, but not all of them know it.

David had it, and knew it, and he led Goliath.

Foeh was not plucked from the "four hundred."

And Lincoln came from a log cabin.

Not only once in a while, but very often, nature takes a particularly "raw" bit of material and shows up what is in it. It is a suggestion for use to do likewise with ourselves.

The greatest waste in the world is the unused brains.

TAKING HIM DOWN A PEG

Visitor's Comment on the Intelligence of His Host Verged on the Caustic.

Two old men, one a bachelor and the other a widower of many years' standing, have lived on small adjoining farms in the southern part of Washington county for many years. Not long ago one of them inherited a small amount of money and he immediately put it to use by building a new shack on his land.

When the house was completed he asked his old friend and neighbor to come over to spend the night. After supper they sat by the fire and smoked and talked, and finally, when conversation began to lag, the visitor turned to his host and said:

"You say this home is all done and paid for?"

"Yes," was the short reply.

"And you planned it all yourself and hired the carpenters and everything?" the guest insisted.

"Why, yes, of course, I did. What's the matter with you?"

"Oh, nuthin' much," yawned the visitor. "Only if I was smart enough to buy a house and build it and then'd just folks to come to see it, I'll be darn'd if I wouldn't know when it was time to say something about going to bed."—Indianapolis News.

Shark Salad Wins Favor.

Shark meat is delicate in flavor and texture, and sharks are plentiful in certain parts of Florida, but the fishermen do not catch them because they are not salable. The home demonstration agent of Monroe county, Florida, decided last winter on an effort to establish in favor this fish now under the ban. At her request a fisherman caught one, but warned her that no one would eat it. Undismayed, she invited a large company of women to a home economics luncheon at which was served a fish salad. When all had tasted the salad she asked for a vote as to how many liked it and wanted the recipe. Without exception the women voted their hearty approval, and thus proved to themselves that their prejudice was without foundation.

Increasing Use of Castor Beans.

The use of castor beans for making oil increased very rapidly in 1918. Great Britain imported from India from 3,500 to 4,000 tons per month. They were used in making a motor lubricating oil. An effort was made last year to plant large areas of the beans in the southern part of the United States and in the West Indies and Brazil. So far most of the beans have been raised in India from which some 1,723,000 gallons of oil were exported in 1916-17. This bean is a form of our common garden castor bean used as an ornamental.

Recent Spanish Inventions.

Recent inventions reported by Carl Bailey Hurst, American consul general at Barcelona, include a straw compound as a substitute for coal for locomotives and agricultural tractors, as it develops sufficient heat in thirty minutes, and the ashes make an excellent fertilizer. This is invented by Joaquin Estevan, the engineer. Another patent is by Thomas Roza of Las Palmas, on a process for the use of banana fibre for textiles, yarns and cords as a substitute for hemp.

Becomes His Mother's Uncle.

His own mother's uncle, his grandfather's brother and a great-uncle to his half-brother is the peculiar status of five-year-old Irving Tucker, who was adopted by his great-grandmother, Mrs. Johanna Freitag of Mount Vernon. The boy's mother, Mrs. Mabel Hauser, agreed to the legal adoption. He has lived with his adopted mother since the death of his father, more than four years ago.—Brooklyn Eagle.

Wireless vs. Wire.

Will all the telegraph and telephone poles, wires and instruments connected with these methods of communication be simply so much "scrap" in a year or so? Representative Steenerson of Minnesota, ranking Republican member of the house post office committee, predicted "Yes," if the progress now being made in wireless communication continues. Mr. Steenerson, as quoted in The Wireless Age, says: "Radio communication is the coming thing. It is making such rapid strides that before the end of the year the average American will not be bothering much about the transmission of an ordinary message over an ordinary telegraph or telephone wire or as to whether the ordinary telephone or telegraph wire is owned or controlled by government or private interests."

Spoiled Sarah's Great Scene.

During a performance of "Hamlet," in which Sarah Bernhardt was impersonating the melancholy Dane, the graveyard scene was entirely ruined by the unfortunate appearance on the stage of a cat, which walked in from the wings and began to wash its face. The Divine Sarah, somewhat disconcerted, stamped her foot, and the cat, taking fright, jumped—into the open grave, the resting place of "poor Yorick!" Madame withdrew and the curtain descended. A cat can look at a king, but not at a queen—of the drama!
