MONDAY, JUNE 30, 1910.

## SATURDAY'S VOTE.

Saturday's election finished the job that was begun last winter when the new city administration first discovered that it was going to be short of funds with which to pay the city's running expenses. Aside from the council's abortive attempt to care for the situation by a bond issue, the business has proceeded slowly, but inevitably, to the proper conclusion—the payment of our bills by a tax. We say "inevitably" because we thoroughly believe that the people may be depended upon, when all the facts are before them and they have had time to digest them, to do the right thing. In this case the right thing has been done.

The council was reported to have been sore at the defeat of the bond measures at the previous election in May. If it was sore then it ought to be highly gratified now because the people have taken their word for the amount of money needed and signed a check for the full amount. There has been no argument over items or charges that all that was called for was not needed. In short, the former vote did not indicate lack of confidence in the council so much as dislike of the bonding measure. Full confidence is shown by the big majority in favor of the tax measure.

The vote in favor of the library tax is the first real recognition ever given here to this most important feature of our community life. With this start it is to be hoped that we shall progress to the establishment of a real library here.

It may be some satisfaction to Germany to know that she has her beer left. That's more than we can say.

Today and tomorrow are moving days in Bend.

Prices may be going up, but the mercury takes a drop now and then.

## GRATEFUL FOR ONE THING

Soldier Might Have Seen Good in Other Changes, but Not in That Last Greeting.

The man who had volunteered his life for his country came back from the western front. His experience had completely changed him. He carried within the sense of an entirely new world.

He went to Washington. He heard the speech of a senator. He saw the lobbyists consorting together. He wanted something, and he waited for it in vain.

"It is the same old crowd," he said. He met the girl he loved—with another fellow. She told him that she still loved him and that the only reason she was with the other fellow was because she was lonesome for him.

"It's the same old girl," he said. He traveled on a railroad. The guard was surly. The train was late. The food was poor. The rate was nearly double.

"It's the same old transportation—only worse," he said.

He reached his home town. He was met by a delegation and a band. Within two weeks four of his neighbors had gotten the best of him, another borrowed half his pay, and at the end of a month when he walked down Main street no one knew him because he was broke.

He went back home. There was a woman waiting for him on the doorstep.

"My baby hero!" she said. And putting his arms around her, he replied:

"Same old mother—thank God!"—Thomas L. Masson in New York Evening Post.

## Shelves Are Fireproof.

Not a stick of wood is used in two fireproof houses being built in England as an experiment, says an illustrated article in Popular Mechanics magazine. Concrete and steel are used exclusively, the floors being of jointless composition with rounded corners, while window frames, trimmings, doors, staircases, and even the cupboard shelves are of steel. The cottages are fitted with every modern improvement and are said to have excelled similar dwellings of wood or brick, both in time and cost of construction.

## U. S. TO TAKE WATER WAGON SEAT TONIGHT

(Continued from Page 1.)

### Enforcement Is Problem.

The productive wealth and efficiency of the country will be increased 15 per cent., "dry" leaders claim, basing this on reports from prohibition states.

Fifty thousand druggists will be put under strict license not to sell liquor except for medicinal or scientific purposes.

Enforcement of prohibition, even dry leaders admit, will be a big problem for some time. Even with congress designating a definite agency for the work and clearly defining how much alcohol makes liquor intoxicating, the task seems stupendous.

### Stupendous Task Faced.

The work of government agents means, if bone dry prohibition is to be strictly enforced, the elimination of a per capita consumption of 19.4 gallons a year from the American people. Latest figures show the consumption of malt liquors in the United States as 2,053,457,000 gallons; wines, 52,418,000 gallons, and alcohol, 146,397,000 gallons. These figures probably have been reduced during the last year because of the rapid advance of prohibition.

### Prohibition Fight Spectacular.

Achievement of national prohibition has been one of the most spectacular, as well as one of the longest, reform movements in American history. Prohibition gained little ground until the present movement started about 15 years ago. Then there were only three dry states—Maine, Kansas and North Dakota—although many counties in the south had voted local option.

