Your Laundry Done For Less Than

5¢

Terms: \$5 Cash

Balance in Small Monthly Payments

No Wash Woman would "look at" your wash for only 5 cents. She would want a good price for her day's work—even though the clothes were not washed clean. You would probably have to pay her extra "car-fare money," and then you wouldn't know whether she would put in an appearance or not. If you send your wash out to the laundry there is considerably more added to your expense. Your clothing is pretty sure to be mistreated, and wears out in almost no time.

The Apex Electric Washer

Has solved the laundry problem for thousands of other homes—It will solve yours just as easily.

The APEX will do a small family wash in 15 or 20 minutes at a cost of about 2 cents for electricity. It will do a big wash in an hour, or so, at a cost of about 5 cents. Your clothes will be washed clean. No extra rubbing will be necessary. No wash woman or laundry ever washed them cleaner.

Think of it! Perfect satisfaction, no work, and almost no expense. Your clothes last as long as they should—in fact longer than when they were washed by the old wash-board way. GREAT WORK, you will say. It is true, every word of it.

Come in today, or any day this week, and let us show you how perfectly the Apex does the work.

The APEX washes your clothes and linen PERFECTLY—without wear.
Washes in about half the time required by other machines.
Is made entirely of metal (except wringer)—no wood to rot, warp, or splinter.
No heavy, dirty cylinder to lift out.
No sour laundry odor.
No sour laundry odor.
Swinging wringer—may be placed in any position.
These and many other points of APEX superiority will be demonstrated to you here at any time.