Maine was the first state to adopt prohibition, restriction being placed on the sale of liquor there in 1846. Real prohibition was enacted in 1851 there, but was repealed in 1856. Then again in 1858 it was re-enacted by a 5 to 1 vote.

## BOOZE RUNNERS FIND WORK TOO HAZARDOUS

(Continued from Page 1.)

driver of the second machine and to note the spot at which the second load of whiskey was hidden.

Fearing that his cache was to be rifled, the second autoist kept the other under surveillance for two weeks after arriving in Portland, and finally raced to La Pine, only to find that the man under suspicion had passed him on the road. Rather than have his liquor stolen from him he called up Sheriff Roberts, who, accompanied by Constable Nixon, raced to La Pine, picked up the man who had turned informer on himself, and went on to Crescent, meeting on the way the car which had gone from Portland to rob the cache. But the car was empty, and no liquor was left when the officials arrived at the hiding place to which they were guided.

It may have evaporated, but Sheriff Roberts is inclined to believe that the auto which they followed was only a blind, and that a car which actually removed the whiskey to a new cache had been sent out several hours before.

## DEPUTIES TO PASS ON WORLD TREATY

Premier Clemenceau Submits Pact for Ratification—Protective Alliance Also Presented.

(By United Press to The Bend Bulletin.)  
PARIS, June 30.—Premier Clemenceau today submitted the peace treaty to the chamber of deputies. He also submitted the Anglo-Franco-American protective alliance.

## POLK IS SCHEDULED TO REPLACE LANSING

(By United Press to The Bend Bulletin.)  
PARIS, June 30.—Frank Polk, under secretary of state, is scheduled to replace Lansing on the American peace commission when the latter leaves for America. It was learned today. The date of Secretary Lansing's sailing has not been fixed.

## TUMALO STATION IS OPENED TO MACHINES

That the road to the Tumalo ranger station is now open to autos is the report today of Judge H. C. Ellis, after getting through to the station yesterday. One bridge is down but may be crossed with safety, he says. Snow still lies deep around the ranger station.

## SUPERINTENDENT OF CHAUTAUQUA HERE

R. O. Youtz to Complete Preliminary Arrangements for Series of Entertainments in Bend.

R. O. Youtz, superintendent of this year's chautauqua, arrived in Bend yesterday to complete the preliminary arrangements for the affair which opens on Wednesday afternoon and continues through July 7. Notice of the programs given in other towns indicate that they are well up to the standard of past years and six days of real entertainment are expected.

The sale of season tickets is progressing favorably. Although few of the guarantors have made their returns, reports are that practically all of the tickets are now sold or spoken for, and it is expected that the full guaranteed number will be sold easily. As soon as the guaranty is reached the sale of season tickets will stop and no more be sold except at an advanced price.

Arrangements are being made today for the erection of the tent and seats on the Chautauqua grounds adjoining the Cozy hotel and across Wall street from the Pilot Butte Inn.

## BEND INSTRUCTORS SAFE ACROSS PASS

Miss Margaret Hanson and Miss Beatrice Cheney, instructors in the Bend high school, who left last week on a hiking expedition to Eugene over the McKenzie pass, have reached their destination in safety, according to a wire received by Mrs. H. G. Ferris of this city.

The two were taken to beyond Sisters by auto and from that point made 28 miles before they stopped for the night at McKenzie bridge. While crossing the pass they found many deep drifts, and believed that the road will not be open to automobiles for some time to come.

## NECESSARY TO KEEP BOOKS

Without Accurate Accounts No Form of Business Can Be Successfully Carried On.

Accountancy, which is the science of systematizing business, has a history that runs back at least 4,000 years. Very early in the development of nations it was found that in commerce as well as in the affairs of state, systematic and careful account-keeping were indispensable. These systems were, at first, crude and laborious, but they at least kept the finances of the nation and the marts of trade from being chaotic.

The invention of double entry book-keeping early in the fifteenth century by the merchants and bankers of Venice gave to the commerce of Europe an invaluable trade instrument, and one without which the great commercial enterprises of the later centuries could hardly have existed. And so it has been on down to the present time; there has been a parallel progress between the accomplishments of commerce and the science of accounting, and it is known to every man in business that the former could not continue without the latter. Even the most unbusinesslike people know this much, and we can hardly imagine anyone silly enough to attempt to carry on any kind of a business enterprise without keeping books.

Bookkeeping, as a formal subject of study, is taught in most of the public and private schools of this country, but it is only that form of bookkeeping that applies to the affairs of the merchant or the shopkeeper. The public has yet to learn that bookkeeping is quite as necessary to the prosperity of the wageworker, the salaried man, the farmer and the housekeeper as it is to the shopkeeper, the merchant or the manufacturer.—Exchange.

## FLOWERS' HOURS OF SLEEP

That They Differ Is a Proof of the Adaptability of Everything in Nature.

That flowers sleep is evident to the most casual observer. The beautiful daisy opens at sunrise and closes at sunset, whence its name "day's eye." The morning glory opens its flower with the day. The "four o'clock" awakes at four o'clock in the morning, but closes its eyes in the middle of the day, and the dandelion is in full bloom only while there is strong light. The habit of some flowers is certainly curious, and furnishes one of the many instances which prove the singular adaptability of everything in nature. The reason is found in the method by which this class of flowers is fertilized.

Flowers which are fertilized by night flying insects derive no advantage from being open by day; and, on the other hand, those which are fertilized by bees would gain nothing by being open at night. Nay, it would be a disadvantage, because it would render them liable to be robbed of their honey and pollen by insects which are incapable of fertilizing them. It is possible, then, that the closing of flowers may have reference to the habit of insects, and it may be observed, also, in support of this, that wind-fertilized flowers never sleep.

## MUCH DEPENDS ON ONESELF

Good Hard Sense as Applied to Ancient Superstitions Concerning "Blue Monday."

I happened to find a most entertaining old book in the free library—a dictionary of superstitions. It has three big volumes, all crammed with the fears and beliefs of the human race. Just to sample some of them that apply to Monday, here are a few:

"If things commence to go wrong on Monday they will go wrong all the week, but if you have good luck on Monday you will keep it up."

"Pay no bills on Monday if you can help it."

"(This is congenial advice and easily followed.)"

"If you meet a cross-eyed person on Monday you will not have good luck till Thursday."

"If the sun sets clear Friday night it will rain before Monday night."

"It is a bad sign to lose a tooth on Monday."

(Yes, or a hand or a leg either, I should say.)

"If you lose your temper three times on Monday you will have a great family quarrel."

(This bit of sagacity has an excellent chance of being true, one would think. Still, there may be some men who could get away with three blow-outs and have no comeback.)

To add our own observation to the collected wisdom of the ages your Monday is neither more or less than what you choose to make it when you get out of bed in the morning. You can make it lucky or unlucky.

As to Conforming to Fashion. Avoid singularity. There may often be less vanity in following the new modes than in adhering to the old ones. It is true that the foolish invent them, but the wise may conform to, instead of contradicting them.—Joubert.

Aptitude for Details. "You know Johnson—great fellow for detail." "He is that! He's the sort of chap who would go and get married and be able afterward to tell you whether it was Mendelssohn, Lohengrin, or Tannhauser they played during the ceremony!"

## Seven Reasons Why There Should Be An Electric Range in Every Bend Home.

- 1st—Saving of time, labor and fuel.
- 2nd—Meats, vegetables and other foods retain natural flavors when cooked on an ELECTRIC RANGE that are otherwise lost in vapors when subjected to uneven heats produced by wood, coal or gas ranges.
- 3rd—Get out of bed, turn the button and breakfast is started while you are dressing.
- 4th—No dirt, no ashes. Mother's work is easier and her disposition is happier and her days are longer.

- 5th—A blessing when days are hot; cook on an Electric Range and you do not realize there is any heat in your kitchen.
- 6th—Very low rates maintained by the Bend Water, Light & Power Co. put all the comforts of the ELECTRIC RANGE in reach of all.
- 7th—Cleanliness, ease, comfort and the fact that Mother's burdens are lightened should be the main reasons for an Electric Range.
